Erratum

Repression of androgen receptor in prostate cancer cells by phenethyl isothiocyanate

L.G. Wang

The ChIP assay result (Figure 5A), one of the three assays shown in Figure 5, used to illustrate the effects of PEITC on the formation of Sp1 nuclear-binding complex of our paper, published on Carcinogenesis 27, 2124–2132, 2006 (authors L.G. Wang, X.M. Liu and J.W. Chiao), was performed as collaboration by Drs Kinoshita and Johnson, Mt Sinai School of Medicine, New York, NY. However, they are not listed as the authors and were not acknowledged in this paper. Therefore, I would like to sincerely apologize on behalf of all original authors and express appreciation for the important contribution of Drs Kinoshita and Johnson. We can attest to the fact that the data presented in the paper are accurate and reproducible for the conclusions of the paper.
