Hierarchical hidden Markov model with application to joint analysis of ChIP-chip and ChIP-seq data
H. Choi, A. I. Nesvizhskii, D. Ghosh and Z. S. Qin

SOt-ITEMS: Sequence orthology based approach for improved taxonomic estimation of metagenomic sequences
Monzoorul, Hoque M., T. S. Ghosh, D. Komanduri and S. S. Mande

Data structures and compression algorithms for genomic sequence data
M. C. Brandon, D. C. Wallace and P. Baldi

ESG: extended similarity group method for automated protein function prediction
M. Chitale, T. Hawkins, C. Park and D. Kihara

Efficient computation of all perfect repeats in genomic sequences of up to half a gigabyte, with a case study on the human genome
V. Becher, A. Deymonnaz and P. Heiber

Fast and accurate short read alignment with Burrows-Wheeler transform
H. Li and R. Durbin

pGenTHREADER and pDomTHREADER: new methods for improved protein fold recognition and superfamily discrimination
A. Lobley, M. I. Sadowski and D. T. Jones

Literature-based priors for gene regulatory networks
E. Steele, A. Tucker, P. A. C. ’t Hoen and M. J. Schuemie

Gradient lasso for Cox proportional hazards model
L. Sohn, J. Kim, S. H. Jung and C. Park

Relating periodicity of nucleosome organization and gene regulation
J. Lin, J. Z. Shu, D. Zhao and J. Qian

Seeing the forest for the trees: using the Gene Ontology to restructure hierarchical clustering
D. Dottor Cohen, S. Kasif and A. A. Melkman

On the inference of spatial structure from population genetics data
G. Guillot

Comment on ‘On the inference of spatial structure from population genetics data’
E. Durand, C. Chen and O. François

Response to comment on ‘On the inference of spatial structure from population genetics data using the Tess program’
G. Guillot

Estimating the posterior probability that genome-wide association findings are true or false
J. Bukzsár, J. L. McClay and E. J. C. G. van den Oord

Structure discovery in PPI networks using pattern-based network decomposition
P. Bachman and Y. Liu

Robust synthetic biology design: stochastic game theory approach
B. S. Chen, C. H. Chang and H. C. Lee
Access contains papers that have recently been accepted but have not yet been included within an issue. Advance Access is updated twice a week.

The current year and two previous years’ issues are available from Oxford University Press. There may be other subscription rates available, for a complete listing please visit www.bioinformatics.oxfordjournals.org/subinfo.

T. Ideker, J. Dopazo, J. Barrett, A. Bateman, R. Mathieson, Portugal (–2010)
S. Batzoglou, USA (–2010)
A. Buzna, UK (–2009)
S. Brenk, Denmark (–2011)
C.D. Bastianante, USA (–2009)
K.A. Connolly, USA (–2010)
M. Gefen, Bertout (–2011)
D. Higgins, Ireland (–2011)
C. Hodeman, UK (–2009)
L. Holm, Finland (–2009)
W. Huber, UK (–2010)
L. Jensen, Germany (–2010)
M. Kapus, USA (–2009)
K. Karplus, USA (–2011)
J. Kelso, Germany (–2011)
