Discover Note

Seed-based mtrNA prediction combined with GFP-reporter system identifies miRNA targets of the small RNA YfR1
A.S. Richter, C. Schleberger, R. Backofen and C. Steglich

Original Papers

Accurate confidence aware clustering of array CGH tumor profiles
B.P.P. van Houte and J. Heringa

Identification of non-Hodgkin’s lymphoma prognosis signatures using the CTGDR method
S. Ma, Y. Zhang, H. Huang, X. Han, T. Hoford, Q. Lan, N. Rothman, P. Boyle and T. Zheng

Annotation confidence score for genome annotation: a genome comparison approach
Y. Yang, B. Gilbert and S. Kim

Predictive rule inference for epistatic interaction detection in genome-wide association studies
X. Wang, C. Yang, Q. Yang, H. Xue, N. L.S. Tang and W. Wu

The GNUMAP algorithm: unbiased probabilistic mapping of oligonucleotides from next-generation sequencing

Roll: a new algorithm for the detection of protein pockets and cavities with a rolling probe sphere
J. Liu, Y. Zhou, I. Tanaka and M. Yao

Automatic clustering of docking poses in virtual screening process using self-organizing map
G. Bouvier, N.E. Vardar-Todeschi, J. Pierrart and G. Bertho

Modeling the interplay of single-stranded binding proteins and nucleic acid secondary structure
R.A. Forties and R. Bundschuh

Gene expression

Reporting bias when using real data sets to analyze classification performance
M.R. Davoli, H. Hua, C. Stima and E.R. Dougherty

Computational protein profile similarity screening for quantitative mass spectrometry experiments

AMH: predicting splice variants from genomewide data with modified entropy
A. Rasche and R. Herwig

System biology

Identification of microRNA activity by Targets Reverse Expression
S. Veilma, R. Visone, G. Galasso, E. Rossi and C.M. Groce

Methods for combining peptide intensities to estimate relative protein abundance
B. Carrillo, C. Yoon, S. Labossiere, R. Natolin and E.J. Kearney

Simulation-based model selection for dynamical systems in systems and population biology
T. Ton and M. H. Stumpf

Data and text mining

Evaluation of linguistic features useful in extraction of interactions from PubMed: Application to annotating known, high-throughput and predicted interactions in I2D
Y. Niu, D. Otasek and I. Jurisica

Applications Note

Targeted interrogation of copy number variation using SCIMMKit
T. Zer, G.M. Cooper, E.E. Eichler and D.A. Nickerson

Bioinformatics
Subscriptions
A subscription to Bioinformatics comprises 24 issues. All prices include postage, and for subscribers outside the UK delivery is by Standard Air. Bioinformatics Advance Access contains papers that have recently been accepted but have not yet been included within an issue. Advance Access is updated twice a week.

Annual subscription rates (Volume 26, 24 issues, 2010)

| Institutional | £1464.00 | $2982.00 | €1464.00 |
|              | E2237.00 | E4711.00 | E2237.00 |

Please note: US$ rate applies to US and Rest of World, except UK (£) and Eurozone (€).

Subscription rates are only available if payment is made by personal cheque or credit card and delivery is to a private address.

The current year and two previous years’ issues are available from Oxford University Press and www.periodicals.com/bioinformatics. Previous volumes can be obtained from the Periodicals Service Company, 11 Main Street, Germantown, NY 12526, USA. Email: psc@periodicals.com. Tel: +1 (518) 537 4700. Fax: +1 (518) 537 5899.

For further information, please contact: Journals Customer Service Department, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK. Email: jnl-orders@oup.com. Tel: (01865) 353774 or visit www.oupjournals.org/jnls/sales.

Supplements, Reprints and Corporate Sales
For requests from industry and companies regarding supplements, bulk article reprints, sponsored subscriptions, translation opportunities for previously published material, and corporate online opportunities, please email special.sales@oxfordjournals.org, fax +44 (0)1865 353774 or visit www.oupjournals.org/jnls/sales.

Permissions
For information on how to request permissions to reproduce articles/ information from this journal, please visit www.oupjournals.org/jnls/permissions.

Advertising
Advertising, inserts and artwork enquiries should be addressed to Advertising and Special Sales, Oxford Journals, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK. Tel: 044 (0)1865 353774; Email: jnls.advertising@oxfordjournals.org.

Disclaimer
Statements of fact and opinion in the articles in Bioinformatics are those of the respective authors and contributors and not of Bioinformatics or Oxford University Press.
