Bioinformatics

VOLUME 28 NUMBER 13 JULY 1 2012

ORIGINAL PAPERS

Statistical analysis of glycosylation profiles to compare tissue type and inflammatory disease state
C.A. Hayes, S.Nemes and N.G. Karlsson

OnlineCall: fast online parameter estimation and base calling for Illumina’s next-generation sequencing
S.Das and H.Vikalo

Sequence analysis

Accurate extension of multiple sequence alignments using a phylogeny-aware graph algorithm
A.P. Loytynoja, A.J. Vilella and N.G. Goldman

Speeding up tandem mass spectral identification using indexes
X.Liu, A. Mammana and V. Balina

Fast and sensitive mapping of bisulfite-treated sequencing data
C.Otto, P.F. Stadler and S. Hoffmann

In silico identification software (ISIS): a machine learning approach to tandem mass spectral identification of lipids

Joint Bayesian inference of condition-specific miRNA and transcription factor activities from combined gene and microRNA expression data
B. Zacher, K. Abnabia, S. Gade, E. Younesi, A. Tresch and H. Frohlich

Identifying differentially expressed transcripts from RNA-seq data with biological variation
P.Dragiev, R. Nadon and V. Makarenkov

APPLICATIONS NOTE

A novel variational Bayes multiple locus Z-statistic for genome-wide association studies with Bayesian model averaging
B.A. Logsdon, C.L. Carty, A.P. Reiner, J.Y. Dai and C. Kooperberg

SEQCHIP: a powerful method to integrate sequence and genotype data for the detection of rare variant associations
D.J. Liu and S.M. Leal

GESMIRV: a software platform for GEnome-scale metabolic model simulation, reconstruction and visualization
Y.-C. Liao, M.-H. Tsai, F.-C. Chen and C.A. Hsiung

Data and text mining

Boosting automatic event extraction from the literature using domain adaptation and coreference resolution
Y.-J. Chou, P. Thompson and S. Ananiadou

Statistical interpretation of machine learning-based feature importance scores for biomarker discovery
V.A. Heyn, V. Tsatsias, L. Wehenkel and P. Geurts

Two effective methods for correcting experimental high-throughput screening data
P. Dragiev, R. Nadon and V. Makarenkov

Semantic integration of physiology phenotypes with an application to the Cellular Phenotype Ontology
R. Hoehndorf, M.A. Harris, H. Herre, G. Rustici and G. Ilkoutos

Databases and ontologies

CNVRuler: a copy number variation-based case–control association analysis tool
J.H. Kim, J.H. Hu, S.H. Yim, J.S. Bae, S.W. Kim and Y.J. Chung

CallMaTe: a method and software to improve allele-specific copy number of SNP arrays for downstream segmentation
M. Ortiz-Estevez, A. Aramburu, H. Bengtsson, P. Neuvial and A. Robbio

continued inside back cover
