Chapter 1 AUSTRIA: Austrian Chemical Societies in the Last Decades of the Habsburg Monarchy, 1869–1914

W. Gerhard Pohl

1.1	Chemistry Development and Chemical Education in Austria	1
1.2	Establishment of Chemical Societies	3
1.2.1	Predecessors of the Chemical Society	3
1.3	The Association of Austrian Chemists	3
1.3.1	Founding the Association	3
1.3.2	Management and Members	4
1.3.3	Everyday Routines	8
1.3.4	Various Activities	10
1.3.5	International and National Contacts	12
1.3.6	Publications	14
1.4	Concluding Remarks	18
	Acknowledgements	19
	Abbreviations	20
	References	20

Chapter 2 BELGIUM: From Industry to Academia: The Belgian Chemical Society, 1887–1914

Brigitte Van Tiggelen and Hendrik Deelstra

2.1	Chemical Education: A Kaleidoscope	24
2.2	First Step to Union: Facing Disagreement	26
2.3	Chemists, Among Other Things	28
2.4	Extending to All Chemical Experts	32
2.5	From Expert Chemists to Chemically Educated	35

Creating Networks in Chemistry: The Founding and Early History of Chemical Societies in Europe
Edited by Anita Kildebæk Nielsen and Soňa Štrbáňová

© The Royal Society of Chemistry 2008

2.6	The <i>Bulletin</i> , the Organic Link	38
2.7	Consensus <i>versus</i> Demarcation	40
	References	41

Chapter 3 CZECH LANDS: Chemical Societies as Multifunctional Social Elements in the Czech Lands, 1866–1919

Soňa Štrbáňová

3.1	General Historical Background	43
3.2	Chemical Industry and Chemical Education in the Czech Lands	44
3.3	The Changing Framework of the Czech Chemical Societies, 1866–1919	45
3.3.1	<i>Isis</i> , 1866–1872	46
3.3.2	<i>Spolek chemiků českých</i> – Society of Czech Chemists, 1872–1906	50
3.3.2.1	The Executive	50
3.3.2.2	The Members	51
3.3.2.3	Financing	53
3.3.2.4	Survey of Activities	53
3.3.2.5	Publications, Lecturing and Excursions	54
3.3.2.6	Professional, Economic and Legal Counselling	57
3.3.2.7	Cooperation with Other Corporations	57
3.3.2.8	International Contacts	57
3.3.3	Temporary Split: <i>Společnost pro průmysl chemický v Království českém</i> (Society for Chemical Industry in the Czech Kingdom), 1893–1906	60
3.3.3.1	Founding a New Society	60
3.3.3.2	The Executive, Membership and Activities	60
3.3.3.3	Plea for Reunification	62
3.4	Reunification: <i>Česká společnost chemická pro vědu a průmysl</i> (Czech Chemical Society for Science and Industry), 1907–1919	63
3.5	Other Professional Associations of Chemists in the Czech Lands	66
3.6	Membership Profile and Demarcation of the Czech Chemical Societies	67
3.7	Conclusion	70
	Abbreviations	71
	References	71

Chapter 4	DENMARK: Creating a Danish Identity in Chemistry between Pharmacy and Engineering, 1879–1914	
	<i>Anita Kildebæk Nielsen</i>	
4.1	Introduction	75
4.2	A Short History of Chemistry in Denmark in the Nineteenth Century	76
4.3	Initiation and Early Years of the Danish Chemical Society	79
4.4	Regular Routines and Events	81
4.5	National and International Relations	83
4.6	Profile, Demarcation and Power Balancing	86
4.7	Conclusion	88
	References	89
Chapter 5	FRANCE: The Chemical Society of France in Its Formative Years, 1857–1914: Disciplinary Identity and the Struggle for Unity	
	<i>Ulrike Fell and Alan Rocke</i>	
5.1	From Self-study Club to Scientific Society	91
5.2	The Members	96
5.3	Geographical Demarcations	99
	5.3.1 Becoming a National Society	99
	5.3.2 Becoming an International Player	101
5.4	Disciplinary Demarcation	102
	5.4.1 A Campaign for the Second Chemical Revolution	102
	5.4.2 Between “Pure” and “Applied” Chemistry	104
5.5	Professional Demarcation	107
5.6	Conclusion	109
	References	110
Chapter 6	GERMANY: Discipline – Industry – Profession. German Chemical Organizations, 1867–1914	
	<i>Jeffrey Allan Johnson</i>	
6.1	Introduction	113
6.2	Development of the <i>Deutsche chemische Gesellschaft</i> , 1867–1914	114
	6.2.1 Foundation and Membership	114
	6.2.2 The <i>Deutsche chemische Gesellschaft</i> and the Chemical Industry in the Hofmann Era	121

6.2.3	The <i>Deutsche chemische Gesellschaft</i> under Fischer, 1892–1914: Institutional Growth and New Publications	122
6.3	<i>Deutsche Gesellschaft für angewandte Chemie</i> and <i>Verein Deutscher Chemiker</i>	124
6.3.1	A German Society for Applied Chemistry, 1887–1895	124
6.3.2	A Professional Association for German Chemists: From <i>Deutsche Gesellschaft für angewandte Chemie</i> to <i>Verein Deutscher Chemiker</i> , 1896–1914	126
6.3.3	Professionalization on a Broader Basis: Interaction with the <i>Deutsche chemische Gesellschaft</i> and Other Groups	130
6.4	The German Chemical Societies and the International Structure of Chemistry to 1914	132
6.5	Discipline and Profession in the German Chemical Societies before 1914: Conclusions	133
	Abbreviations	134
	Acknowledgments	135
	References	135

Chapter 7 GREAT BRITAIN: Chemical Societies and the Demarcation of the British Chemical Community, 1870–1914

Robin Mackie

7.1	Introduction	139
7.2	The Foundation and Goals of the British Chemical Societies	140
7.2.1	The First Society: The Chemical Society	140
7.2.2	A Professional Body: The Institute of Chemistry	141
7.2.3	Chemists in Industry: The Society of Chemical Industry	141
7.3	The Membership of the Societies	143
7.3.1	Numbers in the Three Societies	143
7.3.2	Home and Abroad	144
7.4	Education and Occupations	146
7.4.1	Education and Qualifications	146
7.4.2	Occupations	147
7.5	The Activities of the Chemical Societies	149
7.5.1	The Chemical Society in 1900	149
7.5.2	The Institute of Chemistry in 1900	151
7.5.3	The Society of Chemical Industry in 1900	152
7.6	Chemists Outside the Chemical Societies	153
7.7	Professional Demarcation	156

<i>Contents</i>	xvii
7.8 Conclusion	158
Abbreviations	158
References	158
Chapter 8 HUNGARY: Scientific Community of an Emancipating Nation: Chemical Societies in Hungary before 1914	
<i>Éva Katalin Vámos</i>	
8.1 Introduction	161
8.2 Scientific/Industrial Chemical Societies/Sections of Societies Established before 1907	162
8.2.1 The Class of Mathematics and Natural Sciences of the Hungarian Academy of Sciences (MTA)	162
8.2.2 <i>Királyi Magyar Természettudományi Társulat (KMTT) Kémiai és Ásványtani Szakosztálya (KAS)</i> – (Section of Chemistry, later Chemistry and Mineralogy of the Royal Hungarian Society for Natural Sciences)	163
8.2.3 <i>Vegyészeti Gyárosok Országos Egyesülete</i> (Association of Chemical Industrialists, VEGYOE)	166
8.2.4 Section of Chemical Engineering of the <i>Magyar Mérnök- és Építészegylet</i> (Association of Hungarian Engineers and Architects, MÉ)	168
8.3 <i>Magyar Kémikusok Egyesülete</i> (the Hungarian Chemical Society, MKE)	169
8.3.1 The Establishment of the Hungarian Chemical Society, Arguments Justifying It and Its Initiators	169
8.3.2 Members, Executives and Board; Numbers, Background and Positions	171
8.3.3 Events Organized by MKE	174
8.3.4 Relations of MKE with the Surrounding Society	175
8.3.5 The Relations of MKE with Other Professional Societies at the National and International Level	176
8.3.6 MKE's Journal, Its Contents and Intended Audience	177
8.3.7 Affairs of MKE	180
8.3.8 MKE's Attitude Towards Policies of Expansion, Monopolization or Professional Autonomy	182
8.4 Concluding Remarks	182
Abbreviations	183
References	183

Chapter 9 THE NETHERLANDS: Keeping the Ranks Closed: The Dutch Chemical Society, 1903–1914

Ernst Homburg

9.1	Introduction	186
9.2	The First Dutch Chemical Societies	187
9.3	The Rise of Scientific Pharmacy	190
9.4	Reforming the Educational and Scientific Institutions, 1863–1887	191
9.5	The State of the Chemical Profession around 1890	193
9.6	The Rise of Private Laboratories and Agricultural Stations	196
9.7	The Rise of the Chemical Engineers from Delft	197
9.8	Founding the <i>Nederlandsche Chemische Vereeniging</i> (NCV)	199
9.9	The First Members of the <i>Nederlandsche Chemische Vereeniging</i>	204
9.10	The First Ten Years of the Society	209
9.11	Conclusion	215
	Abbreviations	216
	References	216

Chapter 10 NORWAY: A Group of Chemists in the Polytechnic Society in Christiania. The Norwegian Chemical Society, 1893–1916

Bjorn Pedersen

10.1	Setting the Norwegian Scene	223
10.2	Norwegian Institutions Teaching Chemistry	224
	10.2.1 Technical Schools and Military Schools	224
	10.2.2 The University in Christiania	225
	10.2.3 Professors of Chemistry	226
10.3	The Roots of the Norwegian Chemical Society	226
	10.3.1 The Learned Societies in Norway	226
	10.3.2 The Technical Society	227
	10.3.3 The Polytechnical Society	227
10.4	The Norwegian Chemical Society	228
	10.4.1 A Meeting Place for People Interested in Chemistry	228
	10.4.2 Chairmen	229
	10.4.3 The Activity within the Group of Chemists	230
	10.4.4 Women as Members?	230
	10.4.5 Initiators	231
	10.4.6 Change of Name in 1916	232
	10.4.7 Social Tasks	232
	10.4.8 Norwegian Journals for Chemistry	232

<i>Contents</i>	xix
10.5 Conclusion	233
References	234
Chapter 11 POLAND: Chemists in a Divided Country. The Long-lasting Genesis and Early History of the Polish Chemical Society, 1767–1923	
<i>Halina Lichočka</i>	
11.1 Introduction	236
11.2 Involvement of Chemists in General Science Societies	237
11.3 Chemists in Societies of Naturalists	239
11.4 Societies of Applied Science	240
11.4.1 Pharmaceutical Associations	240
11.4.2 Museum of Industry and Agriculture	241
11.5 Technological Societies	242
11.6 The Warsaw Branch of the Society for the Promotion of Russian Industry and Commerce. The Chemistry Section	243
11.7 Consolidation of Polish Communities of Chemists 1919–1924	245
11.7.1 The Polish Chemical Society Comes into Being	246
11.7.2 Membership	247
11.7.3 Everyday Routines	249
11.7.4 Publications	251
11.8 Demarcation	252
11.9 Conclusions	252
References	255
Chapter 12 PORTUGAL: Tackling a Complex Chemical Equation: The Portuguese Society of Chemistry, 1911–1926	
<i>Vanda Leitão, Ana Carneiro and Ana Simões</i>	
12.1 Background: The Municipal Laboratory of Chemistry	258
12.2 The <i>Revista de Chimica Pura e Applicada</i> (Journal of Pure and Applied Chemistry)	260
12.3 The <i>Sociedade de Chimica Portuguesa</i> (Portuguese Society of Chemistry)	265
12.3.1 Aims and Organization	266
12.3.2 Membership	270
12.3.3 The Appropriation of an Old Journal by the New Society	272
12.4 Concluding Remarks	275
Acknowledgements	277

Abbreviations	277
References	277
Chapter 13 RUSSIA: The Formation of the Russian Chemical Society and Its History until 1914	
<i>Nathan M. Brooks, Masanori Kaji and Elena Zaitseva</i>	
13.1 Scientific Institutions in Russia during the Eighteenth and Nineteenth Centuries	282
13.2 Chemistry in Russia during the First Half of the Nineteenth Century	283
13.3 Early Attempts to Form a Russian Chemical Society	285
13.4 The Formation of the Russian Chemical Society	288
13.4.1 Structure and Membership	289
13.4.2 Finances	295
13.4.3 Publications	296
13.4.4 Meetings and Other Functions	298
13.5 Conclusions	302
References	302
Chapter 14 SWEDEN: The Chemical Society in Sweden: Eclecticism in Chemistry, 1883–1914	
<i>Anders Lundgren</i>	
14.1 Introduction	305
14.2 Scientific Organizations	306
14.3 The Founding of <i>Kemistsamfundet</i> and Its First Activities	309
14.4 The First Journal: <i>Kemiska Notiser</i>	310
14.5 Relations between <i>Kemistsamfundet</i> and <i>Teknologföreningen</i>	311
14.6 <i>Svensk Kemisk Tidskrift</i> , a New Journal?	313
14.7 Membership Development	316
14.8 <i>Kemistsamfundet</i> as an Internal Membership Organization	318
14.8.1 Its Journals Stayed Insignificant	318
14.8.2 Main Activities Were Discussions	320
14.8.3 Unconventional Theories, <i>etc.</i>	320
14.8.4 No One Used <i>Kemistsamfundet</i> for Strategic Reasons	321
14.8.5 Social Significance	322
14.9 Final Words	324
Abbreviations	325
References	325

Chapter 15 Creating Networks in Chemistry – Some Lessons Learned*Anita Kildebæk Nielsen and Soňa Štrbářová*

15.1	Chronology of Founding	329
15.2	Developments in Membership	334
15.3	Roles of the Chemical Societies	337
15.4	The Journals	338
15.5	Financial Matters	340
15.6	Professional Stratification and the Equilibrium between Pure and Applied Chemistry	341
15.7	Foreign Relations	343
15.8	Demarcation	345
15.9	Other Potential Lines of Analysis – Ideas for the Future	346
	References	348
	List of Contributors	349
	Notes on Contributors	352
	Index of Names	358
	Index of Institutions and Journals	367
	Subject Index	390
