A Word About This Guide	ix
Contributors to the Eighth Edition	xi
Acknowledgments	xiii
Diagnosis and Classification	1
Highlights	2
Definition of Diabetes	5
Diagnosis of Diabetes	6
Classification of Diabetes	7
Type 1 Diabetes	9
Type 2 Diabetes	10
Gestational Diabetes Mellitus	11
Other Specific Types of Diabetes	11
Stage of Disease	15
Screening for Diabetes	15
Categories of Increased Risk for Diabetes	17
Metabolic Syndrome	17
Evaluation and Classification of Patients Before Treatment	18

Pathogenesis	29
Highlights	30
Genetic Factors	31
Environmental Factors	33
Insulin Resistance	34
Sites of Insulin Resistance	34
Mechanisms of Insulin Resistance	34
The Fat Cell as an Endocrine Organ	37
The Kidney as an Endocrine Organ	38
Defects in Insulin Secretion	38
Factors Modulating Insulin Secretion	39
Physiological Consequences of Defective Insulin Secretion	40
Conclusion	40

Management	49
Highlights	51
Therapeutic Objectives and Plan	55
Nutrition Therapy for Adults with Type 2 Diabetes	63
Effectiveness of Diabetes Nutrition Therapy	63
Macronutrients	65
Eating Patterns	68
Energy Balance and Weight Management	72
Sugar-Sweetened Beverages (SSBs) & Sugar Substitutes	75
Alcohol Consumption	76
Micronutrients, Herbal Supplements, and Medications	76
Role of Nutrition Therapy in the Prevention and Management of Diabetes Complications	77
Conclusion	79
Exercise	86
The Benefits of Exercise for People with Type 2 Diabetes	86
American Diabetes Association Recommendations for Exercise	88
Safety Considerations	92
Special Populations	95
Jumping Over the Barriers to Exercise	96
Conclusion	97

Pharmaceutical Intervention	100
Overview of Pharmacologic Classes	100
Biguanides	100
Sulfonylureas and Meglitinides	106
TZDs	108
SGLT2 Inhibitors	110
GLP-1 RAs	115
DPP-4 Inhibitors	120
Other Glucose Lowering Classes	122
AGIs	125
Insulins	126
Insulin/GLP-1 FRCs	131
Initiation of Pharmacological Therapy	133
Advancement of Pharmacological Therapy	134
Conclusion	138
Assessment of Treatment Efficacy	147
Hemoglobin A1c	147
Self-Monitoring of Blood Glucose	149
Real-Time and Intermittently Scanned Continuous Glucose Monitoring	151
Urine and Blood Ketone Determinations	152
Population Health and Cost Effectiveness	156
Status of Diabetes in the U.S. Population	157
Chronic Disease Management	158
Shift to Population Health: Value-Based Payments	158
Current Challenges	161
Conclusion	161
Diabetes Technology	163
Continuous Glucose Monitors	163
Patch Pumps	165
Smart Insulin Pens	165
Insulin Pumps	165

Special Therapeutic Situations

167

Highlights 168

Diabetes in Pregnancy 171

 Preconception Care and Counseling 171

Pregnancy and Pregnancy Metabolic Metrics	174
Gestational Diabetes Mellitus	176
Diabetes Care in Pregnancy	178
Diabetes in Youth	184
Differentiation of Type 1 and Type 2 Diabetes in Youth	184
Screening for Type 2 Diabetes in Youth	184
Treating Type 2 Diabetes in Youth	185
When to Consider Specialty Consultation	187
Diabetes in Hospitalized and Critically Ill Patients	190
Glucose Monitoring	190
Glycemic Targets	190
Choice of Therapy	191
Hypoglycemia	192
Enteral/Parenteral Feeds	193
Glucocorticoid Therapy	194
Considerations for the Surgical Patient	195
Transition from Hospital to Home	195
Major Acute Complications	200
Hyperosmolar Hyperglycemic State	200
Hypoglycemia	201
Diabetic Ketoacidosis	203
Infection	204
Elderly and Diabetes	208
Diabetes Trials in Older Patients	208
Glycemic Goals	208
Treatment Regimens	209
<hr/>	
Detection and Treatment of Chronic Complications	215
Highlights	216
Economic and Disease Burden of Diabetes	219
Rationale for Optimizing Glycemic Control in Type 2 Diabetes	221
Post-trial Follow-Up Studies	223
Macrovascular Complications	224
Diabetes as a CV Risk Factor	224
Screening for CVD	224
CV Risk Assessment in Patients with Diabetes	225

Modification of Vascular Risk Factors	225
Management of Diabetic Dyslipidemia	234
Hypertriglyceridemia	237
Smoking Cessation	240
Glucose-Lowering Therapies and CV Outcomes	241
Diabetes and Heart Failure	243
Conclusion	244
Microvascular Complications	256
Diabetic Retinopathy	256
Diabetic Kidney Disease	262
Diabetic Foot Problems	269
Diabetic Neuropathies	276
<hr/>	
Diabetes Self-Management Education and Behavior Change	303
Highlights	304
Diabetes Self-Management Education and Support	305
Information or Education	307
Benefits of DSMES	307
Diabetes Education Referral	308
Who are Diabetes Care and Education Specialists?	309
Person-Centered Learning	309
Summary	310
Behavior Change	310
Person-Centric Language	310
Challenges to Making Behavior Change	310
Emotional Barriers and Factors Influencing Behavior Change	311
Diabetes Distress	312
Strategies for Behavior Change: Motivational Interviewing	313
Strategies for Facilitating Goal Setting with Motivational Interviewing	315
Strategies for Behavior Change: Empowerment Approach	316
SMART Goal Setting	316
Ongoing Diabetes Self-Management Support	316
Summary	317
