List of New Contributors xiii

Pre- and Interpregnancy Counseling, Assessment, and Management 1

Highlights 2

Preexisting Diabetes 5

 Pregpregnancy Counseling 9

 Pregpregnancy Assessment 11

 Pregpregnancy Management 14

Previous Gestational Diabetes Mellitus 18

Selected Readings 19

References 20

Assessment of Glycemic Control 25

Highlights 26

Normoglycemia during Pregnancy 27

Self-Monitoring of Capillary Blood Glucose 28

 Site of SMBG 29

 Timing of SMBG 29

Continuous Glucose Monitoring in Pregnancy 30

Factors Affecting Glucose Levels 31

Other Measures of Metabolic Control 31

Ketonuria and Ketonemia 33

Selected Reading 34

References 34

Lifestyle Management for Diabetes in Pregnancy	39
Highlights	41
Weight Gain Recommendations	43
Controversy: Calorie Restriction for Obese Patients	44
Nutritional Management in Pregnancy	45
For Preexisting Diabetes	45
For Gestational Diabetes Mellitus	48
Individualized Meal Planning and Recordkeeping	48
Macronutrients	50
Energy	50
Carbohydrate	52
Dietary Fiber	53
Glycemic Index	55
Resistant Starch and High-Amylose Foods	55
Protein	56
Dietary Fat	56
Micronutrients	57
Sodium	57
Folate	57
Iron	58
Vitamin D and Calcium	58
Other Nutrients	58
Vitamin and Mineral Supplementation	59
Food Safety	59
Caffeine	59
Alcohol	60
Nonnutritive Sweeteners	60
Herbal Medicines and Supplements	60
Listeria	60
Mercury	60
Exercise as a Treatment Modality	61
Selected Readings	61
References	62

 Medication Management of Diabetes in Pregnancy 67

Highlights 68

Metabolic Changes during Pregnancy 69

Antenatal Insulin Use 70

Insulin Pumps 73

Dosage Adjustment 74

Hypoglycemia 74

Insulin Use and Preterm Delivery 74

Insulin Use during Labor and Delivery 75

Oral Antidiabetic Agents for Women with GDM 76

Metformin 76

Glyburide 77

References 77

 Risk Assessment, Fetal Surveillance, and Delivery in Pregnancies
 Complicated by Diabetes 81

Highlights 82

Screening, Diagnostic Testing, and Fetal Surveillance 83

Genetic Screening 83

Ultrasound 87

Antenatal Testing 88

Timing and Mode of Delivery 91

Selected Readings 93

References 93

 Common Complications of Diabetes in Pregnancy 95

Highlights 96

Hyperemesis and Gastroparesis 97

Nonpharmacologic Treatments 98

Pharmacologic Treatments 99

Insulin Adjustments 100

Preterm Birth 100

Preeclampsia 101

Diabetic Ketoacidosis 102

Congenital Anomalies and Perinatal Deaths 102

References 103

Neonatal Care of Infants of Mothers with Diabetes 107

Highlights 108

Overview 109

Newborn Outcomes 110

 Congenital Anomalies 110

 Cardiomyopathy 111

 Macrosomia, Birth Injury, and Asphyxia 112

 Intrauterine Growth Restriction 113

 Respiratory Distress 113

 Hypoglycemia 114

 Hypocalcemia and Hypomagnesemia 114

 Hyperbilirubinemia and Erythremia 115

Nursery Care 115

 Glucose Homeostasis 116

 Resuscitation 118

Long-Term Follow-Up 119

 Offspring Adiposity and Cardiometabolic Health 119

 Offspring Cognitive Abilities 119

References 120

Postpartum Concerns for Women with Diabetes 125

Highlights 126

Postpartum Care 127

Breast-Feeding 129

Nutrition Recommendations 130

 Postpartum Nutrition Management 130

 Macronutrients 133

 Micronutrients 133

Selected Readings 133

References 134

Contraception in Women with Diabetes and Prior Gestational Diabetes Mellitus	137
Highlights	138
Hormonal Contraceptives Background	141
Long-Acting Reversible Contraceptives: Intrauterine Devices and Implants	141
Intrauterine Devices	141
Implants	145
Non-LARC Hormonal Contraceptives	145
Combined Estrogen and Progestin Contraceptives	145
Progestin-Only Contraceptives	146
Permanent Sterilization	147
Selected Readings	148
References	149

Index	153
