Chapter 1	Introduction to Hazardous Reagent Substitution in the Pharmaceutical Industry	1
	<i>Rakeshwar Bandichhor</i>	
1.1	Role of Reagents in the Development of Organic Synthesis	1
1.1.1	Inorganic Material in the Synthesis of APIs	2
1.1.2	Organic Material in the Synthesis of APIs	2
1.2	Process Mass Intensity (PMI)	3
1.3	Stoichiometry of the Reagent	4
1.4	Green Chemistry: Selection of Reagent	5
1.5	Positive Impacts of Hazardous Reagent Substitution During Manufacturing	6
1.6	Catalysts: Alternative Reaction Facilitators	7
1.7	Nature of Reagents	8
1.8	Rationale of Chapters Recommended for the Book	11
1.9	Conclusions and Prospects	13
	References	15
Chapter 2	Recyclability of Reagents	18
	<i>Shivani Sharma, Sriparna Dutta and Rakesh Kumar Sharma</i>	
2.1	Introduction	18
2.2	Overview of Pharmaceutical Wastes	19
2.2.1	Hazardous Pharmaceutical Wastes	20

Green Chemistry Series No. 52

Hazardous Reagent Substitution: A Pharmaceutical Perspective

Edited by Rakesh Kumar Sharma and Rakeshwar Bandichhor

2.2.2	Non-hazardous Pharmaceutical Waste	22
2.2.3	How do Pharmaceuticals Enter the Environment?	22
2.3	Reagents Used in Process Development	23
2.3.1	Solvent Utilization	23
2.3.2	Role of Catalysts	25
2.3.3	Pharma Packaging Materials	27
2.4	Process Efficiency Metrics	28
2.4.1	Atom Economy	28
2.4.2	E factor	29
2.4.3	Reaction Mass Efficiency	30
2.4.4	Process Mass Intensity (PMI)	30
2.4.5	Carbon efficiency	31
2.5	Waste Management Practices Across the World	31
2.5.1	Pharmaceutical Industry Wastewater and Its Treatment	31
2.5.2	Case studies	36
2.6	Conclusion	49
	References	49
Chapter 3	Recoverable Polymer-supported DMAP Derivatives	53
	<i>Christopher E. Hobbs</i>	
3.1	Introduction	53
3.2	History	54
3.3	Recovery Strategies of Soluble Polymer-supported Species	54
3.4	DMAP	57
3.4.1	DMAP Preparation	57
3.4.2	Insoluble Polymer-supported DMAP	58
3.4.3	Soluble Polymer-supported DMAP	59
3.5	Polymer-supported DBU	64
3.6	Polymer-supported TBD	66
3.7	Conclusion	68
	References	69
Chapter 4	Synthesis of Atorvastatin	72
	<i>Martin Edward Fox</i>	
4.1	Introduction	72
4.2	Medical Chemistry Route	73
4.2.1	Synthetic Strategy	73

<i>Contents</i>	xiii
4.2.2 Synthesis of Pyrrole Unit	74
4.2.3 Elaboration of Aldehyde Intermediate 12 to Atorvastatin	75
4.3 Process Development Route	76
4.3.1 Synthetic Strategy	76
4.3.2 Synthesis of 1,4-Diketone Component 18	77
4.3.3 Synthesis of Amine Side-chain Component 19	77
4.3.4 Paal–Knorr Reaction and Downstream Steps	82
4.4 The Final Manufacturing Route Involving Non-hazardous Reagents	83
4.4.1 Strategy	83
4.4.2 1,4-Diketone Component 18	83
4.4.3 Side-chain Component 19	84
4.4.4 Endgame	85
4.5 Conclusions	86
Acknowledgements	87
References	87
Chapter 5 Synthesis of Raloxifene	90
<i>Jaya Pandey</i>	
5.1 Synthesis of Raloxifene	90
5.2 Importance of Raloxifene	91
5.3 First-generation Synthesis	92
5.4 Second-generation Synthesis	94
5.5 Third-generation Synthesis	96
5.6 Transitioning from Hazardous to Non-hazardous Reagent Use	98
5.7 Conclusion	99
Acknowledgements	100
References	101
Chapter 6 Synthesis of Montelukast	102
<i>M. Saravanan, E. R. R. Chandrasekhar, Vilas H. Dahanukar and Rakeshwar Bandichhor</i>	
6.1 Introduction	102
6.2 Medicinal Chemistry Route	103
6.2.1 Synthetic Strategy	103
6.2.2 Synthesis of Diol Intermediate 13	103
6.2.3 Synthesis of Thiol Acid (20)	105
6.2.4 Synthesis of Montelukast (free acid of 1)	105

6.3	Process Development Route	105
6.3.1	Synthetic Strategy	105
6.3.2	Synthesis of Diol 13 and Thiol Acid 20	108
6.3.3	Synthesis of Montelukast Sodium 1 from 13 and 20	108
6.4	Final Manufacturing Route Involving Non-hazardous Reagents	109
6.4.1	Synthetic Strategy	109
6.4.2	Synthesis of Diol Intermediate	109
6.4.3	Synthesis of Montelukast Sodium 1	113
6.5	Summary	115
	Acknowledgements	115
	References	115
Chapter 7	Development of a Safe, Scalable, Azide-free Synthesis of 1-Aryl-1H-tetrazoles Using Diformylhydrazine	118
	<i>Sivaraj Ramasamy, Thirumalai Lakshminarasimhan, Jayaprakash Karamil, Sabuj Mukherjee and Manjunath Gujjar</i>	
7.1	Introduction	118
7.2	Results and Discussion	121
7.3	Conclusion	125
7.4	Representative Procedure	127
	Acknowledgements	127
	References	127
Chapter 8	New Directions from Academia	130
	<i>Manavi Yadav, Sriparna Dutta and Rakesh Kumar Sharma</i>	
8.1	Introduction	130
8.2	Green Chemistry: A Functional Approach Winning Industrial Support	133
8.3	Need for Academia–Industry Collaborations in the Current Scenario	133
8.4	Impediments to Collaboration	135
8.5	Keys to a Successful Collaboration	136
8.6	Greening of Industries: Promoting Newer and Greener Methodologies from Academia	137
8.7	Benefits of Greening Industries	139
8.8	Innovations Stemming from Academia–Pharma Collaborations	140

<i>Contents</i>	xv
8.8.1 Academic Contribution to Drug Discovery	140
8.8.2 Design and Development of Novel Pathways for Pharmaceutical Industries	149
8.9 Redefining the Operational Methods of Global Industries Towards Sustainability	157
8.9.1 Green Solvents	157
8.9.2 Next-generation Catalyst Design	158
8.9.3 Microwave-assisted Synthesis	159
8.9.4 Flow Chemistry	160
8.10 Conclusion	161
References	162
Subject Index	168
