Road Vehicle Technologies and Fuels	1
<i>A. Tsolakis, M. Bogarra and J. Herreros</i>	
1 Background	2
1.1 Fuels and Pollutants Emitted	3
2 Compression Ignition Engines	4
3 Spark Ignition Engines	5
4 Fuels for Transportation	8
4.1 Fuel Properties	8
4.2 Alternative Fuels	9
5 Market Share	14
6 Future Trends	16
6.1 Advanced Combustion Strategies	16
6.2 Cylinder Deactivation	18
6.3 Variable Compression Ratio	19
6.4 Variable Valve Actuation and Atkinson–Miller Cycles	19
6.5 Stop–Start	20
References	20
Gaseous and Particle Greenhouse Emissions from Road Transport	25
<i>M. Lapuerta, J. Rodríguez-Fernández and J. M. Herreros</i>	
1 Introduction	25
2 Carbon Dioxide Emissions	27
3 Methane Emissions	31
4 Nitrous Oxide Emissions	32

5	Equivalent Carbon Dioxide Emissions	33
6	Particle Emissions	37
7	Future Trends	39
	References	42
	Local-acting Air Pollutant Emissions from Road Vehicles	46
	<i>Qingyang Liu and James J. Schauer</i>	
1	Introduction	47
2	Fuel Type, Fuel Quality, and Vehicle Technology	48
2.1	Fuel Sulfur Reduction	48
2.2	Fuel Additives, Including Tetraethyl-lead, Methylcyclopentadienyl Manganese Tricarbonyl, and Lube Oil Additives	49
2.3	Tailpipe NO _x , CO, VOCs, and PM Emission Related to the Combination of Technology and Fuel	49
2.4	After-treatment Controls for Modern Vehicles	51
2.5	Fugitive VOC Emissions from Vehicles	52
2.6	Non-tailpipe PM Emissions from Vehicles	53
2.7	Electric and Fuel Cell Vehicles	53
3	Evolution of Roadway Emissions	54
3.1	Primary and Secondary Pollutants	54
3.2	Changes in Pollutant Concentrations Downwind of Roadways	55
3.3	Key Air Pollutants Associated with Roadway Emissions	57
4	Impacts on Human Health	60
4.1	Health Impacts of Near-roadway Exposures and Urban Air Pollution from Traffic Emissions	60
4.2	The Contributions of Mobile Sources to PM and O ₃ in Cities around the World	63
5	Impacts on the Natural and Built Environments	65
6	Impacts on Remote Sites	68
7	Global Trends in Emissions	71
8	Future Technologies and Projected Trends	74
	Acknowledgements	77
	References	77
	Water and Soil Pollution Implications of Road Traffic	86
	<i>Ashantha Goonetilleke, Buddhi Wijesiri and Erick R. Bandala</i>	
1	Introduction	87
2	Primary Pollutants from Road Traffic	88
2.1	Pollutant Sources	88
2.2	Influential Factors in Pollutant Generation	89
2.3	Primary Pollutants	92

<i>Contents</i>	ix
3 Pollutant Processes	94
3.1 Pollutant Build-up	95
3.2 Pollutant Wash-off	96
3.3 Impact of Climate Change on Pollutant Processes	97
3.4 Pollutant–Particulate Relationships and Mobility of Particle-bound Pollutants	99
4 Impacts of Traffic Pollutants	100
5 Conclusions	101
References	103
Cardiovascular Health Effects of Road Traffic Noise	107
<i>Anna Hansell, Yutong Samuel Cai and John Gulliver</i>	
1 Introduction	107
1.1 Biological Mechanisms	108
2 Assessment of Traffic Noise Exposure in Epidemiological Studies	110
3 Health Studies of Cardiovascular Disease in Adults	115
3.1 Hypertension	115
3.2 Cardiovascular Disease Incidence, Morbidity and Mortality	118
3.3 Cardiovascular Risk Factors	122
3.4 Further Factors to Consider in the Interpretation of Epidemiological Studies: Confounding and Effect-modifying Factors	125
4 Conclusions	126
Acknowledgements	126
References	127
Environmental Impact of Hybrid and Electric Vehicles	133
<i>Billy Wu and Gregory J. Offer</i>	
1 Introduction	134
2 Energy Storage and Conversion Technologies	138
3 Hybrid Vehicles	141
4 Impact of Different Usage Cases	142
5 Life Cycle Assessment	145
5.1 Battery Utilisation	147
5.2 Vehicle-to-grid	148
5.3 Battery Lifetime and Degradation	149
5.4 Recycling and Second Life	151
6 Conclusion	152
References	153

Development Implications for Malaysia: Hydrogen as a Road Transport Fuel	157
<i>Angelina F. Ambrose, Rajah Rasiah and Abul Quasem Al-Amin</i>	
1 Introduction	158
2 Energy Demand, Economic Growth and CO ₂ Emissions	158
3 Hydrogen Fuel Cell Vehicles and Hydrogen Pathways	161
4 Concepts in Fostering Hydrogen in Transportation	162
5 Simulation Experiments	164
5.1 Dynamic Computable General Equilibrium Model	164
5.2 Malaysian Social Accounting Matrix	165
5.3 Model Specifications	165
6 Scenarios and Results	167
7 The Way Forward	171
References	173
Latest Trends and New Challenges in End-of-life Vehicle Recycling	174
<i>Jeongsoo Yu, Shuoyao Wang, Kosuke Toshiki, Kevin Roy B. Serrona, Gengyao Fan and Baatar Erdenedalai</i>	
1 Introduction	175
2 Legislation on End-of-life Vehicle Recycling and Its Implications	175
2.1 Background on the Evolution of Legal Systems	175
2.2 Comparison of EPR-based ELV Recycling Laws	176
3 Popularization of Next-generation Vehicles and Their Impact on Vehicle Recycling	180
3.1 Significant Developments in the Popularization of Next-generation Vehicles	180
3.2 Trends in NGV Popularization	181
3.3 Effective Utilization of Waste Batteries from Next-generation Vehicles	184
3.4 Limitations on the Reuse and Recycling of Batteries	185
4 Effects of Second-hand Vehicle Exportation on International Resource Circulation and Emerging Cross-border Environmental Problems	186
4.1 The Two Sides of Second-hand Vehicle Exportation	186
4.2 Conditions and Characteristics of Second-hand Vehicle Exportation in Japan	187
4.3 Analysis of the Condition of Second-hand Vehicle Imports in Mongolia	190
4.4 Effect of Second-hand Vehicle Imports on Resource Recycling and the Environment	192

5	Environmental Pollution Caused by Improper End-of-life Vehicle Processing in Developing Countries: A Case Study on Lead Battery Recycling in Mongolia	197
5.1	Potential of Serious Environmental Damage	197
5.2	Overview of Field Investigations and Their Results	198
5.3	Challenges from a Case Study	204
6	Environmental Problems Associated with the Proliferation of Used Vehicles in Metro Manila, Philippines	205
6.1	Current State of Used Vehicles in the Philippines	205
6.2	Existing Legislation	206
6.3	Current Proposals to Undertake ELV Recycling	207
6.4	Future of ELV Recycling in Metro Manila	207
6.5	Challenges in Undertaking ELV Recycling in the Philippines	208
7	Recommendations and Challenges for the Future	208
	Notes and References	209
	Life Cycle Assessment of Road Vehicles	214
	<i>Michel Vedrenne, Javier Pérez, María Encarnación Rodríguez, Julio Lumbreras and Rafael Borge</i>	
1	Life Cycle Assessment: A General Concept	214
1.1	Definition of the Goal and Scope of the Assessment	215
1.2	Life Cycle Inventory	216
1.3	Life Cycle Impact Assessment	217
1.4	Interpretation of Results and Conclusions	218
2	Life Cycle Analysis: Review of the State-of-the-art	219
3	Life Cycle Analysis of Road Vehicles	220
3.1	Material Life Cycle of Vehicles	222
3.2	Fuel Life Cycle of Vehicles	224
3.3	Vehicle Use Phase	230
4	Uncertainties and Limitations	233
5	Practical Example of Life Cycle Assessment: Comparison of Fuel Types for Cars	234
6	Life Cycle Assessment and the Role of the Road Transport Sector in Urban Air Quality	236
7	Concluding Remarks	238
