Chapter 1 Catalysts for Co-processing Biomass in Oil Refining Industry	1
<i>Eduardo Falabella Sousa-Aguiar, Vitor Loureiro Ximenes, João Monnerat Araujo Ribeiro de Almeida, Pedro Nothaft Romano and Yuri Carvalho</i>	
1.1 Introduction	1
1.2 Bio-oil in FCC	5
1.3 Co-processing in Hydrotreating Units	13
1.4 Co-processing Bio-oil in HDT Units	14
1.5 Conclusions	20
References	21
Chapter 2 Catalytic Processes and Catalyst Development in Biorefining	25
<i>Oxana P. Taran, Nikolay V. Gromov and Valentin N. Parmon</i>	
2.1 Introduction	25
2.2 Lignocellulose Composition	27
2.3 Catalytic Processes of Biomass Deconstruction to Produce Upgradable Gaseous and Liquid Platforms	28
2.3.1 Thermochemical Conversion of Biomass	29
2.3.2 Liquid-phase Methods	34
2.4 Catalytic Processes for Upgrading Deconstructed Biomass to Useful Fuels and Chemicals	41
2.4.1 Synthesis Gas	41
2.4.2 Bio-oil	42

2.4.3	Sugars	45
2.4.4	Furfurals and Levulinic Acid	47
2.5	Conclusions	52
	Acknowledgements	54
	References	54
Chapter 3	Catalysts for Depolymerization of Biomass	65
	<i>Nikolay V. Gromov, Oxana P. Taran and Valentin N. Parmon</i>	
3.1	Introduction	65
3.2	Solid Catalysts for the Depolymerization of Lignocellulose Biomass	67
3.2.1	Resins	68
3.2.2	Carbon Based Catalysts	69
3.2.3	Zeolites and Silicates	72
3.2.4	Oxides	74
3.2.5	Heteropoly Acids	78
3.2.6	Micellar and Nanosized Catalysts	79
3.2.7	Other Catalysts	80
3.2.8	Influence of Reaction Conditions and Target Products on the Choice of a Promising Catalyst	81
3.3	Reaction Mechanisms	82
3.4	Auxiliary Methods for Lignocellulose Depolymerization	85
3.5	Conclusions	89
	Acknowledgements	90
	References	90
Chapter 4	Advances in Catalytic Processes of Microalgae Conversion into Biofuels and Chemicals	98
	<i>Ronghong Lin, Congjun Wang, Ping Wang, Yuhua Duan, Dirk Link, Bryan Morreale and Fan Shi</i>	
4.1	Introduction	98
4.2	Hydrothermal Liquefaction (HTL) of Microalgae to Bio-crude Oil	101
4.2.1	Development of HTL of Microalgae to Liquid Fuel	102
4.2.2	Microalgae Conversion Under HTL Conditions	103
4.2.3	Effect of Catalysts and HTL Conditions on Bio-crude Oil Properties and Yields	105
4.3	Catalytic Conversion of Microalgae Extracts	110
4.3.1	Catalytic Transesterification of Microalgal Lipids to Produce Biodiesel	110

4.3.2	Catalytic Upgrading of Microalgal Oil to Produce Green Transportation Fuels	118
4.3.3	Catalytic Upgrading of Bio-crude Oil	122
4.3.4	Catalytic Reforming of Glycerol	124
4.4	Computational Simulation of Model Feedstock	126
4.4.1	Transesterification and Hydrolysis of Algae Oil to Biodiesel	127
4.4.2	Conversion to Hydrocarbons by Decarboxylation and Hydrodeoxygenation	129
4.4.3	Conversion to Short Chain-length Fuel by Hydroisomerization and Hydrocracking	132
4.5	Conclusions	134
	Disclaimer	135
	References	136
Chapter 5	Catalysts for Biofuels Production	144
	<i>Leone Frusteri, Giuseppe Bonura and Siglinda Perathoner</i>	
5.1	Novel Catalytic Technologies for Biofuels Production	144
5.2	Transesterification of Vegetable Oils	145
5.2.1	Solid Acid Catalysts	146
5.2.2	Heterogeneous Base Catalysts	153
5.3	Hydrotreating of Bio-oils	160
5.3.1	Catalysts for Vegetable/Algal Oil Hydroconversion	162
5.4	Biomass Thermochemical Conversion to Liquid Fuels	164
5.4.1	Catalysts for Pyrolysis Oil Hydroconversion	166
5.5	Comparison of Technology: Potential of Raw Materials, Costs and Barriers for Large-scale Development	170
5.6	Final Remarks	172
	References	173
Chapter 6	Catalytic Upgrading of Bio-oils	181
	<i>B. Pawelec, R. M. Navarro and J. L. G. Fierro</i>	
6.1	Introduction	181
6.2	Bio-oil Upgrading: General Characteristics	183
6.3	Catalytic Valorization of Bio-oils	184
6.3.1	Cracking of Bio-oil Products	185
6.3.2	Cracking of Triglyceride-type Compounds	186

6.3.3 Catalytic Deoxygenation (HDO)	188
6.3.4 Esterification	199
6.4 Conclusions	199
Acknowledgements	200
References	200
Chapter 7 Noble Metal Based Bimetallic Catalysts for the Catalytic Hydrotreatment of Phenolic Model Components for (Pyrolytic) Lignins	206
<i>W. Yin, A. Kloekhorst, I. Hita and H. J. Heeres</i>	
7.1 Introduction	206
7.1.1 Lignin: General Features and Molecular Composition	206
7.1.2 Pyrolytic Lignin	208
7.1.3 Interesting Biobased Chemicals from Lignin	208
7.1.4 Lignin Conversion Strategies to Obtain Biobased Chemicals	210
7.1.5 Catalytic Hydrotreatment of Lignin	210
7.1.6 Scope of the Current Review	212
7.2 Experimental Studies for Lignin Model Components Using Bimetallic Noble Metal Catalysts	214
7.2.1 Overview for Anisole	214
7.2.2 Overview for <i>m</i> -cresol	219
7.2.3 Overview for Guaiacol	223
7.2.4 Overview for 4-propylphenol	231
7.2.5 Miscellaneous Model Component	234
7.3 Selectivity and Yield Trends for Aromatic Components when Using Bimetallic Noble Metal Catalysts	238
7.4 Conclusions	239
References	239
Chapter 8 Microwaves in the Catalytic Valorisation of Biomass Derivatives	243
<i>Peter Priezel, Javier Eduardo Perez Mejia, Piera Demma Carà and Jose A. Lopez-Sanchez</i>	
8.1 Introduction	243
8.2 Hydrolysis of Biopolymers	245
8.2.1 The Importance of Lignocellulosic Biomass as a Source of Cellulose, Hemicellulose and Lignin	245
8.2.2 Hydrolysis of Cellulose	246

8.2.3 Hydrolysis of Hemicellulose	256
8.2.4 Hydrolysis of Starch	258
8.2.5 Microwave-assisted Lignin Conversion	258
8.3 Catalytic Valorisation of Bioderived Compounds in Microwave Reactors	263
8.3.1 Catalytic Hydrogenation in Microwave Reactors	263
8.3.2 Catalytic Oxidation	270
8.3.3 Catalytic Dehydration: Hydroxymethylfurfural and Furfural Production	272
8.3.4 Esterification and Transesterification	277
8.4 Conclusions	283
Abbreviations	284
Acknowledgements	285
References	285
Chapter 9 Biohydrogen and Biomethane Production	300
<i>Narcis Homs, Daniel Montané and Pilar Ramírez de la Piscina</i>	
9.1 Introduction and Overview	300
9.2 Catalytic Gasification of Biomass in Aqueous Media	302
9.2.1 Catalytic Aqueous-phase Reforming (APR)	304
9.2.2 Catalytic Supercritical Water Gasification (SCWG)	314
9.3 Biomethane and Biosynthetic Natural Gas (Bio-SNG)	322
9.3.1 The Methanation of CO and CO ₂ : Catalysts and Reactors	324
9.3.2 Processes to Biomethane	328
9.3.3 Processes to Produce Bio-SNG	330
9.3.4 Processes for <i>In situ</i> Upgrading Biogas	331
9.4 Conclusion	333
References	334
Chapter 10 Biochar Production, Activation and Application as a Promising Catalyst	340
<i>Shurong Wang, Lingjun Zhu and Zhongqing Ma</i>	
10.1 Introduction	340
10.2 Biochar Production	341
10.2.1 Conventional Pyrolysis (CP)	341
10.2.2 Gasification	342

10.2.3	Microwave Assisted Pyrolysis (MWP)	343
10.2.4	Hydrothermal Carbonization (HTC)	345
10.3	Biochar Activation and Upgrading	348
10.3.1	Physical Activation	349
10.3.2	Chemical Activation	351
10.4	Biochar as Catalyst and Catalyst Support	354
10.4.1	Biochar Used as a Catalyst Directly	354
10.4.2	Biochar-supported Heterogeneous Catalysts	357
10.4.3	Biochar-based Solid Acid Catalyst	359
10.4.4	Biochar-based Electrochemical Catalyst	360
10.4.5	Biochar-based Photocatalyst	361
	Acknowledgements	362
	References	362
	Subject Index	367
