

Contents

Part 1: In-cell NMR Spectroscopy: From 2001 to Now

Chapter 1	In-cell NMR Spectroscopy: From 2001 to Now	3
	<i>Volker Dötsch</i>	
1.1	In-cell NMR – The Basis	3
1.2	Detecting the Molecule of Interest in the Crowded Environment of the Cell	4
1.3	In-cell NMR with Eukaryotic Cellular Systems	6
1.4	The Aims of In-cell NMR	7
	References	7

Part 2: Host Cells for In-cell NMR Studies

Chapter 2	Protein NMR in <i>Escherichia coli</i>	13
	<i>Yansheng Ye and Conggang Li</i>	
2.1	Introduction	13
2.2	Labeling Strategy for Protein NMR in <i>E. coli</i>	13
2.3	Sample Preparations for Protein NMR in <i>E. coli</i>	16
2.4	Protein NMR Structure Determination in <i>E. coli</i>	17
2.5	Protein Interactions in <i>E. coli</i> Characterized by NMR	20
2.6	Protein Stability in <i>E. coli</i> Characterized by NMR	22
2.7	A Bioreactor for Protein NMR in <i>E. coli</i>	22
2.8	Conclusion and Perspectives	24
	References	24

Chapter 3	In-cell NMR in Eukaryotic Cells – I (Introduction from Outside of Cells)	27
	<i>Kohsuke Inomata, Takanori Kigawa and Masahiro Shirakawa</i>	
3.1	Introduction	27
3.2	Delivery Techniques	28
3.2.1	Mechanical Microinjection	29
3.2.2	Cell-penetrating Peptide Tag Delivery System	30
3.2.3	Tag-free Delivery Systems	32
3.3	Applications of In-cell NMR in Eukaryotic Cells using Delivery Techniques	33
3.3.1	<i>Xenopus laevis</i> Oocytes	33
3.3.2	Mammalian Cultured Cells	36
3.4	Conclusions	40
	References	41
Chapter 4	In-cell NMR in Eukaryotic Cells – II (Direct Protein Expression)	45
	<i>Enrico Luchinat and Lucia Banci</i>	
4.1	Introduction	45
4.2	Yeast	46
4.3	Insect Cells	48
4.4	Human Cells: An Overview	49
4.5	Expression in HEK293T Cells	50
4.6	Sample Preparation Protocol	51
4.7	Practical Examples	53
4.8	Targeting to Other Cellular Compartments	55
4.9	Differential Expression and Selective Labelling	57
4.10	Perspective: Stable Inducible Cell Lines	58
	References	59
Part 3: Basic In-cell NMR Techniques		
Chapter 5	Protein Structure Determination in Living Cells from NOE-derived Distance Restraints	65
	<i>Tepei Ikeya, Peter Güntert and Yutaka Ito</i>	
5.1	Introduction	65
5.2	Experimental Procedures	68
5.2.1	Host Cells	68
5.2.2	Labelling Strategy	68

<i>Contents</i>	xi
5.2.3 Rapid <i>n</i> D NMR Measurement and the Reconstruction of Spectra	70
5.2.4 Backbone and Side-chain Resonance Assignment	71
5.2.5 3D NOESYs	75
5.2.6 FLYA-automated Assignment	77
5.3 Structure Determination	79
5.3.1 Conventional Approach for Protein Structure Determination	79
5.3.2 Bayesian Inference-assisted Structure Refinement	80
5.4 Protein 3D Structures in an Intracellular Environment	84
5.5 Perspectives	85
Acknowledgements	86
References	86
Chapter 6 In-cell Structure Determination Using Paramagnetic NMR Spectroscopy	90
<i>Xun-Cheng Su and Thomas Huber</i>	
6.1 Introduction	90
6.2 Paramagnetic Effects and Magnetic Susceptibility Anisotropy	91
6.3 Selection of Paramagnetic Metal Ions	93
6.4 Paramagnetic Tags	93
6.5 Strategies of Site-specific Labeling of Proteins with Paramagnetic Tags	96
6.6 Delivery of Proteins into Cells	97
6.7 Data Analysis	98
6.8 In-cell Structure Determination of Proteins Using GPS-Rosetta with Paramagnetic Restraints	99
6.9 Conclusion	101
References	101
Chapter 7 Bioreactor System for In-cell NMR Observation	103
<i>Noritaka Nishida and Ichio Shimada</i>	
7.1 Introduction	103
7.2 Development of the Bioreactor System	104
7.2.1 Bioreactor System with Mebiol Gel for Cultured Human Cells	104
7.2.2 Other Bioreactor Systems	106

7.3	Applications of the Bioreactor System	108
7.3.1	Protein-Protein Interactions	108
7.3.2	Real-time NMR Observation	111
7.4	Perspective	113
	References	114
Chapter 8	^{19}F In-cell NMR	117
	<i>Yansheng Ye and Conggang Li</i>	
8.1	Introduction	117
8.2	^{19}F Labeling of Proteins and Nucleic Acids for ^{19}F In-cell NMR	117
8.3	^{19}F In-cell NMR Experiments	118
8.4	^{19}F NMR as a Probe of Protein Conformation in Living Cells	119
8.5	^{19}F NMR as a Probe for Protein Dynamics and Interactions in Living Cells	121
8.6	^{19}F NMR as a Probe of Protein Thermodynamics in Cells	125
8.7	^{19}F NMR as a Probe for Nucleic Acid Conformation in Living Cells	127
8.8	Conclusion and Perspective	127
	References	128
Chapter 9	Cellular Solid-state NMR Spectroscopy	131
	<i>Reinier Damman, Siddarth Narasimhan, Markus Weingarth and Marc Baldus</i>	
9.1	Introduction	131
9.2	Experimental	132
9.2.1	Sample Preparation and Isotope Labelling for Bacterial and Mammalian Cells	132
9.2.2	Dynamic Nuclear Polarization (DNP)	135
9.2.3	Proton-detected ssNMR	137
9.2.4	Cellular ssNMR and Complementary Methods	138
9.3	Results and Discussion	141
9.3.1	Bacterial Cell Envelopes	141
9.3.2	Intact Bacterial Cells	143
9.3.3	Human Cells	143
9.4	Conclusions	146
	Acknowledgements	147
	References	147

<i>Contents</i>	xiii
Chapter 10 In-cell EPR	152
<i>Anna Bieber and Malte Drescher</i>	
10.1 In-cell EPR	152
10.2 EPR Spectroscopy	153
10.2.1 Continuous-wave EPR	153
10.2.2 Pulsed EPR and DEER	155
10.3 Experimental Aspects	157
10.3.1 Spin Labels	157
10.3.2 Cell Systems/Labeling/Transfection Methods	160
10.4 Applications	163
References	166
 Part 4: In-cell NMR Applications 	
Chapter 11 In-cell NMR: Spectral Optimization and Population Adjustment by Rational Protein Engineering	173
<i>Jens Danielsson, Fan Yang and Mikael Oliveberg</i>	
11.1 Introduction	173
11.2 Improving a Bad Signal	174
11.3 Differences between Mammalian and Bacterial Cells	175
11.4 In-cell Thermodynamics	176
11.5 Effects and Advantages of Curved Temperature Dependences	182
11.6 The Achilles Heel Is Yet in the <i>In Vitro</i> References: How Physiological Is 'Physiological' Buffer?	184
11.7 Concluding Remarks	184
Acknowledgements	185
References	185
 Chapter 12 Protein Stability and Weak Intracellular Interactions	 188
<i>Alex J. Guseman and Gary J. Pielak</i>	
12.1 Quinary Interactions	188
12.2 Protein Stability	189
12.3 Roles of Weak Interactions	190
12.4 Not All Crowded Solutions Are Physiologically Relevant	191

12.5	Early Observations of Weak Attractive Interactions under Crowded Conditions	191
12.6	Other Qualitative Observations in Cells and Crowded <i>In Vitro</i> Conditions	192
12.7	NMR Studies of Weak Interactions in Cells	196
12.8	Interactions with the Folded State	199
12.9	Interactions with the Unfolded Ensemble	199
12.10	Interactions with Disordered Proteins	200
12.11	Non-NMR Approaches	201
12.12	Next Steps	201
12.13	Conclusions	202
	Acknowledgements	202
	References	202
Chapter 13	Protein Folding, Maturation and Redox State	207
	<i>Enrico Luchinat and Lucia Banci</i>	
13.1	Introduction	207
13.2	Folding and Maturation of Proteins: The Example of Superoxide Dismutase 1	208
13.3	The Role of Molecular Chaperones: A New Role for CCS in Promoting the Maturation of SOD1 Mutants	212
13.4	Regulation of Redox-dependent Protein Folding	216
13.5	Protein Oxidation by External Stimuli	219
13.6	Concluding Remarks	223
	References	224
Chapter 14	All-atom Molecular Dynamics Simulation of Proteins in Crowded Environments	228
	<i>Yuji Sugita and Michael Feig</i>	
14.1	Introduction	228
14.2	Molecular Dynamics Simulations of Crowded Protein Systems	230
14.2.1	Energy Functions Used in MD Simulations	230
14.2.2	Software for Molecular Dynamics Simulations	232
14.2.3	Development of the GENESIS Software Package	233

14.2.4	Modeling of Crowded Protein Systems and Cellular Environments	234
14.3	All-atom MD Simulations of Crowded Protein Systems	235
14.3.1	Conformational Stability of Proteins in Macromolecular Crowding Environments	235
14.3.2	Reduced Protein Diffusion and Transient Cluster Formation in Protein Crowded Systems	238
14.4	All-atom Molecular Dynamics Simulations of Crowded Cellular Environments	239
14.5	Conclusions	242
	References	243
Chapter 15	Primary Drug Screening by In-cell NMR Spectroscopy	249
	<i>Stephen Dansereau, David S. Burz and Alexander Shekhtman</i>	
15.1	Introduction	249
15.2	Direct Target Engagement	251
15.2.1	Complex Targets	251
15.2.2	Drug Screening in Eukaryotic Cells	255
15.2.3	IDP Targets	256
15.3	Indirect Target Engagement	259
15.4	Target Identification by In-cell NMR Spectroscopy	261
15.4.1	Metabolic Pathway Targets	261
15.4.2	Indirect Target Identification	263
15.4.3	Direct Target Identification	265
15.5	Conclusions	267
	References	268
Chapter 16	In-cell NMR Spectroscopy of Nucleic Acids	272
	<i>Simon Dzatko, Radovan Fiala, Robert Hänsel-Hertsch, Silvie Foldynova-Trantirkova and Lukas Trantirek</i>	
16.1	Introduction	272
16.2	In-cell NMR Spectroscopy of Nucleic Acids—General Considerations	273
16.3	The Delivery of Exogenous NA Fragments into the Cellular Interior	276
16.3.1	Delivery of NA into <i>X. laevis</i> Oocytes via Microinjection	276
16.3.2	Delivery of NA into Human Cells	278

16.4	Checks Employed for Assessment of the Quality of In-cell NMR Samples	279
16.5	The NMR Detection-specific Aspects	282
16.5.1	Water Suppression	282
16.5.2	2D NMR Experiments	283
16.5.3	Collection of Distance Restraints	283
16.5.4	^{19}F NMR	284
16.5.5	^{31}P NMR	285
16.6	Overview of Applications of In-cell NMR to NAs	285
16.6.1	Assessment of the Effect of Non-specific Intracellular Factors on the Structure of G-quadruplexes	286
16.6.2	Impact of the Intracellular Environment on Interactions between Ligands and DNA	289
16.6.3	Evaluation of the Stability of DNA i-Motifs <i>In Vivo</i>	291
16.7	Perspectives of In-cell NMR Spectroscopy of NA	292
	Acknowledgements	293
