Part I: Physical and Chemical Properties of Carotenoids

Chapter 1 Structures, Nomenclature and General Chemistry of Carotenoids and Their Esters	3
<i>Antonio J. Meléndez-Martínez, Paula Mapelli-Brahm, Dámaso Hornero-Méndez and Isabel M. Vicario</i>	
1.1 Introduction	3
1.2 Fatty Acids	4
1.2.1 Occurrence in Nature	5
1.2.2 Chemical Structure	5
1.2.3 Nomenclature	7
1.2.4 Physical–Chemical Properties	8
1.2.5 Overview of Biosynthesis	13
1.2.6 Overview of Actions	14
1.3 Isoprenoids	15
1.4 Carotenoids	15
1.4.1 Occurrence in Nature	15
1.4.2 Chemical Structure	17
1.4.3 Nomenclature	31
1.4.4 General Properties and Relation to Some Actions	32
1.5 Association of Carotenoids with Other Molecules	34
1.5.1 Carotenoid Glucosides	34
1.5.2 Carotenoproteins	36
1.5.3 Carotenoid Sulphates	36

1.5.4	Carotenoid Acyl Esters	36
1.5.5	Impact of Association with Other Molecules on the Properties of Carotenoids	40
	References	41
Chapter 2	Carotenoid Assembly in Fruits and Vegetables	51
	<i>Patricia Esquivel, Ralf M. Schweiggert, Tania Chacón-Ordóñez, Christof B. Steingass, Reinhold Carle and Víctor M. Jiménez</i>	
2.1	Introduction	51
2.2	Plastid Morphology During Fruit and Vegetable Development and Ripening	53
2.3	Forms of Carotenoid Deposition in Plastids	55
2.4	Chemical Structures of Carotenoids and Their Locations within Plastidal Structures	58
2.5	Carotenoid Ester Deposition in Selected Plant Material	60
2.5.1	Mamey Sapote (<i>Pouteria sapota</i> [Jacq.] H.E. Moore & Stearn)	60
2.5.2	Goji (<i>Lycium barbarum</i> L.)	61
2.5.3	Papaya (<i>Carica papaya</i> L.)	62
2.5.4	Mango (<i>Mangifera indica</i> L.)	62
2.6	Hypotheses on the Biological Importance of Carotenoid Esterification in Plants	63
	References	64
Chapter 3	Chemical Synthesis of Carotenoid Esters	68
	<i>Veronika Nagy, József Deli and Attila Agócs</i>	
3.1	Introduction	68
3.2	Ester Synthesis for Purification and Structure Elucidation Studies	69
3.3	Synthesis of Esters to Enhance Stability and Bioavailability	73
3.3.1	Carotenoid Esters of Fatty Acids, Hydroxy Acids and Bifunctional Acids	73
3.3.2	Polymeric Esters	77
3.4	Amphipathic Carotenoid Esters	78
3.4.1	Synthesis of Ionic (Charged) Carotenoid Esters	79
3.4.2	Non-charged Hydrophilic Esters	86
3.5	Synthesis of Bifunctional Carotenoid Esters	88
3.5.1	Combination with Other Antioxidants	88
3.5.2	Combination with Porphyrins	99

3.6 Conclusions	103
Abbreviations	103
Acknowledgements	104
References	104

Part II. Carotenoid Biosynthesis and Occurrence of Carotenoid Esters

Chapter 4	General Overview of Carotenoid Biosynthesis	111
	<i>George Britton</i>	
4.1	Introduction	111
4.2	Carotenoids and Isoprenoid Biosynthesis	112
4.2.1	The Isoprenoid Pathway	112
4.2.2	Stages of Carotenoid Biosynthesis	112
4.3	Origin of the Isoprene Unit	113
4.3.1	The Acetate–Mevalonate Pathway	114
4.3.2	Conversion of Mevalonate into Isopentenyl Diphosphate	114
4.3.3	The Mevalonate-independent Pathway to IDP	114
4.4	Formation of Geranylgeranyl Diphosphate	115
4.5	Formation of Phytoene	116
4.6	Desaturation	117
4.7	Cyclisation	119
4.8	Hydroxylation	123
4.8.1	Hydroxylation at C(3)	123
4.8.2	Introduction of Hydroxy and Keto Groups at Other Positions	124
4.9	Later Reactions	125
4.9.1	Epoxidation	125
4.9.2	Formation of Other End Groups	125
4.9.3	Esterification	126
4.10	Carotenoid Breakdown Products	126
4.10.1	Apocarotenoids	126
4.10.2	Carotenoid Cleavage Enzymes	127
4.10.3	Saffron and Bixin	128
4.11	Regulation in Higher Plants	128
4.11.1	Environmental, Nutritional and Developmental Factors	128
4.12	Regulation in Algae	130
4.13	Enzymes	130
4.14	Conclusions	132
	References	132

Chapter 5	Biosynthesis and Esterification of Carotenoids During Fruit Ripening	137
	<i>M. J. Rodrigo and L. Zacarías</i>	
5.1	Fruit Classification Regarding Carotenoid Composition and Occurrence of Carotenoid Esters	137
5.2	Main Pattern of Changes in Carotenoid Composition and Esterification During Fruit Ripening	139
5.3	Carotenoid Pathway in Fruits and Regulation During Ripening	143
5.3.1	Regulation of Carotenoid Accumulation in Fruit	147
5.3.2	Localisation of Carotenoid Ester Biosynthesis	151
5.4	Conclusion	152
	Acknowledgements	153
	References	153
Chapter 6	Occurrence and Metabolism of Carotenoid Esters in Marine Organisms	160
	<i>George Britton</i>	
6.1	Introduction	160
6.1.1	Sources of Carotenoids in Food and Food Chains	160
6.1.2	Isolation and Analysis	161
6.2	Carotenoids and Esters in Algae	162
6.2.1	Long-chain Acyl Esters	162
6.2.2	Acetate Esters	162
6.2.3	Esters of C(19) Hydroxy Carotenoids	163
6.3	Sulphate Esters in Bacteria	164
6.4	Carotenoid Esters in Marine Animals	165
6.4.1	Carotenoid Esters in Fish	166
6.4.2	Carotenoid Esters in Invertebrate Animals	170
6.5	Conclusions	177
	References	178
Chapter 7	Occurrence of Carotenoid Esters in Foods	182
	<i>Dámaso Hornero-Méndez</i>	
7.1	Introduction	182
7.2	Occurrence of Xanthophyll Esters in Food	184
7.2.1	Fruits and Vegetables	185

7.2.2 Wheat (<i>Triticum</i> spp.) and Related Cereals	197
7.2.3 Flowers	198
7.2.4 Animals	201
7.2.5 Human Milk	203
Acknowledgements	277
References	277

Part III. Analytical Methods for Determination of Carotenoid Esters

Chapter 8 Extraction and Cleanup of Xanthophyll Esters	287
<i>Veridiana Vera de Rosso</i>	
8.1 Introduction	287
8.2 Extraction of Carotenoids and Carotenoid Esters	288
8.2.1 Liquid Extraction at Atmospheric Pressure	288
8.2.2 UAE and MAE	290
8.2.3 PEF-assisted Extraction	291
8.2.4 Accelerated Solvent Extraction	291
8.2.5 Supercritical Fluid Extraction	292
8.2.6 Enzyme-assisted Extraction	293
8.2.7 Extraction Using Green Solvents	294
8.3 Cleanup of Carotenoid Extracts for Carotenoid Ester Analysis	295
8.4 Conclusion	299
Acknowledgements	300
References	300
Chapter 9 Separation	304
<i>Daniele Giuffrida</i>	
9.1 Introduction	304
9.2 Separation of Carotenoid Esters by 1D Liquid Chromatography in Food Matrices	305
9.3 Separation of Carotenoid Esters by 2D Chromatography in Food Matrices	312
9.3.1 Carotenoid Ester Separation by Comprehensive Liquid Chromatography	312
9.3.2 Carotenoid Ester Separation by Comprehensive Supercritical Fluid Chromatography × Liquid Chromatography	315

9.3.3	Carotenoid Ester Separation by Offline Multidimensional Chromatography	316
9.4	Carotenoid Ester Separation by 1D Supercritical Fluid Chromatography in Food Matrices	317
	References	319
Chapter 10	Identification of Carotenoids and Carotenoid Esters	322
	<i>Lilian R. B. Mariutti and Adriana Z. Mercadante</i>	
10.1	Introduction	322
10.2	UV/Vis Spectrophotometry	323
10.2.1	Relationship Between Chemical Structure and UV/Vis Characteristics	324
10.2.2	Effect of Solvents	336
10.3	Mass Spectrometry	337
10.3.1	Acquisition of Mass Data	343
10.3.2	Identification by APCI(+)	344
10.4	Conclusions	347
	Acknowledgements	347
	References	348
Chapter 11	Quantification and Method Validation	351
	<i>Fabiane C. Petry and Adriana Z. Mercadante</i>	
11.1	Introduction	351
11.2	Sampling and Sample Preparation	353
11.3	Quantification by LC-UV/Vis Detector	355
11.3.1	Percentage of Area Method	355
11.3.2	External Standard Method	356
11.3.3	Internal Standard Method	359
11.4	Quantification by Liquid Chromatography–Mass Spectrometry	360
11.5	Method Validation	361
11.5.1	Selectivity	362
11.5.2	Trueness and Accuracy	363
11.5.3	Precision	364
11.5.4	Limits of Detection and Quantification	365
11.5.5	Linearity	367
11.5.6	Robustness	368
11.6	Final Remarks	368
	Acknowledgements	368
	References	369

Part IV. Dietary Intake, Digestion, Absorption and Metabolism of Carotenoids and their Esters

Chapter 12	Dietary Intake of Carotenoids: Nutritional Status Assessment and the Importance of Considering Free and Ester Forms in Foods	375
	<i>Begoña Olmedilla-Alonso and Rocío Estévez-Santiago</i>	
12.1	Introduction	375
12.2	Assessment of Carotenoid Dietary Intake	377
12.2.1	Assessment Methods Used in Populations and Individuals	377
12.2.2	Dietary Questionnaires	379
12.2.3	Food Intake and Measurement of Carotenoid Intake	380
12.3	Dietary Carotenoid Intake	382
12.4	Interpretation of Dietary Carotenoid Intake	385
12.5	Conclusions	386
	References	386
Chapter 13	Bioavailability and Metabolism of Carotenoid Esters	390
	<i>Mark L. Failla, Daniele B. Rodrigues and Chureeporn Chitchumroonchokchai</i>	
13.1	Introduction	390
13.2	Digestion and Absorption of Carotenoid Esters and Their Metabolites	395
13.2.1	Bioavailability of Free vs. Esterified Xanthophylls	395
13.2.2	Bioaccessibility of Xanthophyll Esters	403
13.2.3	Intestinal Uptake, Metabolism and Absorption of Xanthophylls	409
13.3	Are Xanthophylls Acylated in Human Tissues?	411
13.4	Final Remarks	415
	Acknowledgements	416
	References	416
Chapter 14	<i>In Vitro</i> Digestion Protocols: The Benchmark for Estimation of <i>In Vivo</i> Data	421
	<i>Antonio Pérez-Gálvez</i>	
14.1	The Application of Good Practices in the Use of the Term ‘Bioavailability’	421

14.1.1	The Need for Splitting the Term 'Bioavailability' into 'Bioaccessibility' and 'Bioactivity': A Practicable Achievement vs. a Paramount Effort	423
14.1.2	Applications of the Bioaccessibility Concept in Food and Nutrition Science	425
14.2	<i>In Vitro</i> Digestion Protocols: The Imitation Game	425
14.2.1	Key Developments in the Design of <i>In Vitro</i> Digestion Protocols	426
14.2.2	Digestion of Lipophilic Compounds or How to Cross the Water Barrier	429
14.2.3	Methods Applied to Measure the Micellarisation of Carotenoids: A Practical Approach	430
14.2.4	The Direction of the Magnitude of <i>In Vitro</i> Digestion Protocols	440
14.3	Conclusions	448
	Acknowledgements	448
	References	448

Part V. Final Remarks

Chapter 15	Carotenoid Esters: Opening New Perspectives and Trends	461
	<i>Adriana Z. Mercadante</i>	
	References	464
Subject Index		466
