Chapter 1	Introduction: Tackling Uncertainty in the Biobased Economy Through Science	1
	<i>P. Morone and F. Govoni</i>	
1.1	Introduction	1
1.2	Proposed Framework of Analysis: Science–Policy and Science–Market Bridges for Reducing Uncertainty	3
1.2.1	Techno-economic Uncertainty	4
1.2.2	Environmental and Social Uncertainty	5
1.2.3	Mapping and Bridging Uncertainty in the Biobased Economy	6
1.3	Uncertainty Map and Book Structure	7
1.4	Conclusions	9
	Acknowledgements	10
	References	10
Chapter 2	Upstream Environmental Assessment	12
	<i>I. Camara-Salim, G. Feijoo and M. T. Moreira</i>	
2.1	Introduction	12
2.1.1	Sugar Sources – Sugar Beet	16
2.1.2	Sugar Sources – Maize	22
2.2	Life Cycle Assessment of Fermentable Sugars	28
2.2.1	Maize and Stover Processing	29
2.2.2	Sugar Beet Processing	30
2.2.3	Selected Environmental Impact Categories	32
2.2.4	Allocation	32

Green Chemistry Series No. 64

Transition Towards a Sustainable Biobased Economy

Edited by Piergiuseppe Morone and James H. Clark

2.3	Results and Discussion	33
2.4	Conclusions	38
	Acknowledgements	39
	References	39
Chapter 3	Downstream Environmental Assessment	44
	<i>K. Lokesh, J. Clark and A. Mathuru</i>	
3.1	Introduction	44
3.2	Literature Review	45
3.2.1	Industrial Best Practice Indicators	47
3.3	Methodology	50
3.3.1	Selection Criteria for LCA Complementary Efficiency Indicators	50
3.3.2	Conventional LCA Indicators	51
3.3.3	Novel and Existing Efficiency and Circular Metrics	52
3.3.4	LCA of STAR-ProBio Case Studies	58
3.3.5	Goal, Scope and Functional Unit	60
3.3.6	Process Description	61
3.3.7	Scenario Description	61
3.3.8	Packaging Films	61
3.4	Result Interpretations: Gate-to-gate Impact and Resource Efficiency	68
3.4.1	Sensitivity Study: The Impact of Resource Efficiency and Waste Minimisation Strategies	73
3.5	Conclusion	75
	Acknowledgements	76
	References	76
Chapter 4	Techno-economic Sustainability Assessment: Methodological Approaches for Biobased Products	80
	<i>D. Briassoulis, A. Koutinas, J. Gołaszewski, A. Pikasi, D. Ladakis, M. Hiskakis and M. Tsakona</i>	
4.1	Introduction	80
4.1.1	Techno-economic Sustainability Analysis	80
4.2	Techno-economy Sustainability Analysis Methodology for Renewable Feedstock Resources Used for Biobased Products	83
4.2.1	Natural Renewable Resources – Introduction	83
4.2.2	Objectives	88

4.2.3	Methodological Approach to Resource Use in TESA	88
4.2.4	Recapitulation	97
4.3	Techno-economy Sustainability and Analysis Methodology for Conversion Routes of Renewable Feedstock Resources to Biobased Products	98
4.3.1	Methodology Development	98
4.3.2	System Boundaries	104
4.3.3	Scope of the Techno-economic & Sustainability Assessment	105
4.3.4	TESA Principle, Criteria & Indicators	105
4.4	Techno-economy Sustainability Analysis Methodology for Alternative EoL Options for Post-consumer Biobased Products	109
4.4.1	Methodology	109
4.4.2	TESA Criteria for Alternative EoL Options for Post-consumer/Post-industrial Biobased Products	113
	Acknowledgements	123
	References	124
Chapter 5	Market Assessment	133
	<i>L. Ladu and S. Wurster</i>	
5.1	Introduction	133
5.2	Sustainability Transition Towards a Biobased Economy	134
5.2.1	Sustainability Transition in Sociotechnical Regimes	134
5.2.2	Quality Infrastructure and Sustainability Assessment Schemes	137
5.2.3	User Acceptance	138
5.2.4	User Acceptance in Transition Processes	139
5.3	Importance of Sustainability Criteria and Research Gaps	139
5.3.1	Fundamental Characteristics of Relevance for Consumers of Sustainable Biobased Products	140
5.3.2	Environmental Topics of Relevance for Consumers of Sustainable Biobased Products	141

- 5.3.3 Social and Economic Criteria of Relevance for Consumers of Sustainable Biobased Products 142
- 5.3.4 Research Gaps Regarding Sustainability Assessment Schemes for Biobased Products 144
- 5.4 Research Methodology 145
- 5.5 End Consumers' and Professionals' Sustainability Preferences 147
 - 5.5.1 Propensity to Buy Biobased Products and Importance of Specific Kinds of Information for the Buying Decisions 147
 - 5.5.2 Preferences Regarding Environmental Aspects 150
 - 5.5.3 Preferences Regarding Social and Economic Aspects 151
- 5.6 Relevance of Sustainability Certification 154
- 5.7 Additional Important Factors for Buying Decisions 155
- 5.8 Market Assessment for Specific Products 156
- 5.9 Conclusions and Outlook 159
- Acknowledgements 161
- References 161

Chapter 6 Social Assessment 166

E. Imbert and P. M. Falcone

- 6.1 Introduction 166
- 6.2 Methodology 168
 - 6.2.1 Main Features 168
 - 6.2.2 Measurement Challenges 170
- 6.3 S-LCA Applied to Bio-based Products: A General Framework 171
 - 6.3.1 Stakeholder Engagement in Social Sustainability Studies 174
- 6.4 Results and Discussion 175
 - 6.4.1 Stakeholder Identification and Classification 175
 - 6.4.2 Stakeholders Mapping According to Their Power and Interest 176
 - 6.4.3 Stakeholders Validation of Social Impact Categories, Subcategories and Indicators 180
- 6.5 Conclusions 184
- Acknowledgements 185
- References 185

<i>Contents</i>	xi
Chapter 7 Indirect Land Use Change and Bio-based Products	192
<i>D. Marazza, E. Merloni and E. Balugani</i>	
7.1 Traditional and Novel Uses of Land	192
7.2 Direct and Indirect Land Use Changes	193
7.3 Evidence of iLUC Effects	197
7.4 Consequences and Magnitude of the LUC	199
7.5 Assessment of LUC Impacts	202
7.5.1 LUC Impacts and the Time Dimension	202
7.5.2 Food vs. Fuel Debate	204
7.6 iLUC Assessment and Related Uncertainties	205
7.6.1 Economic Equilibrium Models	206
7.6.2 Causal Descriptive Models	208
7.6.3 Uncertainties Related to Existing Models	210
7.6.4 The Renewable Energy Directive RED II: An Example of Normative Framework	212
7.7 The STAR-ProBio Approach: The SydiLUC Model	215
7.8 Conclusion	218
Acknowledgements	219
References	219
Chapter 8 Conclusions	223
<i>J. H. Clark</i>	
Acknowledgements	225
References	225
