

# Contents

<b>Chapter 1</b>	<b>History and Current Status of Droplet Microfluidics</b>	<b>1</b>
	<i>C. Ren and A. Lee</i>	
1.1	Introduction	1
1.1.1	Single-phase Microfluidics	1
1.1.2	Challenges of Single-phase Microfluidics	3
1.1.3	Emergence of Droplet Microfluidics	6
1.2	Challenges and Opportunities of Droplet Microfluidics and Motivation of this Book	8
1.2.1	Interdisciplinary Nature	8
1.2.2	Technological Improvements Towards an Enabling Tool	9
1.3	Summary	11
	References	12
<b>Chapter 2</b>	<b>Fundamentals</b>	<b>15</b>
	<i>N. Qin</i>	
2.1	Introduction	15
2.2	Basic Concepts of Capillarity	17
2.2.1	Interface and Contact Angle	17
2.2.2	Interfacial (and Surface) Tension	18
2.2.3	Young's Equation, Wettability and Wetting	21
2.2.4	Young–Laplace Equation and Capillary Pressure	22

---

Soft Matter Series No. 12

Droplet Microfluidics

Edited by Carolyn Ren and Abraham Lee

© The Royal Society of Chemistry 2021

Published by the Royal Society of Chemistry, [www.rsc.org](http://www.rsc.org)

2.3	Dimensionless Numbers in Microfluidics	23
2.3.1	Dimensionless Numbers of Forces	23
2.3.2	Dimensionless Numbers of Mass Transfer	25
2.3.3	Other Dimensionless Numbers	26
2.4	Droplet Generation in Microfluidics	27
2.4.1	Common Geometrical Generators	27
2.4.2	External Forces Based Active Methods	32
2.5	Size Scaling of Generated Droplets	32
2.6	Hydrodynamics of Taylor-type Droplets in Microchannels	34
2.6.1	Thin Films in Capillaries and Square Microchannels	34
2.6.2	Pressure Drops of Droplets Flowing in Microchannels	36
2.6.3	Moving Speeds of Droplets	38
2.6.4	Flow Fields Within Droplets	38
2.7	Conclusion	41
	References	41
<b>Chapter 3</b>	<b>Technological Development – Droplet as a Tool</b>	<b>45</b>
	<i>Adrian J. T. Teo, Say Hwa Tan and Nam-Trung Nguyen</i>	
3.1	Introduction	45
3.2	Active Droplet Generation	46
3.2.1	Electrical Control	47
3.2.2	Magnetic Control	50
3.2.3	Thermal Control	51
3.2.4	Pneumatic Control	52
3.2.5	Piezoelectric Control	55
3.3	Active Droplet Sorting	56
3.3.1	Electrical Control	58
3.3.2	Magnetic Control	61
3.3.3	Thermal Control	63
3.3.4	Pneumatic Control	64
3.3.5	Acoustic Control	66
3.4	Active Droplet Coalescence	71
3.4.1	Electric Control	72
3.4.2	Magnetic Control	75
3.4.3	Thermal Control	77
3.4.4	Pneumatic Control	78
3.4.5	Acoustic Control	79
3.4.6	Optical Control	80
3.5	Conclusion	82
	References	83

<b>Chapter 4</b>	<b>Droplet Gene Analysis – Digital PCR</b>	<b>89</b>
	<i>Emilis Gegevicus, Karolis Goda and Linas Mazutis</i>	
4.1	Introduction	89
4.2	Droplet Digital PCR Workflow	95
4.3	Fluorophores for ddPCR Applications	97
4.4	Surfactants – Droplet Stabilizing Agents	98
4.5	Molecular Adsorption/retention	100
4.6	Template Preparation	102
4.7	Multiplex Assays	102
4.8	Commercial Droplet Digital PCR Systems	104
4.8.1	Bio-Rad QX200	105
4.8.2	RainDrop <i>Plus</i>	105
4.8.3	Stilla Technologies' Naica	106
4.8.4	Comparison of Commercial Systems	106
4.9	Droplet Digital PCR Applications	107
4.10	Emerging Alternative Techniques	111
	References	112
<b>Chapter 5</b>	<b>Microfluidic Applications in Single-cell Genomic, Transcriptomic and Proteomic Analysis</b>	<b>122</b>
	<i>Dalia Dhingra, Aik Ooi, Pedro Mendez, Shu Wang, Saurabh Gulati, Adam Sciambi and David Ruff</i>	
5.1	Introduction	122
5.1.1	Single-cell Analysis in Biology	122
5.1.2	Single-cell Analysis in Cancer	123
5.1.3	Microfluidics Overview	124
5.2	Genomic DNA Applications: SNV and CNV Detection	125
5.2.1	Overview	125
5.2.2	Workflow	126
5.2.3	Examples of Data and Conclusions	127
5.3	Genomic DNA and Protein Applications	127
5.3.1	Overview	127
5.3.2	Introduction	129
5.3.3	Simultaneous Measurement of Cell Surface Proteins and Genotypes in Single Cells	131
5.4	Genomic DNA and RNA Applications	134
5.4.1	Overview	134
5.4.2	Fusion Transcript Detection	134
5.4.3	Gene Expression	136
5.4.4	Summary	138
5.5	Genomic DNA, RNA and Protein Multimodal Applications	138

5.5.1	Introduction	138
5.5.2	Workflow Overview	141
5.5.3	Experimental and Target Details	141
5.5.4	Results Summary	142
5.5.5	Conclusions	145
5.6	Concluding Remarks	145
	References	145
<b>Chapter 6</b>	<b>The Drop-screen for Biological Functional Assay</b>	<b>147</b>
	<i>Shih-Chung Wei, Myat Noe Hsu and Chia-Hung Chen</i>	
6.1	Introduction	147
6.2	Droplet Multiplexed Enzyme Assays	149
6.2.1	Proteolytic Activity Matrix Analysis	149
6.2.2	Pico-injection	151
6.2.3	Multiplexed Assay	152
6.3	Microfluidic Single-cell Biology	155
6.3.1	Single-cell Enzyme Profiling	155
6.3.2	Tumor Profiling	160
6.3.3	Rare Cancer Cell Assay	161
6.3.4	Liquid Biopsy Leukocyte Assay	163
6.4	Smart Hydrogel Microfluidics	164
6.4.1	Hydrogel Sensor	164
6.4.2	Hydrogel Design	165
6.4.3	Immunosensing	166
6.4.4	Single-cell Immunoassay	167
6.4.5	Plasmonic Sensing	167
6.4.6	Droplet Sorting	170
6.5	Current Limitations and Future Development	170
6.6	Summary	171
	References	172
<b>Chapter 7</b>	<b>Application in Single-cell Functional Analysis</b>	<b>175</b>
	<i>Xiaoming Chen and Weian Zhao</i>	
7.1	Introduction	175
7.2	Applications in Single-cell Functional Analysis Using Droplet Microfluidics	177
7.2.1	Cell Activation and Secretion	177
7.2.2	Cell–Cell Interaction	180
7.2.3	Screening Antigen-specific T Cells or B Cells	182
7.3	Challenges in Single-cell Functional Analysis Using Droplet Microfluidics	185
7.3.1	Single-cell Encapsulation in Droplets	185
7.3.2	Sensitive Detection of Fluorescent Cells/Beads	186

7.3.3 Droplet Sorting Throughput	187
7.3.4 Single-cell Recovery	187
7.4 Conclusion and Future Perspectives	188
Abbreviations	188
Acknowledgements	189
References	189
<b>Chapter 8 Droplet Microfluidics: Applications in Synthetic Biology</b>	<b>193</b>
<i>Samuel R. Little, James M. Perry, Kenza Samlali and Steve C. C. Shih</i>	
8.1 Introduction	193
8.1.1 Synthetic Biology	193
8.1.2 Design–Test–Build–Learn	194
8.1.3 Automation and the Age of the Biofoundry	195
8.1.4 Droplet Microfluidics	196
8.2 Building	196
8.2.1 <i>De novo</i> Oligo Synthesis	197
8.2.2 Amplification	198
8.2.3 Assembly	199
8.2.4 Gene Delivery Methods	200
8.2.5 Application: Mammalian Genetic Editing Pipelines	202
8.2.6 Application: Building Synthetic Cells	203
8.2.7 Microfluidic Automation of the Build Process	203
8.3 Testing in Droplets	205
8.3.1 High-throughput Single-cell Screening and Its Applications: Single-cell Encapsulation	205
8.3.2 Library Sequencing	207
8.3.3 Other Analytical Techniques for Detection	208
8.3.4 Application: Directed Evolution	209
8.3.5 Testing to Complete the Loop	210
8.4 Learning and Outlook	211
8.4.1 Learning	211
8.4.2 Application: DNA Storage	212
8.5 Discussion and Future Recommendations	213
References	214
<b>Chapter 9 Tissue Engineering and Analysis in Droplet Microfluidics</b>	<b>223</b>
<i>Nan Shi, Md Moniruzzaman and Christopher J. Easley</i>	
9.1 Introduction	223
9.1.1 Tissue Engineering	224
9.1.2 Microscale Tissue Engineering	225

9.1.3	Analysis of Tissues at the Microscale	227
9.1.4	Use of Droplet Microfluidics in Engineering and Analysis of Tissue	228
9.2	Cell and Tissue Culture	229
9.2.1	Cell and Tissue Culture Fundamentals	230
9.2.2	Off-chip Cell and Tissue Culture	231
9.2.3	On-chip Cell and Tissue Culture	232
9.2.4	Droplet-enabled Cell and Tissue Culture	235
9.3	Small-volume Bioanalysis	236
9.3.1	Off-chip Analysis with Standard Approaches	237
9.3.2	Modular Analysis with Droplet-based Techniques	239
9.3.3	Fully Integrated Analysis On-chip	240
9.3.4	Integrated Droplet-based Analysis of Cells and Tissues	243
9.4	Recent Applications in Tissue Engineering and Analysis with Droplet Microfluidics	246
9.4.1	Hepatocytes	246
9.4.2	Pancreatic Islets	247
9.4.3	Adipose Tissue	249
9.4.4	Neuronal Tissue	250
9.5	Conclusions and Future Outlook	252
9.5.1	Summary of this Chapter	252
9.5.2	Challenges and Future Directions	252
	References	253

**Chapter 10 Emulsion Drops as Templates for the Fabrication of Microparticles and Capsules** **261**  
*E. Amstad*

10.1	Fabrication of Calibrated Reagent-loaded Emulsion Drops	261
10.2	Drop Stability	264
10.3	Production of Particles from Single Emulsion Drops	265
10.3.1	Covalently Crosslinked Microparticles	265
10.3.2	Ionically Crosslinked Microparticles	267
10.3.3	Physically Crosslinked Microparticles	269
10.4	Fabrication of Non-spherical Particles	269
10.5	Fabrication of Janus Particles from Single Emulsion Drops	271
10.6	Fabrication of Capsules from Single Emulsion Drops	272
10.7	Fabrication of Capsules from Double Emulsion Drops	275
10.8	Applications of Calibrated Microparticles and Microcapsules	279
	References	281

<b>Chapter 11 Challenges and Opportunities – Future Directions</b>	<b>290</b>
<i>M. Gilligan, A. Lee and C. Ren</i>	
11.1 Introduction	290
11.1.1 Good Judgement About the Application	290
11.1.2 Definition of Innovations Across Disciplines	291
11.2 Future Direction	292
11.2.1 Bioinformatics	292
11.2.2 Materials	292
11.2.3 Active Modular Droplet Microfluidics Platform	292
