Editor biographies	viii
Author biographies	ix

Part 1: Critical Reviews

Introduction of the year 2021	3
<i>Valentina Benazzi, Stefano Crespi and Stefano Protti</i>	
1 Introduction	3
2 Awards and prizes	4
3 Handbooks	5
4 Special issues, collections and reviews	7
5 Reviews	11
Acknowledgements	14
References	14

The photochemical unit, University of Western Ontario	17
<i>Angelo Albini</i>	
References	26

Quantum chemistry of the excited state: advances in 2020–2021 28

*Juliana Cuéllar-Zuquin, Javier Carmona-García,
Miriam Navarrete-Miguel, Luis Cerdán, Antonio Francés-Monerris,
Angelo Giussani, Javier Segarra-Martí and Daniel Roca-Sanjuán*

1 Introduction	28
2 Statistics of articles published in 2020–2021	30
3 UV/vis absorption and emission spectroscopy in molecules	30
4 Sunlight chemistry in atmospheric modelling	35
5 DNA photophysics, photochemistry and photosensitisation under UV radiation exposure	39
6 DNA reactivity under ionising radiation exposure	46
7 Chemiluminescence and self-illuminating PDT	49
8 DNA repair	51
9 Quantum computers and photochemistry	56
10 Summary	58
Acknowledgements	58
References	59

**Organic aspects: photochemistry of alkenes, dienes,
polyenes (2020–2021)** 67

Takashi Tsuno

1 Introduction	67
2 Photoinduced (<i>E</i>)-(<i>Z</i>) isomerization	67
3 Rearrangement	75
4 Electrocyclization	77
5 [2 + 2] Cycloaddition	86
6 Photocatalysts	91
References	110

Photochemistry of aromatic compounds (2019–2020) 125

Kazuhiko Mizuno

1 Introduction	125
2 Isomerization reactions	125
3 Addition and cycloaddition reactions	141
4 Dimerization reactions	149
5 Intramolecular cyclization reactions	156
6 Substitution reactions	172
7 Reduction	173
8 Oxidation	179
9 Rearrangements	189
References	194

Oxygen-containing chromophores 201*Raquel E. Galian and Julia Pérez-Prieto*

1 Introduction	201
2 Photochemical reactions of carbonyl compounds	203
3 Carbonyl compounds as photocatalysts	223
4 Bifunctional photocatalysts	233
5 Photoactive carbonyl compounds in material sciences	237
6 Conclusions and perspectives	238
References	240

Organic aspects: functions containing a heteroatom different from oxygen (2020–2021) 242*Valentina Benazzi, Stefano Crespi and Stefano Protti*

1 Nitrogen-containing functions	242
2 Functions containing other heteroatoms	252
Acknowledgements	257
References	257

Recent advances in palladium photocatalyzed transformations (2017–2021) 260*Chiara Lambruschini and Andrea Basso*

1 Introduction	260
2 Alkylation and arylation reactions	262
3 Heck, Heck-type and Negishi cross-coupling reactions	267
4 HAT, desaturation and cyclization reactions	273
5 Miscellaneous reactions	276
6 Conclusions	279
References	280

Part 2: Highlight papers**Recent approaches in asymmetric non-covalent organo-photocatalysis** 285*Leyre Marzo and José Alemán*

1 Introduction	285
2 Asymmetric induction in the excited state	286
3 Asymmetric induction in the ground state	292
4 Conclusions	298
References	300

Recent advances of visible-light-induced carbon–sulfur bond formation 303

Jiaxu Feng, Kui Lu and Xia Zhao

- 1 Introduction 303
- 2 Visible-light mediated C–S bonds formation *via* thiyl radical 303
- 3 Visible-light mediated C–S bonds formation *via* sulfonyl radical 311
- References 319

Photochemistry electrified: pushing the boundaries of radical-based organic synthesis 321

Alexandra Jorea, Luca Dell'Amico, Giulio Goti and Davide Ravelli

- 1 Introduction 321
- 2 Merging homogeneous photocatalysis with electrochemistry: diversifying photocatalytic processes with electrochemistry 327
- 3 Merging electrochemistry with homogeneous photocatalysis: processes mediated by an electrogenerated photocatalyst 334
- 4 Miscellanea 340
- 5 Conclusions 342
- Acknowledgements 343
- References 343

Supramolecular control in hybrid perovskite photovoltaics 346

Weifan Luo, Ghewa AlSabeih and Jovana V. Milić

- 1 Introduction 346
- 2 Hybrid perovskite photovoltaics 349
- 3 Supramolecular templating in hybrid perovskite photovoltaics 353
- 4 Other noncovalent interactions 360
- 5 Summary and outlook 363
- Abbreviations 364
- Acknowledgements 365
- References 365

Photocatalytic modifications of benzamides 371

Maciej Giedyk and Agnieszka Kamińska

- 1 Introduction 371

2 Modifications of benzamides	372
3 Summary	384
Acknowledgements	384
References	384

Polarizable multiscale dynamics for probing solvent and complex environments	386
---	------------

D. Loco and J.-P. Piquemal

1 Introduction	386
2 Modelling polarization in a QM/MM MD approach	387
3 Applications	392
4 Conclusions	400
Abbreviations	401
Acknowledgements	401
References	401

Part 3: SPR Lectures in Photochemistry

Understanding solar fuel photocatalysis using covalent organic frameworks	405
--	------------

Shilpa Palit, Bettina V. Lotsch and Tanmay Banerjee

1 Introduction	405
2 Covalent organic frameworks	406
3 Photophysics of charge transport in COFs	407
4 Structure–property–activity relationship in COF photocatalysts	410
5 Polarity and wettability	410
6 Reversible bond formation and stability	413
7 Surface catalytic reaction	416
8 Conclusion	422
Acknowledgements	423
References	423

Transient absorption spectroscopy in visible-light photocatalysis	428
--	------------

W. B. Swords and T. P. Yoon

1 Introduction	428
2 Transient absorption spectroscopy	430
3 Case studies	436
4 Conclusions	455
Acknowledgements	456
References	456

Mechanoresponsive luminescence in polymeric materials: strategies and methods 458

Chiara Gualandi, Valentina Antonia Dini, Nelsi Zaccheroni and Damiano Genovese

1 Introduction	458
2 Mechanoresponsive luminescence in polymer-based solid materials	472
3 Conclusions	486
References	487

Investigating light-driven rotary molecular motors 491

Anouk S. Lubbe, Daisy R. S. Pooler and Ben L. Feringa

1 Introduction	491
2 Synthesis	496
3 Characterization of the rotation cycle	499
4 Quantification of motor properties	511
5 Conclusions	516
Acknowledgements	516
References	516
