

Contents

Chapter 1 Introduction: Hierarchical Nanostructures for Energy Devices	1
<i>Seung Hwan Ko</i>	
1.1 Introduction	1
1.2 Energy Cycle	2
1.3 Hierarchical Nanostructures for Efficient Energy Devices	3
References	5
Chapter 2 Fundamentals of Hierarchical Nanostructures	7
<i>Jinhwan Lee and Seung Hwan Ko</i>	
2.1 Introduction	7
2.2 Unique Characteristics of Nanomaterials	8
2.2.1 Thermodynamic Properties and Thermal Stability	9
2.2.2 Electrical Properties (Electron Transport)	11
2.2.3 Phonon Transport (Thermo-electric Properties)	12
2.2.4 Mechanical Properties	14
2.2.5 Optical Properties	15
2.2.6 Magnetic Properties (Superparamagnetism)	19
2.3 Summary	20
References	21

Chapter 3	Nanotechnology's Wonder Material: Synthesis of Carbon Nanotubes	26
	<i>Jung Bin In and Aleksandr Noy</i>	
3.1	Introduction	26
3.1.1	Carbon Nanotubes: General Overview	26
3.1.2	Carbon Nanotubes in Science and Technology	28
3.2	Carbon Nanotube Synthesis	28
3.2.1	CNT Growth Technologies	28
3.2.2	Growth Mechanism	39
3.2.3	Growth Kinetics	45
3.2.4	Termination of CNT Growth	49
3.2.5	Lessons to the Experimenters from the Growth Models	52
3.3	Conclusion	53
	Acknowledgements	54
	References	54
Chapter 4	Hierarchical Nanostructures for Solar Cells	59
	<i>Junyeob Yeo and Seung Hwan Ko</i>	
4.1	Introduction	59
4.2	Hierarchical Nanostructured Solar Cell	60
4.2.1	Hierarchically-branched Nanowires for Solar Cells	61
4.2.2	Hierarchically Structured Porous Materials for Solar Cells	69
4.2.3	Other Hierarchically Structured Solar Cells	74
4.3	Fabrication/Synthesis Methods	76
4.4	Summary	80
	Acknowledgements	81
	References	81
Chapter 5	Hierarchical Nanostructures for Fuel Cells and Fuel Reforming	84
	<i>Nico Hotz</i>	
5.1	Introduction	84
5.2	Types of Fuel Cells	85
5.2.1	Low-temperature Polymer Electrolyte Membrane Fuel Cells	85
5.2.2	High-temperature Polymer Electrolyte Membrane Fuel Cells	89
5.2.3	Direct Alcohol Fuel Cells	91
5.2.4	Solid Oxide Fuel Cells	92

5.3	Fuel Reforming and Fuel Treatment for Fuel Cell Systems	95
5.3.1	Fuel Reforming	95
5.3.2	Removal of CO from Fuel	96
	References	97
Chapter 6	Thermoelectric Materials and Devices	107
	<i>Chanyoung Kang, Hongchao Wang, Je-Hyeong Bahk, Hoon Kim and Woochul Kim</i>	
6.1	Introduction	107
6.2	Schemes for Enhancing Thermoelectric Properties	110
6.2.1	Three Coupled Parameters in the Thermoelectric Figure of Merit	110
6.2.2	Power Factor Enhancement	111
6.2.3	Conventional Approaches to Lower Thermal Conductivity (Alloys)	116
6.2.4	Thermal Conductivity Reduction by Nanostructures	117
6.3	Material Synthesis	122
6.3.1	Conventional Synthesis Schemes	122
6.3.2	Nanocomposites Based on Conventional Thermoelectric Materials	123
6.4	Nanodot Nanocomposites	127
6.4.1	Mg ₂ Si as a Thermoelectric Material	128
6.4.2	Oxide Materials	129
6.5	Thermoelectric Devices	131
6.5.1	Power Generation	131
6.5.2	Refrigeration	133
6.5.3	Fabrication of Thermoelectric Devices	134
6.5.4	Applications to Waste Heat Recovery	136
6.6	Summary	136
	Acknowledgements	137
	References	137
Chapter 7	Piezoelectric Energy Harvesting Nanofibers	142
	<i>Jiyoung Chang and Liwei Lin</i>	
7.1	Introduction	142
7.2	Nanofiber Fabrication Methods for Energy Harvesting Applications	144
7.2.1	Far-field Electrospinning	144
7.2.2	Modified Far-field Electrospinning	145
7.2.3	Near-field Electrospinning	145
7.2.4	Mechanical Forcespinning	148

7.3	Characterization Method for Piezoelectricity	149
7.3.1	X-Ray Diffraction (X-Ray)	149
7.3.2	Fourier Transform Infrared Spectroscopy (FTIR)	150
7.3.3	Piezoelectric Force Microscopy (PFM)	150
7.3.4	SHG and Raman Spectroscopy	151
7.4	Energy Harvesting <i>via</i> Fiber-based Nanogenerators	152
7.4.1	PZT Nanofiber-based Nanogenerators	152
7.4.2	Randomly Distributed PVDF Fiber Nanogenerators	154
7.4.3	Orderly Patterned PVDF Fiber Nanogenerators	154
7.4.4	Towards System Level Demonstrations	158
7.4.5	State-of-the-art Piezoelectric Fiber-based Nanogenerators	159
7.5	Discussion	162
7.5.1	Measurement Artifacts	162
7.5.2	Energy Conversion Efficiency	165
7.5.3	Enhancing Strong Piezoelectricity in Nanofibers	167
7.6	Summary	168
	References	169

Chapter 8 Hierarchical Nanostructures for Photo-Electro-Chemical Cells **174**

Daeho Lee and Costas P. Grigoropoulos

8.1	Meaning of “Hierarchical Structure”	174
8.2	Importance of the “Hierarchical” Structure in PEC Cell Applications	175
8.3	Basic Mechanism of PEC Cells	176
8.3.1	PEC Cell for Electrical Energy Generation	176
8.3.2	PEC Cell for Fuel (Hydrogen) Generation	178
8.4	Several Fabrication Strategies for Hierarchical Nanostructures	181
8.4.1	Combination of Hydrothermal Growth and Seed Engineering (Solution-phase Chemical Route)	182
8.4.2	Repetition of Catalyst Deposition and Growth by Chemical Vapor Deposition	183
8.4.3	Branch Formation by <i>in situ</i> Catalyst Generation	185
8.4.4	Combination of VLS/Thermal Evaporation Method and Hydrothermal Growth	186
8.4.5	Defect-driven Growth	186
8.4.6	Laser-induced Hydrothermal Growth (LIHG)	187
8.4.7	Heterostructures Composed of Two or More Materials	188

<i>Contents</i>	xiii
8.5 Useful Parameters for Hierarchical Nanostructures	190
8.6 Examples of Hierarchical Nanostructures for PEC Cell Applications	192
8.7 Summary	200
References	200
Chapter 9 Hierarchical Nanostructures: Application to Supercapacitors	204
<i>Jung Bin In and Costas P. Grigoropoulos</i>	
9.1 Introduction	204
9.2 Electrical Double-Layer Capacitors and Pseudocapacitors	206
9.2.1 Electrical Double-Layer Capacitors (EDLC)	206
9.2.2 Pseudocapacitor	211
9.3 Nanomaterials for Supercapacitor Electrodes	213
9.3.1 Activated Carbon	214
9.3.2 Carbon-based Nanomaterials for EDLC	215
9.3.3 Other Carbonaceous Materials	218
9.3.4 Electroactive Nanomaterials for Pseudocapacitors	219
9.3.5 Hierarchical Nanostructures for Supercapacitors	220
9.4 Summary and Outlook	225
Acknowledgements	226
References	226
Chapter 10 Hierarchical Field Emission Devices	230
<i>E. Stratakis</i>	
10.1 Introduction to Field Electron Emission Technology	230
10.2 Hierarchical Field Emission Cathodes	233
10.2.1 Carbon-based Field HFE Cathodes	234
10.2.2 Metal Oxide HFE Cathodes	238
10.2.3 Semiconducting HFE Cathodes	240
10.2.4 Metal-organic-based HFE Cathodes	241
10.3 Conclusion	242
References	242
Chapter 11 Sensors	244
<i>Dongjin Lee</i>	
11.1 Introduction	244
11.2 Hierarchy and Morphology Suitable for Sensors	245

11.3	Preparation of Hierarchical Nanostructures for Sensors	247
11.3.1	Hierarchical Metal Oxide Nanostructures	247
11.3.2	Hierarchical Metal Nanostructures	248
11.4	Hierarchical Nanostructure Sensors	250
11.4.1	Gas Sensors	250
11.4.2	Biosensors	256
11.4.3	SERS Sensors	260
11.5	Concluding Remarks and Outlook	264
	References	265
Chapter 12	Other Applications	268
	<i>Sukjoon Hong and Seung Hwan Ko</i>	
12.1	Introduction	268
12.2	Other Applications of Hierarchical Nanostructures	269
12.2.1	Metal Nanowire Percolation Network for Transparent Conductor Applications	269
12.2.2	Metal Nanowire Percolation Network for Highly Flexible or Stretchable Electrodes	272
12.2.3	Modification of Surface Characteristics (Superhydrophobic Surface, Self-cleaning Surface)	276
12.2.4	Pool Boiling Enhancement	279
12.2.5	Gecko-inspired Hierarchical Adhesive	282
12.3	Summary	286
	References	286
Chapter 13	Summary	292
	<i>Seung Hwan Ko</i>	
	References	294
	Subject Index	295
