

**Minnie SA, Kuns RD, Gartlan KH, et al. Myeloma escape after stem cell transplantation is a consequence of T-cell exhaustion and is prevented by TIGIT blockade. *Blood*. 2018;132(16): 1675-1688.**

The colors denoting  $\alpha$ TIGIT and clg in Figure 7A, left panel (page 1685), and  $\alpha$ PD-1 and clg in supplemental Figure 3A, right panel, were reversed. The corrected Figure 7 is shown below. The references to and interpretation of these data in the article text are correct. The errors have been corrected in the online version of the article and in the supplemental file.
