Acute seizures attributable to falciparum malaria in an endemic area on the Kenyan coast

Spreading depolarizations have prolonged direct current shifts and are associated with poor outcome in brain trauma

Training of goal-directed attention regulation enhances control over neural processing for individuals with brain injury

Examining working memory task acquisition in a disrupted neural network
F. G. Hillary, J. D. Medaglia, K. Gates, P. C. Molenaar, J. Slocomb, A. Peechatka and D. C. Good

Book Review
Twilight at the birth of modern neuroscience
J. Kesselring

Corrigenda
Letters to the Editor
Retinal pathology in multiple sclerosis: insight into the mechanisms of neuronal pathology
F. C. Gundogan, A. Tas, U. Erdem and G. Sobaci
Reply: Retinal pathology in multiple sclerosis: insight into the mechanisms of neuronal pathology
