

Correction

Structural and functional alterations in the androgen receptor in spinal bulbar muscular atrophy

By I. J. McEWAN

Volume 29 Part 2 (2001) 222–227

Table 2 contained serious errors in the column under the “Repeat length” heading, and should have appeared as follows:

Table 2

Polyglutamine repeats and AR protein aggregation

SRC, steroid receptor co-activator; NEDD, neural precursor cell-expressed developmentally down-regulated; CBP, CREB (cAMP response element binding protein) binding protein.

Repeat length	Aggregation			Cell death	Sequestered proteins	Ref.
	Cytosol	Nucleus	Hormone			
Gln ₄₆ /Gln ₄₈	+		+	Reduced		[37]
Gln ₄₈	+	+	+		SRC, Hsps, Hdj-2, NEDD8	[36]
Gln ₅₀	+		–	Increased		[38]
Gln ₅₂	+		+			[29]
Gln ₆₆ –Gln ₁₁₂	+	+		Increased		[35]
Gln ₇₇	+		+			[39]
Gln ₁₁₂		+		Increased	CBP	[40]
