Corrigendum
Predicting protein function from domain content
Kristoffer Forslund and Erik L. L. Sonnhammer

The authors regret that there were the following errors in the above paper.

At the bottom of page 2, in Section 2.2:
‘where the product is taken over the \(i = 0 \ldots K\) subsets of \(D\). There are \(K = 2^N - 1\) such subsets for \(N\) unique domains in \(D\).’
should be
‘where the product is taken over the \(i = 1 \ldots K\) subsets of \(D\). There are \(K = 2^N - 1\) such subsets for \(N\) unique domains in \(D\).’

In Equation 8 on page 3, which reads:
\[
\alpha = \left( \prod \frac{P(D_i|F)}{P(D_i|\neg F)} \right) \left( \frac{1}{K} \right) \frac{P(F)}{P(\neg F)}. \tag{8}
\]
the \((1/K)\) expression should be a superscript, making the first part of the expression a geometric mean.
