

Subject Index

For terms that are frequently repeated in the text, only selected places are given, including those at which the terms are defined or explained

Absolute perceptual threshold, absolute threshold of perceptibility, 223, 274.
 See Masked threshold
Accumulation model, 269, 337
Accuracy, 9, 10
Acoustical bridge, 59
Acoustical impedance, 55
Acoustical parallax, 176, 177
Acoustical reflex, 54, 62, 79
Active noise cancellation, 391
Adaptation, 99, 137, 162, 163, 307, 367
Adequate stimulus, 12
All-pass filter, 249, 358
Anechoic chamber, 36
Aperture effect of the pinna, 67
Area function of the ear canal, 289, 296ff., 302
Arrival-time differences. *See* Time differences
Association model, 422
Attention, 372, 410, 412, 418, 421
Attenuation of sound in air, 126
Audiovisual reflex, 196
Auditory event, 2, 3
Auditory experiment, x, 1, 5
Auditory flicker, 388
Auditory horizon, 122, 127
Auditory-nerve-based model, 342
Auditory perceptual scenes, 409
Auditory renderer, 387
Auditory scenario, 374ff
Auditory space, 2, 4, 51, 127, 279, 367
Auditory spaciousness, 397. *See also* Spaciousness
Auditory spatial impression. *See* Spatial impression
Auditory stream segregation, 403
Auralization, 379ff, 387
Authentic reproduction, 358ff., 374
Autocorrelation, 251, 355
Autonomous system, 410
Averaging of external-ear transfer

functions, 88ff., 291ff., 367
Azimuth, 14

Backward inhibition, 419
Backward masking, 223, 236, 264, 269
Bandpass filters of constant absolute bandwidth, 25, 26
Bandpass filters of constant relative bandwidth, 25, 26
Base angle, 202, 204, 219, 220
Basic theories, 12, 13
Békésy's method of oscillating adjustment, 18, 80
BILD, 258, 265ff., 335
Binaural activity patter, 370
Binaural adaptation, 413 421
Binaural beats, 149ff., 323
Binaural correlation beats, 257
Binaural impulse response, 379
Binaural intelligibility-level difference.
 See BILD
Binaural masking-level difference. *See* BMLD
Binaural mixing console, 366, 374
Binaural recognition. *See* Binaural signal detection
Binaural room simulation, 376ff, 389
Binaural signal detection, 240, 257ff., 275, 313, 330ff., 337, 344
Binaural stereophony. *See* Dummy head
Binaural suppression of reverberation, 334ff., 346
Binaural technology, 373ff
Binaural theories, 13
Binaural unmasking. *See* Binaural signal detection
Bite board, 97
Black box, 5, 6
BMLD, 258ff., 333
Bone-conduction theories, 13, 191ff., 289, 358
Boosted bands, 111ff.
Bottom-up, 370, 409
Breakdown of precedence, 414, 417, 418, 419
Buildup times for auditory spatial scenarios, 414

- Caloric stimulation of the semicircular canals, 197, 198
 Carrier. *See* Fine structure
 Cavum conchae, 52, 63, 67
 Central controller, 385
 Circumaural headphones, 31
 Clifton effect, 413
 Cochlea 52, 338, 340ff
 Cocktail-party effect, 257, 275
 Cocktail-party processor, 393, 403, 422
 Cognition, 372, 411
 Cognitive processes, 422
 Coherence, 202, 203ff., 238ff., 240ff., 348ff.
 Coincidence detector, 396
 Coincidence model. *See* Correlation model
 Comb filter, 113, 218, 249, 325, 349
 Compatibility, 360
 Compensation factor in trading. *See* Trading ratio
 Complex averaging. *See* Averaging of external-ear transfer functions
 Concurrent talkers, 403, 405
 Conditioning impulse train, 415
 Cone of confusion, 179, 180, 382
 Consonant-cluster discrimination, 407
 Constant methods, 15
 Contralateral inhibition, 396. *See also* Inhibition
 Coordinate system, 14, 20
 Correlation model, 240, 250ff., 270, 271, 337ff.
 Count-comparison models, 337
 Critical band, 153, 314ff., 340
 Cross-correlation, 168, 201, 238, 240, 250ff., 263, 292, 337ff.
 Cross correlatogram, 343ff., 351
 Cross modal information, 411, 422

 Degree of coherence, 238, 240ff., 255, 275, 278, 349
 Degree of subjective preference, 355
 Delay devices, 143
 Dichotic presentation, 94, 138, 139, 186, 230, 231, 258
 Dichotic pulsation threshold, 315
 Difference threshold, 15, 16
 Diffraction, 70ff., 304
 Diffuse-field distance, 278, 279
 Diffuse-field equalization, 363ff.
 Diffuse reflection, 380
 Diffuse sound fields, 271ff., 278, 279, 336, 363

 Diotic presentation, 94, 186, 240, 258, 306
 Dirac impulse, 23
 Directional characteristics, 385, 391
 Directional hearing in the horizontal plane, 40ff.
 Directional hearing in the median plane, 40ff., 97ff., 304ff.
 Direct methods of measurement, 19
 Distance hearing, 40, 45, 116ff., 175ff., 280
 Distortion technique, 238, 247, 248
 Dizziness, 198
 Doppler shift, 390
 Dummy head, 51, 132, 136, 205, 250, 283, 286ff., 294, 312, 347, 358ff.
 Dummy-head stereophony, 374

 Ear canal, 52, 54ff., 289ff., 296ff.
 Eardrum, 31, 51ff.
 Eardrum impedance, 55ff., 289, 296ff. 301, 364
 Eardrum-tensioning muscles, 52
 Ear input signals, 51
 Early reflections, 277
 Echo, 204, 224ff., 274, 412, 417, 419
 Echogram, 276ff.
 Echo suppression, 417ff
 Echo threshold, 224–225ff., 247, 274, 279, 329, 346
 EC model. *See* Equalization-and-cancellation model
 Electret microphones, 290
 Electroacoustical bridge, 60
 Elevation, 14, 184, 219
 Enclosed spaces, 201, 271ff.
 Energy-density spectrum, 23ff.
 Envelope, 27, 150ff., 164, 216, 221, 231, 254, 312ff., 332, 334, 341
 Equalization, 34, 35, 50, 101, 134ff., 290, 358ff.
 Equalization-and-cancellation model, 268, 337
 Equal-loudness contours, 120, 228
 Eustachian tube, 52
 Experimental procedures, 12
 External auditory canal. *See* Ear canal
 External ear, 52
 External-ear transfer functions, 78ff., 289, 290ff., 338, 364, 365

 Familiarity, 45, 46, 99, 100, 104, 105, 114, 119, 123, 137
 Fatigue, 162, 163

- Feedback, 372, 420
 Fine structure, 150ff., 164, 216, 221, 231, 234, 311ff., 328, 332, 333, 341
 First wavefront, 30. *See also* Law of the first wavefront
 Fixed-position theories, 12, 13
 Forward masking, 223, 264, 269
 Fourier integral, 24
 Fourier spectrum, 24
 Franssen effect, 280, 281, 412n
 Free-field transfer functions, 78ff.
 Free sound field, 36
 Frequency domain, 65, 303
 Frontal plane, 14
 Front-back discrimination. *See* Directional hearing in the median plane; Motional hearing
 Front-back reversals, 382
 Fundamental set, 6ff.
- Gaussian tone burst (Gaussian signal), 24
 Generalization, 11
 Group delay, 62, 72, 74, 76, 79, 95, 116, 140, 142, 152, 248, 350, 358
- Haas effect, 226
 Halving method, 19
 Hammer, 52
 Head effects, 69ff., 304
 Head movements. *See* Motional theories
 Head pivoting, 184ff.
 Head reflex. *See* Motional theories
 Head-related stereophony. *See* Dummy head
 Head-related system of coordinates, 14
 Head-related transfer function, 373
 Head rotation, 96, 184ff.
 Head tipping, 185ff.
 Head tracking, 383, 387
 Hearing disorders, 48
 Hearing loss, 48
 Hearing-impaired subject, 407
 Heterosensory theories, 12, 13
 Homosensory theories, 12, 13
 Horizontal plane, 14, 40
 Hornbostel-Wertheimer constant, 143
 HRTF. *See* Head-related transfer function
 Huygens-Fresnel principles, 27, 71, 201
- Identical ear input signals, 93ff., 304ff.
 Impulse response, 379
 Impulse technique, 86
 Incoherence. *See* Coherence
- Index of spaciousness, 351ff.
 Inhibited cross-correlation function, 397
 Inhibition, 169, 204, 229, 230, 233, 279, 327, 335, 341
 Inhibition of primary sound, 204, 235ff., 275, 279
 Inhibitory elements, 395
 Inner ear, 52
 Input impedance of the ear canal, 57, 60, 63
 Inside-the-head locatedness, 116ff., 131ff., 383
 Intelligibility, 265ff., 335, 405
 Intensity-difference theory of directional hearing, 155
 Intensity differences. *See* Level differences
 Intensity image, 170, 322
 Intensity level, 35
 Interactivity, 383
 Interaural attributes of the ear input signals, 93, 117, 137ff., 304
 Interaural cross-correlation. *See* Cross-correlation
 Interaural group delay. *See* Group delay
 Interaural level differences. *See* Level differences
 Interaural phase delay. *See* Phase delay
 Interaural time differences. *See* Time differences
 Interaural transfer function, 78ff., 138, 295
 Internal physiological noise, 262
 Interrogative methods, 15
 Interval judgment, 15, 19
 Interval scale, 15, 16
 Intraaural headphones, 31
 Intracranial locatedness. *See* Inside-the-head locatedness
 Inverse filtering, 327
 Inversion, 142
- Jeffress-Lindemann-Gaik model, 401
 Judgments, 15, 16
 Just-noticeable difference, 16
- Kundt's tube, 58
 Kunstkopf. *See* Dummy head
- Latency, 167, 253
 Lateral energy fraction, 351
 Lateralization, 139ff., 313ff., 344
 Lateralization blur, 139ff., 313ff.
 Lateralization model, 268, 271
 Lateral reflections, 282, 351ff.

- Law of the first wavefront, 204, 222ff., 274, 279ff., 323ff., 346, 411, 422
 Level differences, 62, 95, 138, 155ff., 290ff., 313, 350, 356
 Lindemann's extension to the Jeffress model, 394
 Linear array, 409
 Linear distortions, 78, 301, 326
 Linearity, 36, 201, 202
 Linear time-invariant system, 373
 Localization, 3, 37ff.
 Localization blur, 21, 37ff.
 Locatedness, 3, 4
 Loudness-comparison method, 80
 Loudness level, 35
 Loudspeaker arrays, 274

 Mapping methods, 322, 402
 Masked threshold, 223ff., 236, 247, 270, 274, 329, 332ff., 354
 Masking, 223, 265
 Mastoid process, 53
 Maximum lateral displacement, 148, 149, 157
 Measurement, 7
 Median plane, 14, 40, 44, 94, 97ff., 217, 305ff.
 Method of adjustment, 15
 Method of average error, 17
 Method of constant sums, 20
 Method of equal perceptual intervals, 19
 Method of minimal changes, 17
 Method of oscillating adjustment, 18, 80
 Method of triads, 19
 Middle ear, 52, 338, 340
 Mirror image, 30, 31, 36, 201, 271, 377
 Mixing console, 366
 Model of auditory information processing, 370
 Models of binaural signal processing, 337ff.
 Monaural attributes of ear signals, 93ff., 117, 304ff.
 Monaural theories, 13
 Monaural transfer function, 78ff., 295
 Monophonic signal, 248, 326, 334
 Monotic, 94, 258
 Motional theories, 12, 13, 43, 44, 178ff., 219
 Moving auditory events. *See* Binaural beats; Persistence of auditory events
 Multimodal information, 384
 Multiple auditory events, 146, 147, 152, 160, 216, 233, 311, 313ff., 346, 349

 Multiple sound sources, 201ff., 271ff., 327
 Multiple-source scenario, 380
 Multiple switching, 417

 Natural combination of time and level difference, 400
 Nerve-firing patterns, 340
 Nominal judgments, 15, 16
 Nominal scale, 7
 Nonidentical ear input signals, 137ff.
 Null method, 140
 Nystagmus, 198

 Object, 1
 Objectivity, 11
 Onset slopes, 402
 Ordinal judgment, 15, 16
 Ordinal scale, 7
 Ossicles, 52
 Out-of-phase signals, 145, 146, 220, 221, 247, 259, 285, 315, 324, 333

 Partial coherence *See* Coherence
 Pattern recognition, 255, 339, 346, 409
 Perceptual plausibility, 389
 Perceptual space constancy, 383
 Persistence of auditory events, 47, 172, 188, 323, 397
 Phantom sound source, 204
 Phase delay, 72, 74, 79, 140, 142, 152, 350
 Picket-fence effect, 291
 Pink noise, 26ff.
 Pinna, 50, 63ff., 99ff.
 Plausibility in sound localization, 419
 Pointer, 41, 158ff.
 Pointer methods, 21
 Point of perceptual equality, 15ff.
 Polarity switch, 324
 Position-and-orientation tracking, 383
 Position tracking, 406
 Postmaking. *See* Forward masking
 Power-density spectrum, 23ff., 113, 405
 Precedence effect, 391, 411ff, 418
 Premasking. *See* Backward masking
 Presence 388, 389
 Pressure level, 35
 Pressure-sensitive receiver, 54, 128
 Primary sound, 222ff.
 Probe microphones, 31ff., 50, 66, 101, 128, 134, 290, 358
 Proximity-image effect, 194
 Pseudophonic arrangement, 176, 194

- Pseudostereophony, 248ff., 348
 Psychometric methods, 14ff.
 Psychophysical function, 8, 9
 Pulling effect, 315
 Pulsating radiator, 28ff.
 Pulsating sphere, 28, 32
 Pulsation threshold. *See* Dichotic pulsation threshold

 Quadrophony, 285, 286, 325

 Radiation impedance, 365
 Rarefaction, 144, 145
 Ratio judgment, 15, 19
 Ratio scale, 7, 8, 20
 Ray-tracing method, 377
 Real time, 387
 Reciprocity principle, 302
 Reflection, 36, 22ff.
 Reflection at the pinna, 64ff.
 Refractory period, 149
 Reproducibility, 9, 10
 Rescanning phase, 419
 Resonances of the external ear, 66ff., 303
 Response-modifying factor, 422
 Responsiveness, 388
 Reverberation, 277ff., 285, 333ff., 348, 352
 Reverberation algorithm, 380
 Reverberation chamber, 248, 249
 Reversal of directions, 99, 102, 105
 Rooms. *See* Enclosed spaces
 Rotary field, 273
 Rotary switch, 188, 189
 Rotating chair, 189, 198
 Rotational stimulus, 198
 Rule of spatial complication. *See* Spatial complication
 Running cross-correlation. *See* Cross-correlation
 Running spectral analysis in the ear, 313

 Sacculus, 52, 197
 Scale, 7, 8
 Scaled-down dummy heads, 382
 Scaled-down physical models, 382
 Scaling function, 8
 Schuster's bridge, 59
 Self-perception, 391
 Semicircular canals, 52, 197
 Sensation level, 35
 Sense of presence, 388, 389
 Sentence intelligibility, 407
 Sharpening of the peaks of the cross-correlation function, 397

 Short-term cross-correlation. *See* Cross-correlation
 Short-term memory, 137
 Signals, 22
 Signal-to-noise ratio, increase of, 405
 Sine law for spatial hearing, 75
 Slope effect, 169
 Smoothness, 388
 Sound, 2
 Sound event, 2, 3
 Sound fields, 22
 Sound-field modeling, 376, 379, 387
 Sound pressure level, 35
 Sound-pressure-level difference. *See* Level difference
 Source-position finder, 393
 Space windows, 406
 Spaciousness, 329, 346ff.
 Spatial characteristic of the external ears, 289, 302, 303, 361, 364
 Spatial complication, 195, 200
 Spatial hearing, ix, 3
 Spatial impression, 282, 347ff., 420
 Spatial melody, 417ff.
 Spatial selectivity, 408
 Spectral incoherence, 346, 349
 Speech recognizer, 408
 Spherical radiator of zeroth order, 28, 29, 32
 Spherical wave, 27ff.
 Split auditory events. *See* Multiple auditory events
 Standard stereophonic arrangement, 202, 204, 222, 225, 246, 328, 361
 Statistical decision-theory model, 337
 Stereo base distance, 202
 Stereophony, 204, 325, 332, 348, 360
 Structural averaging. *See* Averaging of external-ear transfer functions
 Subject, 1
 Subject-object relationship, 1
 Summing localization, 204ff., 271, 273, 285, 324ff., 346, 353
 Summing localization blur, 204, 205
 Superposition, 36, 201, 202, 325, 328
 Superposition integral, 23
 Superposition technique, 238, 243, 247, 263
