

INDEX

Note: Page numbers in italics refer to figures.

- Adaptability, importance of, 4
Adaptation, 66
 may be too perfect, 58, 60
 not universal in living things,
 43–44
 to special modes of life, 58–
 60, 100
Aggregate differentiation, 48–
 49, 88–89
Albatross and wren, 66
Algae, mode of feeding, 93
American water-weed
 introduced into England,
 54
Amoeba
 pseudopods of, 9
 reproduction in, 12
Amphibia, regeneration, 36
Animals, food-relation with
 plants, 95, 99
Ants, 16, 28, 48–49, 107–108,
 122, 129n4
Aphis, asexual reproduction in
 summer, 51
Armadillo, produces
 quadruplets, 52–53
Bacteria
 duration of life, 18
 lack of formed nucleus,
 44–45
 lack of sexual process, 54
Bee
 communities of bees as single
 individuals, 28, 48–49,
 108
 and hive, 7
Begonia, regeneration in, 13–14
Benjamin Franklin's kite, 49
Bergson
 and continuance, 128n7
 definition of individuality,
 1–2, 6–7
 indetermination and brain-
 machinery, 5
Blastodinium, 82–83
Blastomere
 definition, 52–53
 regeneration of, 114–115
Bones, brittleness when old,
 128n6
Bougainvillea (Hydroid colony),
 30, 122

- Brain, 48, 106–107
 and choice, 5
 and individuality, 21–22, 48–49, 62–63, 107
 modifies method of
 individuation, 48–49, 107
- Budding, in animals, 29, 60, 89
- Bud-sports, 62
- Butterfly
 and flowers, 97
 metamorphosis in, 57
- Catenata, 81–86
- Caterpillar
 metamorphosis in, 58–59
 “skin and squash,” 59
- Caulerpa, a single enlarged cell, 67–68
- Cells, 49, 52, 114–115
 of Catenata, 81
 form the whole bodies of
 protozoa, 29
 independence of, in some
 animals, 73
 and individuality, 49
 influence of, upon history of
 life, 49
 modifications of, 104
 origin of, decreed by nature
 of protoplasm, 43, 49
 reproduction of, 32, 33,
 34–35
 size of, 65–67
 of Sponges, 68–75
 units of structure in higher
 animals, 29
 of Volvox, 79
- Chess, 127n4
- Chick, before hatching, 59
- Choano-flagellates, 72
- Chromatin, 44–45
- Chromosomes at sexual fusion,
 60–61
- Church architecture, 46
- Ciliata, sexual process in, 51,
 54
- Clathrina, 68, 122
- Clavellina, regeneration of half
 the body, 36, 113
- Closed systems, 6–7
- Coenocyte, definition, 130n1
 (chap. 4)
- Colonies, 105
 of ants, 16, 28, 49, 107–108
 of bees, 7, 28, 48–49
 of corals, 28
 how formed, 29
 of Hydroids, 28–31, 51, 57
 individuality of, 75
 of man, 48–49, 85, 108–109
 of Siphonophora, 29, 89, 91,
 93, 108, 122
 of Termites, 9
 of Volvocidae, 77
- Communities, 16, 18, 28,
 48–49
- Comparative anatomy,
 unconscious, 27–28
- Complexity, importance of, 4
- Conjugation, definition, 51
- Consciousness
 beginnings of, 21–22
 and continuance, 19–20
 and indetermination, 5
 and personality, 22, 63
 states of, 10

- Continuance
 increase in, 18–19
 of individuals, 11–12, 16,
 18, 26
 only partial, 14
- Corporate personalities, 109
- Crystals, difference from
 individuals, 15, 39–40
- Cytoplasm, 44–45, 113
- Darwin, 4, 101
- Death
 and growth, 13
 includes two separate
 processes, 12
- Dermal cells, 69–73
- De Vries, and mutations, 60–61
- Dacey, on personality, 109
- Distomum, 16, 17, 18
- Division, reproduction by, in
 animals, 32, 33
- Division of labour, 81, 89, 93
 in man, 85
- Dogiel, 81
- Double monsters, 52
- Echinoderms, 130n4
- Egg, 34, 51–53, 114
 a cell, 34
- Elephant, 66
- Elodea, lack of sexual process in
 England, 54
- Embryo
 of man, 26–27
 more than one formed from a
 single ovum, 51–53
- England, 41
- Enriques, and sexual process in
 protozoa, 54
- Environment, adaptation to,
 58–60, 97
- Etymology, and individuality,
 62–63
- Eustachian tube, 118
- Evolution
 altered point of view due to,
 22–23
 its meaning, 19–20
- Fertilization, 35, 54
 of ovum supposed to mark
 beginning of a new
 individual, 51, 54
- Field-mouse and elephant, 66
- Fission
 in animals, 32–33, 33, 54
 in protozoa, 51, 54
- Flagellum, part of a cell, 69,
 77
- Flowers, and insects, 97
- Fluke of liver-rot, 16
- Franklin, B., experiment with
 kite, 49
- Frog and tadpole, individuality
 in, 55, 57–59
- Fungi, mode of feeding in, 93
- Gamete, definition, 35
- Germ-cells
 of Sponges, 70
 of Volvox, 79
- Gonium, 77, 117, 121
- Growth, difficulties involved
 in, 12

- Grub, metamorphosis of, 55
 Gymnodinium, 82, 85
- Hand
 grasping function of, 9
 relation with rest of body,
 7–8, 11
- Haplozoon, 81–86, 105, 115
 Helen Keller, 100
 Heterogeneity, of individuals,
 7, 10, 20
- History
 all-important in Biology, 25,
 37–38
 as a clue to individuality,
 37–38
- Hooker, Sir J., 107
 Huxley, J. S., 131n3 (chap. 4)
 Huxley, Prof. T. H., view of
 individuality, 55, 57
- Hydra, 31, 38–39, 52, 89, 122
 Hydractinia, 89, 91
 Hydroid polyps, 28–29, 36, 51,
 57, 89
- Independence of the individual,
 3 et seq., 20, 99–100, 103
 of cells, 73
 progress of, 66
- Individual, 95, 116, 118
 actual, 121–122
 certain organisms naturally
 regarded as individuals,
 127n1
 continuing, 11–12, 14, 16, 97
 definitions by other writers,
 51, 62–63
 degraded to an organ, 91
 etymology, 62–63, 127n1
 general definition of, 20–21
 heterogeneous, 7–9
 historical, 91, 121–122
 independent, 3
 man the most perfect, 53
 the perfect, 5–6, 15
 physical continuity of
 one individual with its
 offspring, 35
 unconscious use of word by
 average man, 27–28, 127n1
 unified, 7–8
- Individuality, 47, 74–75, 95,
 103, 108–109
 according to Bergson, 1
 and brain, 5, 21, 48–49, 62–
 63, 106–108
 in colonies, 28–31
 compound, 74–75
 etymology of, 62–63, 127n1
 general definition, 20–21
 and heterogeneity, 43–44,
 76–77
 historical, 91, 93, 121–122
 its attributes, 2, 6–7, 10–11,
 20–21
 and man, 25–28, 37, 53,
 108–109
 and matter, 13, 21–23, 112
 and metamorphosis, 55–60
 and personality, 22, 27
 and regeneration, 35–37
 and reproduction, 12–13
 and sex, 51, 54
 simultaneous, 18

- spatial, 18
 - of a species, 15–16, 18, 62
 - temporary, 96–97
 - tendencies and progress of, 21, 88
 - various definitions of, 25, 51, 62–64
- Internal differentiation, 46, 103–104, 105–106
- Jelly-fish
 - artificial production of twins and quadruplets in, 53
 - lack of complexity, 5
 - reproductive in function in Hydroids, 89–91
- Jerboa, thigh-muscles, 66–67
- Kangaroo, size of, 66–67
- Keeble, 96
- Keller, Helen, 100
- Kite, used to bring lightning to earth, 49
- Kubla, 118
- Kupffer's vesicle, 115
- Le Dantec, definition of
 - individual, 62–63
- Lichens, compound species, 93, 103, 122
- Limbo, 26
- Liriope, a jelly-fish, 53
- Liver Fluke, 16–17, 17, 62
- Maitland, 109
- Malaria, 4
- Man, 114, 117, 121, 122
 - communities of, 49, 85, 108–109
 - great independence of, 5
 - and individuality, 25–28, 53
 - the tool-maker, 9–10
- Materialism, errors of, 64
- Medusae, 89–91
- “Merrimac” and “Monitor,”
 - first armoured ships, 87
- Metamorphosis, 55–60, 128n7
 - reason of, 58–60
- Metazoa
 - compound individuals, 28–29, 34
 - and protozoa, 34
- Metschnikoff
 - and death, 128n7
 - and disharmony, 117
- Microscope, 4
- Milton, and life before birth, 26–27
- Minoan dancers at bull-fights, 14
- Monsters, double, 52
- Mutations, and individuality, 61
- Nectarine, produced as bud-sport from peach, 62
- Nelson, 87
- Nemertine worms,
 - metamorphosis in, 55–57, 60
- Nero, 43
- Nerve-cell, 104
- Nervous system, 48
 - supposed basis of individuality, 63

- Newt
 artificial production of twins
 in, 53
 regeneration of lost organs
 by, 36
- Nietzsche, 1, 7
- Nucleus, 45, 113, 129n6, 130n1
 (chap. 4)
 in sexual process, 54, 60
- Organs, and individuals, 91
- Ovum, 35, 121
 division of, into independent
 parts, 51–52, 105
 erroneously supposed to
 contain the potentiality of
 only one individual,
 51–52
- Paramaecium, reproduction
 in, 12
- Parasites, special environment
 of, 86, 96–97, 102
- Particular, in philosophical
 sense, 7
- Peaches, and bud-sports, 62
- Peridineae, 82
- Personality
 corporate, 109
 definition, 22
 and individuality, 27, 63–64
 and matter, 22
- Phagocytes, 59
- Pilidium, strange
 metamorphosis of, 55–57, 60
- Planaria, 111
- Polyzoa, 122, 131n1
- Pores, of Sponges, 69, 73
- Potentiality, 6
- Printing press, 11
- Printing, and increase of
 individuality, 19
- Pronuba, 97–98, 102–103, 108,
 122
- Protoplasm
 its advancing flow, 20
 its properties in relation to
 individuality, 6, 12–13,
 38, 43
- Protozoa
 free-living cells, 29, 121
 and metazoa, 34, 51–52, 91–
 93, 115
 relative lack of independence,
 4
 reproduction in, 12–14
 sexual reproduction in, 51–
 52, 54
 size of, 67
 views as to individuality of,
 51–52
- Psychical research, 22
- Quadruplets, always given
 birth to by one species of
 Armadillo, 52, 53
- Raindrops, influence of
 electricity on, 8
- Regeneration, 8, 13–14, 15, 35–
 37, 113, 127n3
 in Flatworms, 36, 111
 an original attribute of life,
 35–36

- in Protozoa, 36–37, 127n3
 - in Sponges, 71–73
 - in Vertebrates, 36
- Regulation, 8
- Reorganization as opposed to true regeneration, 72, 111, 114–115
- Reproduction
 - asexual, 29–33, 61–62
 - by budding, 29–31
 - by cuttings and slips, 61
 - by fission (division), 32–33
 - and individuality, 13–14, 30–32
 - of molecules, 39
 - not involved in
 - metamorphosis, 58–59
 - in Protozoa, 12–13, 33, 34
 - sexual, 34–35
- Rhynchops, 101
- Rome, 118
- Rook, 101
- Roux
 - extension of idea of natural selection, 4
 - idea of growth, 12–13
- Salamander, replacement of lost organs, 36
- Scurf, 104
- Sea-urchins
 - artificial production of twins, quadruplets, etc., 53
 - metamorphosis, 130n4
 - will die if cut in half, 130n5
- Self-consciousness, implies extensive individuality, 22
- Sense-organs, and individuality, 48, 105–107
- Sexual fusion, 33–35, 51–54, 60–61
 - in Bacteria, 54
 - in Metazoa, 60–61
 - in Protozoa, 51
- Sexual reproduction, 33–34
 - not essential, 35, 53
- Sheep, and Liver Fluke, 16
- Siphonophora, single cells, 67–68
- Siphonophora, 89–93, 107–108, 122
- Size, 48
 - advantages of, 4–6, 65–66
 - disadvantages of, 12–13
- Skeleton, 13
- Skimmer, 101–102
- Sleeping sickness, 97
- Snails, and Liver Fluke, 16–18
- Societies, of man, 49, 108–109, 122
- Solar System, difference from an individual, 7, 15
- Sparrow, 101
- Species, 19–20
- Species-individuality, 15–18, 62
- Speech, increases individuality, 19, 21–22
- Spicules, of Sponges, 70, 73
- Sponges, 68–69, 108, 113, 116, 122
- Sports, in plants, 61
- Stentor, regeneration in, 36–37, 113–114, 127n3
- Stomach, in young nemertines, 55–57

- Stylonychia, reproduction in, 32–33, 33
- Suez Canal, 4
- Suicide, 104
- Surface-tension, 44
 alteration of, by living matter, 41, 65
 effects of, 41, 65
- Surface-volume ratio, 42, 65–67
- Swallow, 101
- Sycon, 113, 131n3 (chap. 4)
- Symbiosis
 definition, 93
 examples of, 93–95
- Syncytia, 105
- Tadpole, change into frog, 55, 57–59
- Tapeworm, 97
- Teeth, in old age, 128n7
- Teleology, errors of, 64
- Teleost fish, 115
- Termites, 9
- Tools
 inorganic organs, 9–10
 part of man's individuality, 21–22, 127n4
- Trees
 duration of life, 19
 in old age, 128n6
- Trypanosomes, 97
- Twins (identical), 52–53
 artificial production of, 52–53
 normal production of, 52–53
- Volvocidae, evolution of, 77–81, 85
- Volvox, 72, 79, 84, 86, 105, 115–116, 121
- Warfare, evolution of, 87–88
- Water, its "metamorphosis," 58
- Weismann, on sex, 35
- Wheeler, 108
- "White ants," 9
- Whitman, 87, 115
- Woodruff, and lack of sexual process in Ciliates, 54
- Wordsworth, 107
- Worms, Nemertine, 55–57, 60
- Wren, size of, 66
- Yolk-sac of unhatched chick, 59
- Yucca-plant, dependence on an insect, 97–99, 102–103, 108, 122
- Zarathustra, his independence of accidents, 1–2, 6
- Zoothamnium, 76
- Zygote
 definition, 35
 fertilized ovum, 51–52
