

Acknowledgments

This book originated in a range of collaborative projects I have been undertaking since 2012, and therefore I am deeply thankful of my numerous collaborators and coauthors, to whom I owe a great deal.

My studies into *EVE Online* have always been guided by the sage advice and wisdom of Martin Gibbs and Michael Arnold, whose contributions were instrumental in helping me establish the scholarliness of my interest in *EVE*. I remain indebted to Torill Elvira Mortensen, Jonas Linderoth, Ashley Brown, and the rest of the *Dark Play* crew for the incredible feedback and advice at their little workshop in Gothenburg. Acknowledgments are also owed to T. L. Taylor for making sure I met Kelly Bergstrom at DiGRA 2013, whose fascinating work on *EVE* helped me improve my own. To Kelly and the rest of the *EVE* scholars, particularly my coauthors Darryl Woodford, Chris Paul, Nick Webber, and Oskar Milik, it's a big (virtual) universe to study, and I'm glad I got to research it with you. Internet spaceships *are* serious business.

I'm also very lucky to have had an excellent graduate student, Fraser Allison, to whom I owe a sincere apology for distracting him from his PhD so often to write about *DayZ* with

me. Massive thanks are also owed to Dean Hall; without his incredible game and support of the research, I would not have been able to learn so much from all the players who gave their time to the research.

Tracing back even further, I owe a great deal to Vicki Compton, who introduced me to *Survivor* in 2008. I sincerely, and without reservation, admit I was wrong to have thought it was “just another reality TV show.” Forty seasons later, I’m amazed you still put up with me constantly pausing each episode to critique each player’s strategic decisions.

This book has benefited from substantial advice and mentorship from several generous colleagues. Thanks to Chris Paul (again!) for his feedback on the manuscript proposal; Mia Consalvo, my “ultimate peer reviewer”; the other Playful Thinking series editors; my anonymous reviewers; and Doug Sery at MIT Press for the constructive criticisms of the project and your support for the book. Thank you also to Nick Enfield and the Sydney Social Sciences and Humanities Advanced Research Centre for the support in finishing the book.

My research would not be possible without the support and contributions of the players; thanks for letting me take your play seriously and letting me into your worlds. Thanks to Endie for many added insights into the espionage involved in the Fountain War (who thought it was a good idea to try to study something people work very hard to keep hidden?) and to my fellow zombie-apocalypse survivors Andrew and Jake. Andrew, if you hadn’t been so gullible, I’d be a whole chapter short.
