The open access edition of this book was made possible by generous funding from Arcadia—a charitable fund of Lisbet Rausing and Peter Baldwin.

The MIT Press would like to thank the anonymous peer reviewers who provided comments on drafts of this book. The generous work of academic experts is essential for establishing the authority and quality of our publications. We acknowledge with gratitude the contributions of these otherwise uncredited readers.

This book was set in LaTeX by the author.

#### Library of Congress Cataloging-in-Publication Data

Names: Rosiak, Daniel, author.

Title: Sheaf theory through examples / Daniel Rosiak.

Description: Cambridge, Massachusetts : The MIT Press, [2022] | Includes bibliographical references and index.

Identifiers: LCCN 2021058949 | ISBN 9780262542159 (paperback)

Subjects: LCSH: Sheaf theory.

Classification: LCC QA612.36 .R67 2022 | DDC 514/.224—dc23/eng20220521

LC record available at <https://lccn.loc.gov/2021058949>
