The MIT Press would like to thank the anonymous peer reviewers who provided comments on drafts of this book. The generous work of academic experts is essential for establishing the authority and quality of our publications. We acknowledge with gratitude the contributions of these otherwise uncredited readers.

This book was set in Adobe Garamond Pro and Berthold Akzidenz Grotesk by Westchester Publishing Services.

Library of Congress Cataloging-in-Publication Data is available.

Names: Smith, Jessica M., author.

Title: Extracting accountability : engineers and corporate social responsibility / Jessica M. Smith.

Description: Cambridge, Massachusetts : The MIT Press, [2021] |

Series: Engineering studies | Includes bibliographical references and index.

Identifiers: LCCN 2020052840 | ISBN 9780262542166 (paperback)

Subjects: LCSH: Engineering ethics. | Social responsibility of business.

Classification: LCC TA157 .S588 2021 | DDC 174/.962--dc23

LC record available at <https://lccn.loc.gov/2020052840>
