Guide for authors preparing electronic documents

**DO**

Enter text in the style and following order of the journal:

- Title
- Authors
- Address
- Abstract
- Introduction
- Materials and methods
- Results
- Discussion
- Acknowledgements
- References
- Figure legends
- Tables
- Abbreviations
- Running heads.

Save any tables, diagrams, figures, graphs or illustrations generated electronically as separate files and not embedded into the text file.

Type references as near to Carcinogenesis style as possible with no space between names and initials of individual authors, the Journal titles italicized and volume numbers bold.

Type unjustified, without hyphenation, except for compound words.

Type headings in the style of the journal.

Use the TAB key once for paragraph indents.

Where possible use Times for the text font and Symbol for the Greek and special characters.

Use the word processing formatting features to indicate **Bold**, *Italics*, Greek, Maths, *Superscript* and *Subscript* characters.

Indicate clearly any special characters that you have drawn by hand.

Check the final copy of your paper carefully, as any spelling mistakes and errors will be faithfully translated into the typeset version. In the case of a mismatch between disk and hard copy, the hard copy will be taken as the definitive version.

Indicate on the form overleaf the contents of each file.

Supply three hard copy printouts of the paper.

**DO NOT**

Enter carriage returns to obtain spacing between lines, paragraphs, references etc. The space required is generated automatically by the typesetters.

Use double spaces after each sentence within a paragraph.

Use the automatic page numbering, running titles and footnote features of your word processing programme. Number the hard copies by hand at the bottom of the page.

Include any copyright material (e.g. word processor software or operating system files) on the disk.

**DISK SUBMITTAL**

After the manuscript has gone through all the review and editing stages, copy the data on to a clean newly formatted disk. To avoid confusion do not copy any irrelevant files and/or back-up files onto the disk.

Apple Mac users should ensure the disk wastebasket is empty before submitting the disk.

Use the first-named author’s name or manuscript number for the disk label and the file name.

To avoid loss or damage in transit ensure that the disk is adequately protected and always keep a copy of the data on your computer and/or back-up disk.

OUP does not intend to return the disk to the originator.

For further information contact:

Journals Department
Science, Medical & Journals Division, Oxford University Press
Walton Street, Oxford OX2 6DP, UK
Telephone: (+44 865 or 0865) 56767 Telefax: (+44 865 or 0865) 267773
OUP Journals Manuscript/Disk Submittal Form

Completion of all the relevant sections of this form will assist in the swift and efficient publication of your paper.

Instructions to authors

Scope and policy of Carcinogenesis

Carcinogenesis is a multi-disciplinary journal designed to bring together all the varied aspects of research which will ultimately lead to the prevention of cancer in man. The journal will publish full papers and short communications which warrant publication in the areas of viral, physical and chemical carcinogenesis and mutagenesis; factors modifying these processes such as DNA repair, genetics and nutrition; metabolism of carcinogens; the mechanism of action of carcinogens and promoting agents; epidemiological studies; and the formation, detection, identification and quantification of environmental carcinogens. Accelerated papers are of important and timely work chosen by the editors which merit a rapid review process followed by rapid publication (~ 6 weeks). The editors may, at their discretion, invite commentaries or short reviews. Authors wishing to submit a commentary or review should contact one of the Editors before submission.

Submission of manuscripts

The manuscript (the original and two copies), along with a cover letter addressed to the editor, should be submitted to one of the editorial offices:

For Europe, Japan and the Rest of the World: For The Americas: Dr A.Dipple and Dr C.C. Harris, Carcinogenesis Editorial Office, NCI-FCRDC, PO Box B, Frederick, MD 21702, USA. For Europe, Japan and the Rest of the World: Dr R.C. Gurner, Carcinogenesis Editorial Office, University Road, Heslington, York YO1 5DU, UK.

Submission of a manuscript implies that it reports unpublished work and that it is not under consideration for publication elsewhere. If previously published tables, illustrations or more than 200 words of text are to be included, then the copyright holder's written permission must be obtained. Enclose copies of any such permission letters with your paper.

To decrease the time required for evaluation, the facsimile machine is now frequently used. The copies of manuscripts used for review will not ordinarily be returned to the authors unless specifically requested. Such a request will be used at the editor's discretion and will delay the processing of the manuscript.

Manuscripts should be in their final form when they are submitted so that proofs can be reviewed immediately for typographical errors and returned to the publishers by express (special delivery) post. Alternatively, to save time corrections may be returned to the editors by telephone (01865) 267773. Essential changes of an extensive nature may also be given by telephone to Oxford University Press, telephone number (01865) 267773. Technical changes or amendments suggested by the reviewers may be inserted during the review process. If a manuscript is accepted for publication, submission of the final version of the manuscript on lined paper will be allowed. The copies of manuscripts used for review will not ordinarily be returned to the authors. The copies which the reviewers have sent will be retained by Carcinogenesis for diverse use.

Authors who insist on amendment within the text at the page-proof stage.

Proofs

Authors will be sent page proofs. To avoid delays in publication, proofs should be checked immediately for typographical errors and returned to the publishers by express (special delivery) post. Alternately, to save time corrections may be returned to the editors by telephone or fax. Number each page top right (Title Page is 1). Please avoid footnotes, use instead, and as sparingly as possible, parenthesis within brackets. Underline only words or letters to appear in italics. Clearly identify unusual or handwritten symbols and Greek letters. Differentiate between the letter O and zero, and the letters I and l and number 1. Mark the position of each figure and table in the margin.

Abstract

The second page of every manuscript must contain only the Abstract, which should be a single paragraph not exceeding 300 words. Please abide strictly by this limitation. The Abstract should be comprehensible to readers before they have read the paper, and abbreviations and reference citations should be avoided.

Acknowledgements

These should be included at the end of the text and not in footnotes. Personal acknowledgements should precede those of institutions or agencies.

References

Authors are responsible for the accuracy of the References. Published articles and those in the press (the state the journal which has accepted them) may be included. Arrange references in numerical order with the numbers in the text in brackets and on the line (not as superscripts). Note that all authors' names should be mentioned and the initials follow the name; the date should precede the title; the title should be italicized or underlined if of full; the name of the journal should be abbreviated according to the World List of Scientific Periodicals and underlined to indicate in-text references.

References should therefore be listed as follows:

Personal communications (J. Smith, personal communication) should be authorized by those involved, in writing, and unpublished data should be cited as (unpublished data). Both should be used as sparingly as possible and only when the unpublished data referred to is peripheral rather than central to the discussion. References to manuscripts in preparation, or submitted but not yet accepted, should be cited in the text as (B. Smith and N. Jones, in preparation) and should NOT be included in the list of references.

Tables

Tables should be typed on separate sheets and numbered consecutively with Roman numerals. Tables should be self-explanatory and include a brief descriptive title. Footnotes to tables indicated by lower case letters are acceptable, but they should not include extensive tabular data. An arrow in the text margin should be used to indicate a table should be inserted in the text.

Illustrations

All illustrations (line drawings and photographs) should be referred to in the text as Figure 1 etc., which should be abbreviated to 'Fig.' only in the figure legend. Write the title of your paper, the name of the first author and the figure number lightly in blue pencil on the back of each figure. On the back also indicate clearly the top margin of each figure. On the manuscript indicate with an arrow in the margin the most appropriate position for the figure.

Photographs: These must be submitted in the desired final size so that reduction can be avoided. The type area of a page is 248 (height) x 185 mm (width) and photographs, including their legends, should not exceed this area. A single column is 88 mm wide. A double column is 185 mm wide. Ideally, photographs should fit either a single column or a double column. Photographs should be of sufficiently high quality with respect to detail, contrast and freedom of grain to withstand printing. Do not include extensive experimental detail. An arrow in the text margin should be used to indicate the magnification by a rule on the photographs.

Colour plates: Inclusion of colour plates will be subject to a special charge.

Line drawings: Please provide these as clear, sharp prints, suitable for reproduction as submitted. No additional artwork, redrawing or typesetting will be done. Therefore, all labelling should preferably be made with a lettering set. Ensure that the size of lettering is in proportion with the overall dimensions of the drawing. Ideally, line drawings should be submitted in the desired final size to avoid reduction. Minimum dimension is 185 mm. If reduction is unavoidable, the type area should fit either a single (88 mm) or a double column width (185 mm). If submitting line drawings which require reduction, please check that the lettering will be clearly legible after the drawing has been reduced to the size at which it will be printed. After reduction, letters should not be smaller than 1.5 mm in height.

Figures legends: These should be on a separate, numbered manuscript sheet. Define all symbols and abbreviations used in the figure. Common abbreviations and others in the preceding text should not be redefined in the legend.

Conventions

In general, the journal follows the conventions of the CBE Style Manual (Council of Biology Editors, Bethesda, MD, 1983, 5th ed.). Follow Chemical Abstracts and its indexes for chemical names. For guidance in the use of biochemical terminology follow the recommendations issued by the IUPAC-IUB Commission on Biochemical Nomenclature, as given in Biochemical Nomenclature, and Related Documents, published by the Biochemical Society, UK. For enzymes, use the recommended name assigned by the IUPAC-IUB Commission on Biochemical Nomenclature, 1978, as given in Enzyme Nomenclature, published by Academic Press, New York, 1980. Where possible, use the recommended SI (Systeme International) units.

Genotypes should be italicized (underline in typed copy); phenotypes should not be italicized. For bacterial genetics nomenclature follow Demerec et al. (1966) Genetics, 54, 61-76.

Abbreviations

Try to restrict the use of abbreviations to SI symbols and those recommended by the IUPAC-IUB Commission on Biochemical Nomenclature and defined in brackets after their first mention in the text. Standard units of measurements and chemical symbols of elements may be used without definition in the body of the paper.

Reprints

The publishers supply 30 reprints free of charge. Reprint order forms are sent out with the proofs, and must be returned with the proofs to Oxford University Press if extra reprints are required. Late orders submitted after the journal is printed are subject to increased prices.
