FUTURE ANNUAL MEETINGS OF THE AMERICAN ASSOCIATION FOR CANCER RESEARCH

2003 April 5-9, Toronto, Ontario, Canada
2004 March 27-31, Orlando, FL
2005 April 16-20, Anaheim, CA

AACR SPECIAL CONFERENCES IN CANCER RESEARCH

A number of meetings are now being organized in the AACR's series of smaller scientific meetings. Following are the topics, dates, locations, and program committees for these meetings. When full details of each meeting are available, AACR members will be the first to receive complete brochures and application forms for participation in these important conferences. Nonmembers may receive this information by sending their names and addresses to Meetings Mailing List, American Association for Cancer Research, Public Ledger Building, 150 South Independence Mall West, Suite 826, Philadelphia, PA 19106-3483. Up-to-date program information is also available via the Internet at the AACR's website (<http://www.aacr.org>).

Correction

In the article by J-W. Liu *et al.*, entitled “Identification and Characterization of Bim γ , a Novel Proapoptotic BH3-only Splice Variant of Bim,” which appeared in the May 15, 2002 issue of *Cancer Research* (pp. 2976–2981), Figure 2 appeared incorrectly. In Part C, ATG should be placed in the beginning part of exon 2. In Parts B and D, mBim γ is actually BB653788, which is identical to mBimL except for 2 missing bases (572C and 594A) that most likely resulted from sequencing errors. The mouse sequence BI555336 (p. 2978, right column, second paragraph) is closer to the human Bim γ but it lacks the BH3 domain. We wish to acknowledge Dr. Philippe Bouillet for his helpful discussions on these points.
