An error appeared in the 15 October 2023 issue of the journal (McCreary et al. “Antibiotic Myths for the Infectious Diseases Clinician.” Clin Infect Dis 77(8): 1120–1125. https://doi.org/10.1093/cid/ciad357). The article contains the statement: “However, clinical studies, including a randomized controlled trial by Cosgrove et al, did not demonstrate any benefit in patient outcomes when gentamicin was added to the PVE treatment regimen [53]. Instead, the authors observed increased acute renal injury with gentamicin. Subsequent studies on staphylococcal PVE found no difference in mortality with the addition of gentamicin [54].” This statement should be revised to, “However, Cosgrove et al did not demonstrate any benefit in patient outcomes when gentamicin was added to treatment regimens for patients with S. aureus bacteremia and native valve endocarditis [53]. Instead, the authors observed increased acute renal injury with gentamicin. Subsequent studies on staphylococcal PVE found no difference in mortality with the addition of gentamicin [54].”
