

**Computational Linguistics in the Netherlands 1998: Selected Papers from the Ninth CLIN Meeting**

**Frank Van Eynde, Ineke Schuurman, and Ness Schelkens (editors)**

Amsterdam: Editions Rodopi (Language and Computers: Studies in practical linguistics, edited by Jan Aarts and Willem Meijs, volume 29), 2000, vii+233 pp; hardbound, ISBN 90-420-0609-9, \$69.00, Dfl 125.00; paperbound, ISBN 90-420-0599-8, \$22.00, Dfl 20.00

The volume contains revised versions of 14 papers that were first presented at the ninth annual Computational Linguistics in the Netherlands conference, held in Leuven, Belgium, in December 1998. The contents of the volume are as follows:

- "Instance families in memory-based language learning" by Antal van den Bosch
- "On the arbitrariness of lexical categories" by Gert Durieux, Walter Daelemans, and Steven Gillis
- "An FGREP investigation into phonotactics" by Peter Kleiweg and John Nerbonne
- "Exploring phonotactics with simple recurrent networks" by Ivelin Stoianov and John Nerbonne

"Style adaptation of statistical language models" by Dong Hoon Van Uytsel, Patrick Wambacq, and Dirk Van Compernelle

"Memory-based word sense disambiguation" by Jorn Veenstra, Antal van den Bosch, Sabine Buchholz, Walter Daelemans, and Jakub Zavrel

"The Amazon grammar and the last part of the middle field" by Simon van Dreumel

"Position of Polish clitics: An HPSG approach" by Anna Kupść

"Null-headed nominals in German and English" by John Nerbonne and Tony Mullen

"Corpus-based analysis of parenthetical reporting clauses" by Carla Schelfhout

"Figure heads in HPSG" by Frank Van Eynde

"A modern computational linguistics course using Dutch" by Gosse Bouma

"XML mixed content grammars" by Pim van der Eijk and Dennis Janssen

"Evaluation of the NLP components of the OVIS2 spoken dialogue system" by Gert Veldhuijzen van Zanten, Gosse Bouma, Khalil Sima'an, Gertjan van Noord, and Remko Bonnema
