

Letter to the Editor

Dear Editor

In her review of our book *Memory-based Language Processing*, which appeared in *Computational Linguistics*, Issue 32(4), Sandra Kübler comments on the illegibility of the phonetic font. Unfortunately, she had an early copy; the book was reprinted as soon as this problem was noticed, and Cambridge University Press has offered to replace any remaining misprinted copies with reprints upon request. This applies to copies with incorrectly overlapping phonetic symbols on pages 28, 59–63, and 108. They may be sent to Helen Barton, 3rd Floor, The Edinburgh Building, Cambridge University Press, Shaftesbury Road, Cambridge, UK, CB2 2RU. Postage will also be reimbursed if a receipt for the cost is provided.
