## Web Audio Conference 2021

The sixth Web Audio Conference (WAC) will be held in spring 2021 at the Universitat Pompeu Fabra in Barcelona, Spain. As stated by the organizers, WAC is an international conference dedicated to Web audio technologies and applications. The conference addresses academic research, artistic research, development, design, evaluation, and standards concerned with emerging audio-related Web technologies such as Web Audio API, WebRTC, WebSockets, and Javascript. The conference welcomes Web developers, music technologists, computer musicians, application designers, industry engineers, R&D scientists, academic

researchers, artists, students, and people interested in the fields of Web development, music technology, computer music, audio applications, and Web standards. Previous editions of WAC were held in 2015 at IRCAM and Mozilla in Paris; in 2016 at Georgia Tech in Atlanta, Georgia; in 2017 at the Centre for Digital Music, Queen Mary University of London; in 2018 at the Technical University of Berlin; and 2019 at the Norwegian University of Science and Technology in Trondheim.

The conference proceedings will include talks, research presentations, musical performances, and workshops related to Web audio technologies and creative practices.

Suggested areas of interest include Web standards for audio and music such as Web Audio, WebMIDI, and WebRTC; development tools, practices, and strategies of Web audio applications; innovative audio-based Web applications; Web-based music composition, production, delivery, and experience; audio engines and audio processing; cloud-based strategies for music production and live performances; audio data and metadata formats and network delivery; frameworks for audio synthesis, processing, and transformation; Web-based audio visualization and/or sonification; and collaborative environments for audio and music generation.
