

Books Received

Atlas of Normal and Abnormal Mammograms. Ted Nathan. Oxford, U.K.: Oxford University Press, 1982. 180 pp. £30.00.

Biochemistry and Function of Phagocytes. *Series: Advances in Experimental Medicine and Biology*, Vol. 141. F. Rossi and P. Patriarca (eds.). New York: Plenum Press, 1982. 699 pp. \$75.00.

Biological Reactive Intermediates-II; Chemical Mechanisms and Biological Effects. *Series: Advances in Experimental Medicine and Biology*, Vol. 136A and 136B. Robert Snyder, Dennis V. Parke, James J. Kocsis, David J. Jollow, G. Gordon Gibson, and Charlotte M. Witmer (eds.). New York: Plenum Press, 1982. Part A: pp. 1-846; Part B: pp. 847-1476. \$125.00.

Cancer Biology. Raymond W. Ruddon. Oxford, U.K.: Oxford University Press, 1981. 300 pp. £7.50.

Cancer: The Facts. Sir Ronald Bodley Scott. Oxford, U.K.: Oxford University Press, 1979. 208 pp. £4.50.

Carcinogenic and Mutagenic N-Substituted Aryl Compounds. *Series: National Cancer Institute Monographs*. John L. Ziegler (ed.). Bethesda, Md.: United States Department of Health and Human Services, NIH, 1981. 258 pp. Proceedings of an international conference held in Rockville, Md., November 7-9, 1979. Available only from the Superintendent of Documents, United States Government Printing Office, Washington, D.C. 20402.

The Causes of Breast Cancer. Richard Doll and Richard Peto. Oxford, U.K.: Oxford University Press, 1982. 144 pp. £4.95.

Chromosome Damage and Repair. *Series: A: Life Sciences, NATO Advanced Institutes Series*, Vol. 40. Erling Seeberg and Kjell Kleppe (eds.). New York: Plenum Press, 1981. 623 pp. \$69.50.

Cocarcinogenesis and Biological Effects of Tumor Promoters. *Series: Carcinogenesis: A Comprehensive Survey*, Vol. 7. Erich Hecker, W. Kunz, F. Marks, N. E. Fusenig, and H. W. Thielmann (eds.). New York: Raven Press, 1982. 692 pp. \$69.00.

Combination Antibiotic Therapy in the Compromised Host. *Series: European Organization for Research on Treatment of Cancer (EORTC) Monograph Series*, Vol. 9. J. Klastersky and M. Staquet (eds.). New York: Raven Press, 1981. 260 pp. \$28.50.

Drug Disposition in Humans: The Basis of Clinical Pharmacology. William J. Creasey. Oxford, U.K.: Oxford University Press, 1979. 237 pp. £7.50.

Environmental Factors in Human Growth and Development. (Former title: *Environmental Effects on Maturation*.) *Series: Banbury Report Series*, Vol. 11. Vilma Hunt, M. Kate Smith, and Dorothy Worth (eds.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory, 1982. 570 pp. \$75.00, \$90.00 outside the United States.

Eukaryotic Viral Vectors. Yakov Gluzman (ed.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory, 1982. 232 pp. \$32.00, \$38.40 outside the United States.

* Book may be ordered directly from the publisher: Cold Spring Harbor Laboratory, Fulfillment Department, P.O. Box 100, Cold Spring Harbor, N.Y. 11724.

Expression of Differentiated Cancer Cells. Roberto Revoltella (ed.). New York: Raven Press, 1982. 525 pp. \$57.50.

Gene Amplification. Robert T. Schimke (ed.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory, 1982. 340 pp. \$35.00, \$42.00 outside the United States.

Genes and Tumor Genes. *Series: 9th Workshop Conference (HOECHST)*. Ernst L. Winnacker and Hans-H. Schone (eds.). New York: Raven Press, 1982. 170 pp. \$22.00.

Hybridomas in Cancer Diagnosis and Treatment. *Series: Progress in Cancer Research and Therapy*, Vol. 21. Malcolm S. Mitchell and Herbert F. Oettgen (eds.). New York: Raven Press, 1982. 288 pp. \$30.00.

Hybridoma Techniques. George Kohler (ed.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory, 1981. 65 pp. \$15.00, \$18.00 outside the United States.

Iatrogenic Diseases: Update. P. F. D'Arcy and J. P. Griffin. Oxford, United Kingdom: Oxford University Press, 1981. 200 pp. £25.00.

Infections in Cancer Patients. *Series: European Organization for Research on Treatment of Cancer (EORTC) Monograph Series*, Vol. 10. Jean Klastersky (ed.). New York: Raven Press, 1981. 255 pp. \$25.00.

International Symposium on Management of Superior Pulmonary Sulcus Syndrome (Pancoast Syndrome). *Series: Advances in Pain Research and Therapy*, Vol. 4. John J. Bonica, Vittorio Ventafridda, Carlo A. Pagni, and Louisa E. Jones (eds.). New York: Raven Press, 1982. 320 pp. \$36.00.

Leukaemia: A Series of Workshops on the Biology of Human Cancer. Report No. 14. *Series: UICC Technical Report Series*, Vol. 6. N. L. Warner and D. Metcalf (eds.). Geneva: International Union Against Cancer 1982. 232 pp. \$22.00, Sw. fr. 44. Exclusively distributed by Hans Huber Publishers, 76, Länggassstrasse, 3000 Bern 9, Switzerland.

Lymphokines and Thymic Hormones: Their Potential Utilization in Cancer Therapeutics. *Series: Progress in Cancer Research and Therapy*, Vol. 20. Allan L. Goldstein and Michael A. Chirigos (eds.). New York: Raven Press, 1981. 344 pp. \$38.00.

Lymphomas Other Than Hodgkin's Disease. A. E. Stuart, A. G. Stansfeld, and I. Lauder. Oxford, U.K.: Oxford University Press, 1981. 75 pp. £10.00.

Mitochondrial Genes. *Series: Monograph Series*, Vol. 12. P. Slonimsky and G. Attardi (eds.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory, 1982. 550 pp. \$65.00, \$78.00 outside the United States.

Molecular Biology of Tumor Viruses: RNA Tumor Viruses. *Series: Monograph Series*, Vol. 10C. Robin A. Weiss, Natalie M. Teich, Harold E. Varmus, and John M. Coffin (eds.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory, 1982. 1350 pp. \$110.00, \$132.00 outside the United States.

The Molecular Biology of the Yeast *Saccharomyces*. *Series: Monograph 11A, Life Cycle and Inheritance*. Jeffrey N. Strathern, Elizabeth

Books Received

W. Jones, and James R. Broach (eds.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory,¹ 1982. 944 pp. \$75.00, \$90.00 outside the United States.

Molecular Interrelations of Nutrition and Cancer (M. D. Anderson Symposia on Fundamental Cancer Research, 34th). Marilyn S. Arnot, Jan van Eyz, and Yeu-Ming Wang (eds.). New York: Raven Press, 1981. 520 pp. \$58.00.

New Approaches in Cancer Therapy. Series: New Drugs and Combined Modality on Treatment of Cancer (EORTC) Monograph Series, Vol. 11. H. Cortés Funes and M. Rozenzweig (eds.). New York: Raven Press, 1982. 225 pp. \$24.50.

Organization of the Cytoplasm. Series: Cold Spring Harbor Symposia on Quantitative Biology, Vol. 46. Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory,¹ 1982. 1024 pp. \$130.00, \$156.00 outside the United States.

The Potential Role of T Cells in Cancer Therapy. Series: Progress in Cancer Research and Therapy, Vol. 22. Alexander Fefer and Allan L. Goldstein (eds.). New York: Raven Press, 1982. 320 pp. \$37.00.

Principles and Methods in Toxicology. A. Wallace Hayes (ed.). New York: Raven Press, 1982. 750 pp. \$65.00.

Protein Phosphorylation. Series: Cold Spring Harbor Conferences on Cell Proliferation, Vol. 8. Ora M. Rosen and Edwin G. Krebs (eds.).

Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory,¹ 1981. 421 pp., 2-book set. \$140.00, \$168.00 outside the United States.

Quantification of Occupational Cancer. Series: Banbury Report 9. Richard Peto (ed.). Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory,¹ 1981. 750 pp. \$89.00, \$106.80 outside the United States.

Readings in Developmental Neurobiology. Paul H. Patterson and Dale Purves. Cold Spring Harbor, N.Y.: Cold Spring Harbor Laboratory,¹ 1982. 712 pp. \$38.50, \$46.20 outside the United States.

The Role of Tamoxifen in Breast Cancer. Series: Progress in Cancer Research and Therapy, Vol. 23. Stefano Iacobelli, Marc E. Lippman, and Della Robustelli. New York: Raven Press, 1982. 144 pp. \$17.00.

Toxicology of the Liver. Series: Target Organ Toxicology Series. Gabriel L. Plaa and William R. Hewitt (eds.). New York: Raven Press, 1982. 375 pp. \$41.00.

Trends in Cancer Incidence: Causes and Practical Implications. Knut Magnus (ed.). New York: Hemisphere Publishing Corporation, 1982. 464 pp. \$49.50.

Tumor Imaging: Current State of the Art and Recommendations for Future Research. David G. Bragg and William R. Hendee. Norwalk, Conn.: Appleton-Century-Crofts, 1982. 150 pp.

New Journals

Anticancer Research, International Journal of Cancer Research and Treatment. J. G. Delinassios (ed.). Athens, Greece: J. G. Delinassios, 1982. \$118.00 United States personal, \$180.00 institutional. **Anticancer Research** is published bimonthly. Articles include original work on all aspects of experimental and clinical research. The editorial policy suggests that priority be given to papers advancing the efforts toward the understanding of cancer causes and to papers activating the application of results of basic research to cancer diagnosis, prognosis, and therapy.

Cancer Surveys: Advances and Prospects in Clinical, Epidemiological and Laboratory Oncology. L. M. Franks and Caroline B. Wigley (eds.). Oxford, U.K.: Oxford University Press, 1982. \$89.00 United States, £36.00 U.K., £39.00 elsewhere. A quarterly journal which aims to provide a comprehensive review of areas in oncology and related

fields in which there is current scientific or clinical interest. A major objective is to bridge the gap between the clinic, the laboratory, and the epidemiologist in the field.

Adverse Drug Reactions and Acute Poisoning Reviews. D. M. Davies and H. de Glanville (eds.). Oxford, U.K.: Oxford University Press, 1982. \$65.00 United States, £27.00 U.K., £30.00 elsewhere. The goal of this new quarterly journal is to provide a single source of information on adverse drug reactions and acute poisoning by gathering together the increasing numbers of case reports and articles of these subjects being published in a wide range of medical literature throughout the world. The journal articles should present critical and exhaustive reviews of current knowledge and new developments in these fields. Each issue provides three or four in-depth reviews of selected aspects by recognized authorities.

Erratum

The following error occurred in the July 1982 article by T. Nakadate *et al.*, entitled "Inhibition of 12-O-Tetradecanoylphorbol-13-acetate-induced Epidermal Ornithine Decarboxylase Activity by Phospholipase

A₂ Inhibitors and Lipoxigenase Inhibitor." On page 2843, in Table 3, the value given for ODC activity of the mice treated with arachidonic acid was incorrect. The correct value is "0.12 ± 0.03."
