Erratum

An error has been found in the article by Manchester *et al.*, entitled “Determinants of Polycyclic Aromatic Hydrocarbon-DNA Adducts in Human Placenta,” from the March 15, 1992, issue of *Cancer Research* (pp. 1499–1503). In the “Abstract” (p. 1499) and the “Results” section (p. 1451), the mean AHH activities are mistakenly reported as 13.0 ± 4.0 (mean \pm SE) pmol 3-OH-BP mg protein⁻¹ min⁻¹ and 1.3 ± 3.7 pmol 3-OH-BP mg protein⁻¹ min⁻¹. The correct geometric means (derived from the data in Table 1) are 3.9 ± 2.4 (mean \pm SE) pmol 3-OH-BP mg protein⁻¹ min⁻¹ for the placentas in which BPDE-DNA adducts were detected and 0.4 ± 0.2 pmol 3-OH-BP mg protein⁻¹ min⁻¹ for the placentas in which BPDE-DNA adducts were not detected. The *P* value of 0.03 (Student's *t* test) is correct.

Retraction

The article entitled “T-Cell Receptor V β Gene Expression Differs in Tumor-infiltrating Lymphocytes within Primary and Metastatic Melanoma,” by T. Nitta, R. Bell, K. Okamura, K. Sato, and L. Steinman, which appeared in the October 15, 1991, issue of *Cancer Research* (pp. 5565–5569), has been retracted by its first author, Dr. Taizo Nitta, because it contains a number of serious inaccuracies and because Dr. Lawrence Steinman and Dr. Robert Bell were listed as authors of the article without their knowledge or permission. The Editors of *Cancer Research* were informed of this situation by Dr. Steinman and Dr. Bell.
