## Errata

An error has been found in the article by Wang *et al.*, which appeared in the February 15, 1993 issue of *Cancer Research* (pp. 717–720). The primers in the “Materials and Methods” section (p. 717) are incorrect. They should be: hnm23c 5': AAGAATTCGGGTGCTGGCGGCTG and hnm23c 3': GAGAATTC AATGGTCTGCCCTCC.

There is an error in the article by Skrincoosky *et al.*, which appeared in the June 1, 1993 issue of *Cancer Research* (pp. 2667–2675). In the “Abstract” (p. 2667), the following section is incorrect: “<sup>125</sup>I-labeled polymerized galaptin. In a Western blot of A121 cell extracts separated by sodium dodecyl sulfate-polyacrylamide gel electrophoresis, bound to a unique cellular protein having a molecular mass of 110 kDa.” It should read: “In a Western blot of A121 cell extracts separated by sodium dodecyl sulfate-polyacrylamide gel electrophoresis, <sup>125</sup>I-labeled polymerized galaptin bound to a unique cellular protein having a molecular mass of 110 kDa.”

An error has been found in the article by Davies *et al.*, in the May 1, 1993 issue of *Cancer Research* (pp. 2087–2091). The incorrect version of Fig. 4 was printed (p. 2089). Fig. 4 is reproduced correctly below.

Fig. 4. Survival of mice bearing the Hu xenograft following treatment with 40 mg BB-94/kg/day or vehicle control as indicated. Mice were treated either from day 3 (A) or day 7 (B) after the introduction of xenograft until day 21 or death, whichever was first.
