Retraction of: Statin enhances cytokine-mediated induction of nitric oxide synthesis in vascular smooth muscle cells

Yoshiyuki Hattori¹, Nobuo Nakanishi², and Kikuo Kasai¹

¹Department of Endocrinology and Metabolism, Dokkyo University School of Medicine, Mibu, Tochigi, 321-0293, Japan; and ²Department of Biochemistry, Meikai University School of Dentistry, Sakado, Saitama, Japan

This article has been retracted by the journal due to it being highly redundant in both data and text with another publication.¹

Retraction of: NO suppresses while peroxynitrite sustains NF-κB: a paradigm to rationalize cytoprotective and cytotoxic actions attributed to NO

Yoshiyuki Hattori¹,*, Kikuo Kasai¹, and Steven S. Gross²

¹Department of Endocrinology and Metabolism, Dokkyo University School of Medicine, Mibu, Tochigi, 321-0293, Japan; and ²Department of Pharmacology and the Program in Biochemistry and Structural Biology, Weill Medical College of Cornell University, New York, NY, USA

This article has been retracted by the journal due to the fact that it contains data that are identical to those shown in a previously published article:

In Fig. 2A, the photomicrographs of cells in (a) (“control”) and (b) (“LPS”) are the same as those shown in Fig. 1C (a) (“control”) and (b) (“TNFα”) of a previous article by this group¹ (except that the image in (a) is turned 180°). In Fig. 2B, the leftmost three bands (for “Cont”, “LPS”, and “+ NOR3”) are the same as those shown Fig. 1B (for “Cont”, “TNFα”, and “TNFα + competitor”) of the previous article¹ (except that the latter lanes are underexposed).
