Biography
Dr Catherine Boileau
Inserm U1148-LVTS and AP-HP, Département de Génétique, Hôpital Bichat, Université Diderot Paris, 46 rue Henri Huchard, 75018, France.
Tel: +33 1 40 25 75 21/28; fax: +33 1 40 25 86 02, E-mail: catherine.boileau@inserm.fr

Professor Catherine Boileau is current Head of the Genetics Department at Bichat University Hospital in Paris, and Professor of Medical Genetics at University Paris Diderot. She is also Director of Research of the Northern Paris University hospitals (AP-HP).

She has headed INSERM research teams since 1994. Presently she co-heads the ‘Structural cardiovascular diseases’ Team at INSERM U1148 (Laboratory for Vascular Translational Science). Her research interests focus on identifying the genetic component of vascular diseases, through the identification of disease genes, susceptibility factor and modifier genes in two models of inherited diseases: familial hypercholesterolaemia and inherited thoracic aortic aneurysm and dissection. Professor Boileau has authored more than 300 articles in peer-reviewed international journals.

Professor Boileau headed for 5 years the Scientific Advisory Board of the French Rare Diseases Foundation and is an active member of the French National Atherosclerosis Society, the European and American Societies of Human Genetics and Cardiology. She is also a member of the Directoire (Governing board) and the CME (Medical Board) of the Paris University Hospitals (AP-HP).
