<https://doi.org/10.2337/db21-er04a>

In Table 2 of the above-cited article, mean \pm SD (minimum, maximum) data for 24-h energy expenditure (kcal/day) during high-fat overfeeding was inadvertently reported as $2,150 \pm 31$ (1,555, 3,114). The correct value is $2,150 \pm 315$ (1,555, 3,114). The editors apologize for the typographical error.

The online version of the article (<https://doi.org/10.2337/db19-0719>) has been updated with the correct data.
