

Addendum

Addendum. 7. Diabetes Technology: Standards of Medical Care in Diabetes—2020. Diabetes Care 2020;43(Suppl. 1):S77–S88

American Diabetes Association

<https://doi.org/10.2337/dc20-ad08c>

Section 7, Diabetes Technology, of the *Standards of Medical Care in Diabetes—2020* has been annotated to include the results of a 6-month randomized, multicenter trial of closed-loop control in type 1 diabetes further supporting the use of automated insulin delivery systems in adults with type 1 diabetes.

The online version of the article (<https://doi.org/10.2337/dc20-S007>) reflects the changes described below.

Recommendation 7.26 has been revised to read:

“Automated insulin delivery systems should be considered in adults with type 1 diabetes who have the skills to use them in order to improve time in range and reduce A1C and hypoglycemia. **A** These systems may also be useful to improve glycemia in children. **B**”
