In Table 2.3 of the article cited above, the hypertension risk factor was incorrectly defined as “ $\geq 140/90$ mmHg or on therapy for hypertension”; this has been corrected to “ $\geq 130/80$ or on therapy for hypertension.” More information on updated hypertension guideline recommendations can be found in Section 10 of *Standards of Care in Diabetes—2023, “Cardiovascular Disease and Risk Management”* (<https://doi.org/10.2337/dc23-S010>).

The online version of the article (<https://doi.org/10.2337/dc23-S002>) has been updated to correct the error.
