**Figure 4.** Co-immunoprecipitation of NUB1 with AIPL1 in Y79 retinoblastoma cells. Immunoprecipitates with preimmune serum (lane 1), anti-AIPL1 serum (lane 2) and affinity-purified anti-AIPL1 antibody (lane 3) were separated by SDS-PAGE and transferred for immunoblot analysis (IB) with either anti-NUB1 (A) or unpurified anti-AIPL1 (B). Total Y79 cell lysate (lane 4) was also loaded on the gel.
