CORRIGENDUM

Copy number variations and risk for schizophrenia in 22q11.2 deletion syndrome

The authors would like to apologize for an omission in the above paper. The following text should be added to the Acknowledgements: ‘We thank Andreas Fiebig and Stefan Schreiber at POPGEN (University of Kiel, D-24105 Kiel, Germany) for providing control samples’.

In addition, on page 4049, the authors mistakenly described a copy number variant as a ‘loss’ instead of a ‘gain’. The sentence should read: One 22q11.2DS subject with schizophrenia had a 1.48 Mb gain at 15q13.2-15q13.3 (chr 15:28,748,100 ... 30,231,500) that was inherited from an unaffected parent.
