Corrigendum

Cystic fibrosis in an era of genomically guided therapy

P.M. Barrett, A. Alagely and E.J. Topol

The last sentence of the section ‘THE CFTR GENE’ has been changed to:

Although specific mutations are not used to infer disease severity, classes 4 and 5 are generally associated with less severe phenotypic disease expression (6,24,25, 49,50).

The authors apologise for this.
