

## ERRATA

GeoArabia Vol. 6, No. 4, p. 619–646.

### Permeability and Rock Fabric from Wireline Logs, Arab-D Reservoir, Ghawar Field, Saudi Arabia

F.J. Lucia, J.W. Jennings, Jr.,  
and M. Rahnis, The University of Texas at Austin,  
and F.O. Meyer, Saudi Aramco

1. The equation for the global transform given on p. 634 was printed incorrectly. The correct version is as follows:

$$\log(k) = [A - B \times \log(\text{Class})] + [C - D \times \log(\text{Class})] = \log(\phi_{ip})$$

where

$k$  = permeability,

$\text{Class}$  = rock-fabric petrophysical class ranging from 0.5 to 4,

$A = 9.7982$ ;  $B = 12.0838$ ;  $C = 8.6711$ ;  $D = 8.2965$ ,

$\phi_{ip}$  = fractional interparticle porosity.

2. In Figure 12b on p. 628, the bar scale should read 0 to 100  $\mu\text{m}$  NOT 0 to 1  $\mu\text{m}$ .
