# Editorial Introduction

Welcome to volume 2 of *Evolutionary Computation*! As we move into the second year, we are working hard to expand the journal in several directions. In addition to the long technical papers, we are planning to include short technical notes, book reviews, and summaries of special workshops. This requires volunteers, of course, and will only be as successful as your willingness to provide such items. Please send me a note regarding proposals along these lines.

This issue represents another milestone in the development of the journal: our first special issue. I want to thank the guest editors, Rob Smith and Manuel Valenzuela-Rendon, for their time and efforts in putting together this excellent special issue on classifier systems.

Enjoy!
