The authors would like to make the following comment regarding the article above:
Since publication we have learned of four additional deaths. This error occurred due to delays in death registrations at Statistik Austria and at the Medical University of Vienna, of which we were unaware.

The authors would like to make the following comment regarding the article above:
We had recent notice that this manuscript contains several errors which we want to correct by this Corrigendum. Mean follow-up time is 24 months, not 42 months as reported. Range is 1-86 months, not 10-86 months. Furthermore, Kaplan-Meier analysis at 3 years reports 78% survival. This should refer to survival after 2 years, as after 3 years Kaplan-Meier survival was 70%. We do apologize for these mistakes.
