Acknowledgments

This volume sprang from a shared belief that scientific and humanistic approaches to music have much to offer each other and a desire to create spaces and conversations to realize the opportunities for greater mutual understanding and collaboration. We would like to thank the many people and institutions that helped make this endeavor possible. For financial support for the daylong workshop that brought the contributing authors together, thank you to the Princeton University Department of Music, Princeton University Council on Science and Technology, Northeastern University Department of Music, and National Science Foundation (NSF 1734025 to Elizabeth Hellmuth Margulis). Natalie Miller, Maddy Kushan, Cara Turnbull, and Dr. Parker Tichko managed the workshop's Zoom logistics and documented the discussions, and Vijay Iyer contributed challenges to the category of music and encouraged us to think about musicalities as embodied relations among beings and objects. Thank you for lending your time and expertise to the workshop.

For transcribing the interviews included in this volume, thank you to Johanna Linna and Yaen Chen. A Research, Scholarship, and Creative Activity Dissemination Grant from Northeastern University College of Arts, Media, and Design funded our writing retreat at the cottage in Chester, Connecticut, known locally as "The Recycle House." Additional summer support came from the National Science Foundation (NSF-CAREER 1945436 to Psyche Loui) and the National Institutes of Health for Sound Health: An NIH-Kennedy Center Partnership (NIH R21AG075232 to Psyche Loui). Thanks to George Lewis for posing the question "what is an experiment?" at the Musical Thought and Scientific Imagination Study Day at Harvard University in 2018 and to Emily MacGregor and Emily Dolan for organizing that inspiring event. Thank you to Philip Laughlin and the editorial team at MIT for shepherding this project through publication and to Larisa Martin and the team at Westchester Publishing Services for managing the production process. For indexing, thank you Erika Millen.

Finally, we would like to thank our families, with special gratitude to each of our husbands for moral and practical support, including bringing us lunch (because “real people need a real lunch”).
