16. Publication of Statement of Ownership
- □ Publication required. Will be printed in the November 1998 issue of this publication.
- □ Publication not required.

Rebecca N. Staebler
Director of Publications
(301) 897-8720 ext 133
9/30/98

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including multiple damages and civil penalties).

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.

2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.

3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.

4. If the publication had second-class authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.

5. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.

6. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of second-class authorization.
Are you hiding something important?

You've worked hard to get to where you are today... Don't keep it a secret!

Demonstrate your experience, education, and your strong commitment to forestry with the Certified Forester® Credential.

- As a certified forester you'll demonstrate to clients, employers, and the public that you meet specific national standards of practice, participate in continuing education activities, and have an unwavering commitment to your profession.
- Gain national visibility through the Certified Forester Directory.

To qualify you must:

- hold a professional degree in forestry (or a closely related degree)
- have five years of professional experience in forest resources administration, management, education, or research
- meet the Standards of Professional Practice

Helping SAF membership grow is a rewarding experience.

Have you earned SAF $$$ yet???

Here’s how you can reap the rewards of a growing Society...

Encourage someone to join SAF and you'll receive a $5 certificate for use on SAF merchandise, publications, and convention registration—each time you recruit one regular member or two new student members. Plus, you'll be eligible for great prizes.

To qualify, make sure to include your name as the recruiter of each person you recruit.

For applications call (301) 897-8720, ext 108; or visit www.safnet.org or e-mail mckernoc@safnet.org

Yes, send me more information and an application packet.

Comprehensive Network As the nation’s largest organization dedicated to forestry professionals, SAF addresses concerns and issues of all natural resource professionals.

Voice in the Media SAF is sought after by and responds to news media—from national networks to local newspapers—about the increasingly complex issues surrounding the management of natural resources.

Career Advancement SAF is a place to network with professional colleagues, make friends, and create new career opportunities.

Information SAF publishes the award-winning Journal of Forestry, the most widely read professional forestry periodical in the world, and The Forestry Source, a newspaper filled with late-breaking forestry information.

Money-Saving Benefits SAF offers discounts on continuing education programs, publications, conferences, and gift items—and offers low-cost life, disability, and catastrophic medical insurance.

Technical Expertise SAF has 29 working groups that focus on key areas, from remote sensing and GIS to wildlife and fish ecology.

Policy Resource SAF provides background and key testimony to natural resource policymakers on wetlands, endangered species, clearcutting, clean water legislation, and much more.

Continuing Education SAF attracts recognized leaders from around the world to speak at national conventions as well as regional and local meetings.

Standards of Excellence SAF accredits forestry school programs and administers the Certified Forester program, which recognizes professional foresters and their work with the public.
Here's a new definition for **indispensable resource**...

**The Dictionary of Forestry**

Announcing *The Dictionary of Forestry*—a concise new book that defines all the terms used in forestry today. Published by the Society of American Foresters, this is a resource you’ll want to keep by your side.

10% discount exclusively for SAF members!

"Every forester should have this book handy, especially to reference contemporary terms that have crept into the lexicon but are used without precision."

—Ross Whaley, President, SUNY College of Environmental Science and Forestry

"This is an impressive document that covers all of the increasingly complex areas of forestry and forest use in today's society."

—James E. Brown, State Forester, Oregon

"The Dictionary is comprehensive, easy to use, and of great value to forestry professionals working on both private and public lands."

—Sharon Haines, Manager, Natural Resources, International Paper

"Using correct terminology is essential, and this dictionary is the definitive source. Forestry students will find *The Dictionary* easy to navigate and full of terms they need to learn."

—Rick Fletcher, Extension Forester and Professor, Oregon State University
The New LI-1400 DataLogger.

Flexibility and Performance For Your Data Logging Applications.

Thanks to the new LI-1400 DataLogger, you have the flexibility in one instrument to meet applications that vary from remote environmental data logging in harsh environments, to hand held logging of vertical light attenuation in aquatic systems. By providing both a multichannel data logger and a powerful hand held meter in one package, the LI-1400 DataLogger delivers both value and performance. With simple setup and operation, the hardest thing you’ll ever have to do is to decide what sensors to measure.

Guidelines for Contributors

New and revised manuscripts submitted for publication and correspondence on other editorial matters should be addressed to Forest Science, attn: Janet Michaels, Manuscript Manager, Pacific Northwest Research Station, 3625 93rd Ave. SW, Olympia, WA 98612 (fs/science/rfm_olympia@fs.fed.us). The journal is not responsible for loss or damage of manuscripts and accompanying matter. The journal assumes no responsibility for statements and opinions expressed by its contributors.

FOREST SCIENCE seeks manuscripts addressing subjects related to forestry, broadly defined, or fundamental to it. Manuscripts about forests and manuscripts about the impacts of other activities on the forest are welcome. FOREST SCIENCE publishes articles, comments, review articles, discussion papers, monographs, book reviews, and announcements. The editor's decision is final on all submissions. All published manuscripts are open to comment by the readers.

Review articles and discussion papers provide syntheses of current knowledge in broad topical areas of current importance. They may refer to current literature, including relevant literature outside of forestry, as well as to gaps in the literature, controversial questions, and research priorities. They may advance hypotheses. Review articles and discussion papers may be of any length but are usually less than 17 printed pages (approximately 17,000 words).

Book reviews may be solicited or submitted without invitation. FOREST SCIENCE reviews recently published books and monographs that report results of forestry research or are otherwise of interest to scientists who investigate the biological, physical, or social attributes of the forest.

Suggestions to Contributors

Manuscripts are judged on their original contributions, on the importance of their subject matter, and on their clarity, accuracy, and conciseness. It is understood that manuscripts submitted to FOREST SCIENCE have not been published and are not being considered for publication elsewhere. At the time of submission, authors must provide information describing the extent to which data or text in the manuscript have been used in other papers or books that are published, in press, submitted, or soon to be submitted elsewhere. Authors who wish to use material such as figures or tables from previous publications are responsible for obtaining permission to do so from the previous publisher(s).

Style.—Recommended style manuals are: Style Manual (U.S. Government Printing Office) and CBE Style Manual (Council of Biology Editors, Inc.). See the latter for abbreviations and symbols. Metric units are required. Consult recent issues of FOREST SCIENCE for matters of form in preparing tables, figure captions, identification of authors, acknowledgments, and literature citations.

Double-space all copy, including captions and literature citations. Test all equations and proofread the entire manuscript for conformity with FOREST SCIENCE style. Inadequately prepared manuscripts will be returned without review.

Manuscripts revised and returned to FOREST SCIENCE more than 6 months after review will be treated as new manuscripts.

Nomenclature.—The authority for nomenclature of North American tree species is Checklist of United States Trees (Native and Naturalized), U.S. Department of Agriculture Handbook 541. The CBE Style Manual lists authorities for nomenclature of other plants and animals.

Copies.—Submit six copies of the manuscript printed one side only and one set of original figures. Use a sturdy envelope. A computer disk will be requested when the manuscript is accepted; do not send the disk with the original submission.

Guidelines for Electronic Preparation and Submission of Articles.—Please read and follow the Guidelines for Electronic Preparation and Submission of Articles (http://www.safnet.org/pubs/) before you select software to prepare text, tables, graphics, and equations. If your article is accepted, these guidelines also provide instructions for electronic submission.

Author Information.—Authors are anonymous to reviewers of manuscripts submitted to FOREST SCIENCE. To preserve author anonymity, author names should appear on the title page only. The title page should include postal and e-mail addresses for all authors as well as a fax number for the corresponding author.

Page Charges

Member: (Any of the article authors can qualify for the member rate.)

First five pages $65/page
Sixth and subsequent pages $125/page

Nonmember:

First five pages $85/page
Sixth and subsequent pages $125/page

Note that the following are exempt from page charges: book reviews, letters to the editor, comments on published articles (if received within 1 year of publication and less than 350 words), authors' reply to comments, notes of less than 150 words announcing availability of unpublished bibliographies, computer programs, and equipment blueprints. In addition, SAF members or FOREST SCIENCE subscribers in foreign countries may receive a preferential rate on request.

Permission to Reprint

Individual readers, and nonprofit libraries acting for them, may make fair use of material in the journal, e.g., copying an article or portion of an article for use in teaching or research. To request permission to photocopy, contact the APS Customer Service Department, Copyright Clearance Center, Inc. (CCC), 222 Rosewood Drive, Danvers, MA 01923 (978) 750-8400; fax (978) 750-4470; www.copyright.com. For republication, or systematic or multiple reproduction of copyrighted material (including figures and article excerpts), permission must be obtained from SAF, with a fee for commercial use to be determined; contact Christina Johnson, publications assistant, johnsonc@safnet.org. In all situations, SAF requests that the senior author also be contacted. FOREST SCIENCE grants permission to quote from it if the customary acknowledgment of the source accompanies the quotation. Requests for individual reprints should be directed to the author.
**Image Analysis for Plant Science**

Available for Windows (95, 3.1, NT) and for Apple PowerMac computers.

**WE SELL DIGITAL CAMERAS.** See our website (www.regent.qc.ca) for technical and pricing information.

Specialized software, general hardware is the philosophy behind Régent’s scientific image analysis systems. It is in sharp contrast with systems of the previous decades. Régent’s software programs are optimized for one task. They do not need to be configured before utilization.

Regent’s products come with a fast setup (within 24 hours), competent and responsive after-sale service.

**ONE SCANNER OR CAMERA, MANY APPLICATIONS!**

Many of Régent imaging systems are based on optical scanners. They produce excellent images and can be shared between different scientific or general applications. Regent has designed accessories that make scanning easier and faster.

Other systems based on digital video cameras.
