New Clinical Findings on a Challenging Subject are to be found in the new

SYMPOSIUM ON DIABETES
Rachmiel Levine, M.D., Guest Editor

Topics include:
- The Prediabetic State. A Concept of Dynamic Resistance to a Genetic Diabetogenic Influence
- Electron Microscopy of the Beta Cell of the Pancreas
- Adenocarcinoma of the Pancreas in Diabetes-Prone Chinese Hamsters
- Periodontal Pathology in a Strain of Chinese Hamster, Cricetulus griseus, with Hereditary Diabetes Mellitus
- Comparative Aspects of Spontaneous Diabetes Mellitus in Animals
- Plasma Insulin in Health and Disease
- Immunologic Aspects of Insulin
- The Production of Experimental Diabetes by Means of Insulin Antibodies
- On Some Biochemical Aspects of Diabetes Mellitus
- Ketogenesis and Hyperketonemia
- Critique of the Therapeutic Usefulness of the Oral Agents in Diabetes

Contributors include:
Stanley S. Bergen, Jr., M.D., St. Luke's Hospital, New York, N.Y.
Solomon A. Berion, M.D., Veterans Administration Hospital, Bronx, N.Y.
M. Michael Cohen, D.M.D., Tufts University School of Dental Medicine, Boston, Mass.
Jerome W. Conn, M.D., University of Michigan School of Medicine, Ann Arbor, Mich.
Stefan S. Fajans, M.D., University of Michigan School of Medicine, Ann Arbor, Mich.
Paul F. Lacy, Ph.D., Washington University, St. Louis, Mo.
Rachmiel Levine, M.D., New York Medical College, New York, N.Y.
Alexander Marble, M.D., Joslin Clinic, Boston, Mass.
Hans Meier, D.V.M., Ph.D., Jackson Memorial Laboratory, Bar Harbor, Maine
William E. Polk, Ph.D., Graduate School of Public Health, University of Pittsburgh, Pittsburgh, Pa.
Gerald Shklar, D.D.S., M.S., Tufts University School of Dental Medicine, Boston, Mass.
Theodore B. Van Itallie, M.D., St. Luke's Hospital, New York, N.Y.
Peter H. Wright, M.D., M.S.C., Northwestern University School of Medicine, Chicago, Ill.
Rosalyn S. Yalow, Ph.D., Veterans Administration Hospital, Bronx, N.Y.
George Vorganian, Ph.D., Boston Children's Hospital, Boston, Mass.

The Symposium on Diabetes was published in the December 1961 issue of the American Journal of Medicine. Subscription for one year (12 issues), $14.00; Canada, $15.00; Foreign, $18.00. Reprint of Symposium on Diabetes, $3.00 postpaid.

The American Journal of Medicine

When you are confident that your patient is in an optimal nutritional state, there is little to be gained through vitamin therapy...
But when acute or chronic disease interferes with adequate intake, retention, or utilization of nutrients, or when requirements are heightened, there is much to be gained through vitamin therapy

*Squibb Quality—the Priceless Ingredient*
Activity demands proper nutrition. 

Their bodies are made up of different proteins. 

The more similarity between the composition of the food proteins and human proteins, the more useful they are for the nutrition of man.

MEAT..... rich in quality protein, helps provide proper nutrition during activity.

MEAT IS A TASTY TREAT!

HOPE is a ship
she needs your continuing help

HOPE stands for “Health Opportunities for People Everywhere.”

S.S. HOPE, the floating medical teaching center, recently returned from her very successful maiden voyage to Indonesia and South Vietnam. The voyage of the HOPE ship proved that true people-to-people diplomacy of helping to give “health opportunities” can and does work...and is appreciated.

But, in order that the S.S. HOPE I, with her needed sister ships, can continue to spread health and American goodwill, she needs your continuing help.

While skilled American professionals aboard are drawn from a list of over 3,000 volunteers, serving without pay, the costs are high for sending our medical diplomats to points of the world where HOPE is wanted. HOPE needs help from all Americans...and now...in the form of dollars. Won’t you donate your next fee to the worthy cause of giving HOPE to everyone...everywhere? Help show that the people of America are concerned about the problems of other peoples.

HOPE, P.O. Box 9808, Washington 15, D. C.

Here is $_________to help Project HOPE. (Please make checks payable to Project HOPE.) All contributions are deductible under the provisions of Section 170 of the Internal Revenue Code of 1954.

Please send __________ leaflets for distribution to my patients, friends and associates.

☐ Please let me know how I may help Project HOPE in other ways.

"In severe injury or illness there is a large increase in utilization or destruction of vitamins within the body."

a powerful ally to specific therapy—Becotin®-T

Specifically designed to assist in medical or surgical aftercare

Becotin-T helps shorten convalescence by restoring normal tissue levels of important water-soluble vitamins depleted by the stress of severe injury or illness. There's a "loading dose" in every tablet.

Usual Dosage: 1 or 2 tablets daily.

Lilly Vitamins..."The Physician's Line"

Becotin®-T (vitamin B complex with vitamin C, therapeutic, Lilly)

This is a reminder advertisement. For adequate information for use, please consult manufacturer's literature. Eli Lilly and Company, Indianapolis 6, Indiana.

Each Becotin-T tablet contains:
- Thiamine Mononitrate (B₁) .................. 15 mg.
- Riboflavin (B₂) .................. 10 mg.
- Pyridoxine Hydrochloride (B₆) .................. 5 mg.
- Nicotinamide .................. 100 mg.
- Pantothenic Acid .................. 20 mg.
- (as Calcium Pantothenate, Racemic) Vitamin B₁₂ (Activity Equivalent)* .... 4 mcg.
- Ascorbic Acid (as Sodium Ascorbate) (C) .................. 300 mg.
- Liver Preparation and Stomach-Tissue Material, Desiccated, Lilly ........ 125 mg.

*Obtained from extractives of suitable microbial organisms and liver and determined microbiologically against vitamin B₁₂ standard.
