Environmental Entomology is published in February, April, June, August, October, and December. The journal publishes reports on the interaction of insects with the biological, chemical, and physical aspects of their environment and is divided into the following sections: Forum; Population Ecology; Community and Ecosystem Ecology; Insect–Symbiont Interactions; Biological Control–Parasitoids and Predators; Insect–Microbial Interactions; Biological Control–Wielders; Pollinator Ecology and Management; Plant–Insect Interactions; Behavior; Sampling; Port Management; Chemical Ecology; Physiological Ecology; Molecular Ecology and Evolution; Transgenic Plants and Insects. In addition to research papers, Environmental Entomology publishes Letters to the Editor, unsolicited articles in a Forum section, and Review Articles. The same guidelines apply to these as to research articles. For more detailed instructions concerning the preparation and submission of manuscripts, consult the Instructions to Authors at https://academic.oup.com/envent/page/GeneralInstructions.

All manuscripts are reviewed by scientists qualified to judge the validity of the research. Acceptance or rejection, however, is the decision of the subject editor. Acceptance of manuscripts is based solely on their scientific merit. Appeal of a rejected manuscript should be made to the Editorial Board, via the ESA director of publications. Accepted manuscripts are published approximately in the order they are received.

Manuscript Submission and Preparation. All manuscripts for the journal should be submitted electronically using the online review system, ScholarOne. Go to http://mc.manuscriptcentral.com. All authors submitting through ScholarOne for the first time are required to set up an account by filling in their contact information and determining their username and password. Once you have done so, please follow the instructions for submitting your manuscript online. Tables and figures should be uploaded as individual files that are separate from the main document. Authors may subsequently log on to ScholarOne and see the status of their manuscripts by clicking on their Author Center. If you have questions, try using the online Help button first. Or, you can email pubs@entsoc.org or call 301-731-4355, ext. 3020. Submit your manuscript as an MS Word or a Latex file with a page size of 8.5 x 11 inches. Typset all as double-spaced, with 1-inch margins, and do not justify text. Use the four Times New Roman (12 point). Use italics to indicate scientific names, symbols for variables, and words that are defined. Use question marks for quoted material only. Use American English spelling throughout and follow the Council of Science Editors Style Manual

References. Citations in the text should be by last name of the author and date and refer to a reference listed alphabetically by author in References Cited. For further formatting instructions, see http://academic.oup.com/envent/page/GeneralInstructions.

Tables. Keep tables to a minimum. Type all parts of each table double spaced, with each table starting on a new page.

Figures. Figures should be submitted as separate files from the manuscript. Figures should be submitted in one of the following formats: TIF, EPS, RET, DOC, PPT, XLS, PDF, PNG, PS, AL, GIF, PNG, or WMF. Image resolution should be 300 pixels per inch and figures should be one or two column wide (i.e., 6 x 12 or 3 x 6 inches). Separate parts of the same figure must be grouped together and arranged to use space efficiently. Wherever possible, it is best to avoid using a full page for a set of illustrations. That is, authors should attempt to have each figure appear separately from the others and should consider numbering illustrations as separate figures rather than as multiple parts of the same figure. Authors should indicate a preference for one- or two-column reproduction, and are asked to account for proportionate reduction or enlargement in the choice of lettering size, type style, and the format of the artwork itself. Authors should separate the legend from the art. Authors with questions concerning the preparation of artwork can refer to the Oxford Journals website at https://academic.oup.com/journals/page/authors/figures or contact the publication office staff at 845-714-4331 or pubs@entsoc.org.

Style Conventions. When first mentioned, a plant or animal should include the full scientific name and the author of the zoological name unabbreviated, except for Lusius (L.) and Fabricius (F.). Use only common names approved by the Entomological Society of America (http://www.entsoc.org/section/entomology/nomenclature). Otherwise, the manuscript should conform to the guidelines established by the latest edition of the Council of Science Editors Style Manual.

Proofs. Page proofs are sent to authors after manuscripts are accepted. Extensive changes to proofs, except for printer’s and editorial errors and answers to copyeditor’s questions addressing style or format, will be charged to the author.

Editorial Changes. Editorial review changes are assessed on all accepted manuscripts to cover some of the expenses of publishing. See the website listed below for current rates. Authors who are members of ESA at the time their article is published are exempt from page charges related to their article. For more information, visit the Environmental Entomology website at https://academic.oup.com/envent.
