ASSISTANT PROFESSOR OF EPIDEMIOLOGY AND CENTER FOR PUBLIC HEALTH PRACTICE

The University of Pittsburgh, Graduate School of Public Health invites applications for a faculty position at the level of Assistant Professor. This position is available immediately and requires an advanced (Doctoral) level degree in epidemiology and experience in public health practice. This is a part-time (10%) faculty position in the Department of Epidemiology and the Center for Public Health Practice (CHP).

As faculty in the Department of Epidemiology, the incumbent will develop an applied epidemiology course and training opportunities for MPH students at the Allegheny County Health Department. As faculty of the CHP, the incumbent will develop public health training opportunities, coordinate student activities, conduct applied research, and provide technical assistance. PhD or DPH degree in epidemiology required. Experience or current position in epidemiology or the health department is preferred. This position is outside of the tenure stream and is funded by grants and institutional funds. Salary will be commensurate with experience. Applications will be reviewed until position is filled.

Send letter of intent, curriculum vitae, and the names of three references to: Position #1011616, c/o D. Bushby, Department of Epidemiology, Graduate School of Public Health, 5150 Centre Avenue, Pittsburgh, PA 15261.

The University of Pittsburgh is an Affirmative Action/Equal Opportunity Employer and values diversity of human dignity and diversity. EEO/AA/M/F/V/Disabilities.

The Department of Epidemiology, Graduate School of Public Health at the University of Pittsburgh and the University of Pittsburgh Medical Center (UPMC) Hillman Cancer Center are jointly pleased to announce two exciting new faculty positions in the area of molecular epidemiology in cancer. With the strong support and resources of the UPMC Hillman Cancer Center and the University of Pittsburgh School of Medicine, the successful candidates will be expected to either have or develop a vibrant extramurally funded research program. Successful candidates will also develop coursework on advanced methods in biomarker identification and/or the molecular epidemiology of cancer. Of particular interest are candidates who bring expertise in novel risk assessment methodologies applied to cancer epidemiology and prevention. These two new positions are both open to candidates from all branches of molecular epidemiology. Individuals interested in applying for a position should forward a letter of application and CV to: Gary A. Smith, MD, DrPH, Director, Center for Injury Research and Policy, The Research Institute, Nationwide Children's Hospital, 200 Children's Drive, Columbus, OH 43205; telephone (614) 342-1535; email Gary.Smith@nationwidechildren.org.

The Center for Injury Research and Policy, located in The Research Institute of Nationwide Children’s Hospital and affiliated with The Ohio State University, is seeking top-notch, innovative investigators for a tenure-track faculty position in the area of molecular epidemiology in cancer. A position is available immediately. Tenure-track candidates who bring expertise in novel risk assessment methodologies applied to cancer epidemiology and prevention are strongly encouraged. Salary and benefits are very competitive and are based on experience and academic rank, and an attractive moving package will be tailored to the faculty member’s needs.

Injury research and policy at Nationwide Children’s Hospital is one of the nation’s largest and most productive research centers. The Center’s research portfolio includes ongoing projects with its affiliate faculty in low- and middle-income countries and a visiting scholars program. Through multiple partnerships, the Center has established collaborative networks of injury professionals regionally, nationally, and globally. A translational research team within the Center helps faculty members disseminate their research findings.

The University of Pittsburgh invites applications for a tenure-track faculty position in the area of molecular epidemiology in cancer. Successful candidates will have an appointment in the Department of Pediatrics of The Ohio State University and Nationwide Children’s Hospital and affiliated with The Ohio State University, is seeking top-notch, innovative investigators for a tenure-track faculty position in the area of molecular epidemiology in cancer. American Journal of Epidemiology

The American Journal of Epidemiology (ISSN 0002-9262) is published once per month, 12 times per year in 1 volume by Oxford University Press, 2001 Evans Road, Cary, NC 27513-2009, for the Johns Hopkins Bloomberg School of Public Health and is sponsored by the Society for Epidemiologic Research. Information for authors appears on the Journal’s home page at https://academic.oup.com/aje. Authors should consult these instructions before submitting manuscripts.

Subscriptions: A subscription to the American Journal of Epidemiology comprises 12 issues. Prices include dispatch by Standard Air. Airmail rates are available on request. The American Journal of Epidemiology Advance Access contains papers that have recently been accepted but have not yet been included within an issue. Advance Access is updated daily.

Annual subscription rate (Volume 187, 12 issues, 2018): Corporate: Print and online $1,602/£1,065/€1,598, Online only $1,151/€765/£1,148, and Print only $1,476/€981/£1,473; Institutional: Print and online $1,281/£852/€1,278, Online only $920/€612/£918, and Print only $1,181/€785/£1,178; Personal: (Combination: the Journal and Epidemiologic Reviews) Online only $460/€306/€459, and Print only $590/€392/€589). Please note: UKCE rate applies to UK and Rest of World, except US ($) and Europe (€). There may be other subscription rates available. For a complete listing please see https://academic.oup.com/aje/subscribe.

Full pre-payment in the correct currency is required for all orders. Payment should be in US dollars for orders delivered to the USA or Canada; Euros for orders being delivered within Europe (excluding the UK); GBP sterling for orders being delivered elsewhere (i.e., not being delivered to USA, Canada, or Europe). All orders should be accompanied by full payment and sent to your nearest Oxford Journals office. Subscriptions are accepted for complete volumes only. Orders are regarded as firm, and payments are not refundable. Our prices include Standard Air as postage outside of the UK. Claims must be notified within four months of despatch/order date (whichever is later). Subscriptions in the EEC may be subject to European VAT. If registered, please supply details of the proportion of the subscription price may be subject to UK VAT. Subscribers in Canada, please add GST to the prices quoted.

Personal rate subscriptions are only available if payment is made by personal cheque or credit card, delivery is to a private address, and it is for personal use only.

Supplements, reprints, and corporate sales: For requests from industry and companies regarding supplements, bulk article reprints, sponsored subscriptions, translation opportunities for previously published material, and corporate online opportunities, please e-mail corporate.services@oup.com, fax +44 (0)1865 353774, or visit https://academic.oup.com/journals/pages/access_purchase/collection_quotes.

Back issues: The current year and two previous years’ issues are available from Oxford University Press. Previous volumes can be obtained online at http://www.periodicals.oxford.com/ajedi.html or from the Periodicals Service Company, 11 Main Street, Germantown, NY 12526, USA. E-mail: psc@periodicals.com. Tel: (518) 537-4700. Fax: (518) 537-5899.

Instructions for Authors: Full instructions for manuscript preparation and submission can be found at: https://academic.oup.com/aje/pages/General_Instructions.

Environmental and ethical policies: Oxford Journals, a division of Oxford University Press, is committed to working with the global community to bring the highest quality research to the widest possible audience. Oxford Journals will protect the environment by implementing environmentally friendly policies and practices wherever possible. Please see https://academic.oup.com/journals/pages/authors/ethics for further information on environmental and ethical policies.

Drug Disclaimer: The mention of trade names, commercial products or organizations, and the inclusion of advertisements in the journal does not imply endorsement by the American Journal of Epidemiology, the editors, the editorial board, Oxford University Press, or the organizations with which the authors are affiliated. The editors and publishers have taken all reasonable precautions to verify drug names and doses, the results of experimental work, and clinical findings published in the journal. The ultimate responsibility for the use and dosage of drugs mentioned in the journal and in interpretation of published material lies with the medical practitioner, and the editors and publishers cannot accept liability for damages arising from any errors or omissions in the journal. Please inform the editors of any errors.

Permissions: For information on how to request permissions to reproduce articles or information from this journal, please visit https://academic.oup.com/journals/pages/access_purchase/rights_and_permissions.

Indexing/Abstracting: All rights reserved: no part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means (electronic, mechanical, photocopying, recording, or otherwise) without either prior written permission of the publisher or a license permitting restricted copying, issued in the US by the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923 (Fax: 978-750-4470) or in the UK by the Copyright Licensing Agency Ltd., 90 Tottenham Court Road, London W1P 9HE, UK. Reprints of individual articles are available only from the authors.

Indexing: The Journal is indexed in the following databases: BIOSIS, Current Contents: Life Sciences, and the Science Citation Index. The current year issue of the Journal is indexed in Current Contents: Life Sciences, and the BIOSIS database.

INSTRUCTIONS TO AUTHORS

Below is an abbreviated version of our instructions to authors. For the full version, please visit https://academic.oup.com/aje/pages/Instructions_To_Authors.

CORRESPONDENCE AND MANUSCRIPT SUBMISSION

Manuscripts must be blinded, double-spaced, and in 12-point type, with pages numbered. Each manuscript, when submitted, must include a word count for both the abstract and the text, exclusive of references, tables, and figure legends. Files should be submitted at http://mc.manuscriptcentral.com/aje. Please note that a lack of proper formatting, spelling, and reference citations will slow down a paper’s review and its ultimate disposition.

Authorship credit should be based on criteria developed by the International Committee for Medical Journal Editors (ICMJE). The author who submits the manuscript will remain the contact author throughout the entire publishing process. At the time of submission, the corresponding author must confirm that all authors meet the authorship criteria and have seen and approved of the paper. When the final revision of the manuscript has been accepted, the senior author must sign a Publication Agreement and a statement accepting responsibility for publication fees.

WORD COUNT

The maximum number of words per article, exclusive of tables, figures, references, and abstract, should be as follows: Original Contribution, 3,500; Practice of Epidemiology, 4,000; Study Design, 4,000; Review or Commentary, 4,000; HuGE Review, 5,000; Mini-Review, 2,000 (with no more than 1 figure, 1 short table, and 30 references); Special Article, 4,000; Systematic Reviews and Meta- and Pooled Analyses, 4,000; Epidemiology in History, 4,000; Invited Commentary, 2,000; Brief Original Contributions, 2,000 (with no more than 2 half-page tables and 40 references); Letter to the Editor, 500–600; and Research Letter, 1,000 (with no more than 1 figure and 1 short table). An abstract should not exceed 200 words. Authors must provide a word count for both the abstract and the text. Editors can request that authors shorten their papers further. Lengthy, encyclopedic tables should be avoided.

TEXT FORMAT AND STYLE

Refer to a current issue of the Journal for the correct format and style. It should be used in conjunction with the AMA Manual of Style, 10th Edition, published by Oxford University Press. Use American English spelling.

TABLE FORMAT AND STYLE

Each table must be formatted by using the table feature in Word. Tables should be numbered (Arabic numerals) in the same consecutive sequence in which they are mentioned in the text. Avoid using internal headings and do not use rules within the table body. Column headings should be clearly delineated, with straddle rules over pertinent columns to indicate subcategories. Columns should contain like types of data. Divide overly long tables into 2 or more tables. Multipart tables are not acceptable.

FIGURE FORMAT AND STYLE

Letters, numbers, decimal points, and symbols should be large enough and sharp enough to be readable when figures are reduced and scanned (no smaller than 8 pt in print). All multi-panel figures should have locants to identify each panel. When plotting relative measures of effect (e.g., relative risks, relative odds), a logarithmic scale must be used unless there is a compelling reason to use an arithmetic scale. If bars are used to plot the relative measures, they should start at the baseline level of 1.0.

Figure legends should not be included on the figures themselves but should be typed after the reference list. Authors should submit their figures with the manuscript. Color figure charges are £350 / $600 / €525 per figure. Figures with multiple shades of gray are not recommended. For clarity, use dots, hatch marks, or other line art markings. If your figures were created in Word, Excel, or PowerPoint, please submit in that format. For all other programs, please save these figures directly to EPS, PDF, or TIFF files and submit in that format. Vector files are preferred.

REFERENCES

All statements of scientific fact should be referenced. Number references consecutively in the order in which they are mentioned in the text. Reference numbers in the text are full-sized and should be placed in parentheses, with spaces between the reference numbers. See the online instructions for examples of specific types of references.

WEB MATERIAL

Web materials comprise supporting materials that cannot be included in the printed version of the article because of space constraints and that are not necessary in the full text of the manuscript but would nevertheless benefit the reader. They should not be essential to understanding the conclusions of the paper but should contain data that are directly relevant to the article content. Excessively long Web materials (>50 pages) or those that contain information not directly relevant to the paper will not be accepted. Examples include more detailed methods, extended data sets/data analysis, tables, questionnaires, or additional figures. These should be named Web Appendix, Web Tables, or Web Figures.
